SPECIAL COLLECTION OF PANSIES - ONE PACKET SUPER MAXIMUM MIXED, AS FEATURED ABOVE, TOGETHER WITH ONE PACKET EACH OF MASTODON BRONZE, ELKS PURPLE AND PANAMA PACIFIC YELLOW FOR \$1.00 POSTPAID.

General Directions for Ordering

NAME and ADDRESS—Be sure that your name and address are written plainly. Write in the proper place on the order blank Post Office, County, Rural Delivery, Box Number and nearest Express Office.

ORDER EARLY-We endeavor to ship all orders within 24 hours after we receive them, but during the rush season from February to April delays are sometimes unavoidable. If patrons can anticipate their wants and order early it will be to our mutual benefit.

REMITTANCES-Should be made by post office money order, express money order, or bank draft, for a sufficient amount to cover the entire order and postage, if any. Do not send currency. Should it be lost there is no recourse. Stamps of two cent denomination will be accepted for small amounts.

PARCEL POST-Parcel Post rates apply on weights up to 70 pounds in the first, second and third zones, and in all zones of 300 miles or more the limit weight is fifty pounds. Parcel post rates are usually cheaper than express, with the added advantage of having the parcel delivered to your door. We pay postage on all seeds in this Catalogue listed in packets, half ounce, ounce, quarter pound, pound and two pound quantity. On all seed and bulb collections we pay the postage. On small orders of bulbs we pay the postage, but not on the larger quantity.

POSTAGE NOT PAID-On orders of larger quantity at "not prepaid" prices stated in the Catalogue you pay the postage, express or freight. The same applies to quantity lots of bulbs at "not prepaid" prices.

On larger orders of seeds, say in 10 or 20 pound lots,

at "not prepaid" prices, it will be necessary for you to send postage extra if you want it by parcel post, but if it is to be sent by freight or express you can pay the transportation charges at your freight or express office when you receive the goods. Remember, tho, that if you want your order of "not prepaid" seeds or bulbs sent by parcel post the postage must be paid in advance and you must send us the amount of postage in addition to the cost of the seed or bulbs. If you do not know the zone you are in from Los Angeles your postmaster or R. F. D. carrier can tell you.

TO FIGURE POSTAGE—First figure the total weight in pounds on "not prepaid" items you are ordering, then find zone you are in from Los Angeles. If you have ten pounds of "not prepaid" items and you are in the first or second zone the postage would be 16c, the third zone 26c, the 4th zone 45c, etc., straight across the chart giving the parcel post zone rates. (See chart of parcel post zone rates.) Seventy pounds is the weight limit in the first, second and third zones—fifty pounds the weight limit in all other zones. If larger quantities are wanted it will be necessary to put the order up in two or more parcels and the postage must be figured on parcel individually.

FOREIGN PARCEL POST—The parcel post rate to foreign countries is 14 cents per pound. Foreign correspondents should add a sufficient amount to cover postage at this rate, if not ordering postpaid articles.

MEXICO SHIPMENTS-All orders sent by express or freight to Mexico have an extra charge, as follows: Orders to the value of \$5.00 to \$50.00 require \$1.00 extra, and orders above \$50.00 require \$2.00 extra for consular fees. All orders sent by parcel post are free of these charges.

ERRORS-While we exercise the utmost care in filling orders we find that occasionally errors occur, in which event we ask you to please notify us promptly and we suggest that you keep copy of your orders for comparison.

NON-WARRANTY: Note-There are so many contingencies to be encountered in growing plants from seed and in setting out plants that are dependent on the weather and other conditions over which we have no control, that success in planting is not altogether dependent on the seed or plant. We will send out only seed which we believe will grow and produce the kind of plant and variety represented, but:

Aggeler & Musser Seed Co. give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, plants or trees they send out, and they will not be responsible in any way for the crop.

PARCEL POST ZONES FROM LOS ANGELES Arizona, Utah, Nevada-mostly in the 4th zone.

Washington, Oregon, Idaho, Montana, Wyoming and Colorado mostly in the 5th zone.

New Mexico and Texas in 5th and 6th zones.

Oklahoma, Kansas and Nebraska mostly in 6th zone.

Florida and South Eastern States in 8th zone.

We send A & M California grown seeds all over the world. They produce a bit of sunshine wherever they

THIRTY-FIFTH ANNUAL CATALOGUE

of the

Aggeler & Musser Seed Company

Los Angeles, California

California Seedsmen for Thirty-Five Years

Grown under most favorable climatic conditions, California seeds are recognized as the highest quality obtainable and in addition to this, the AGGELER & MUSSER SEED COMPANY have to offer thirty-five years' experience in growing, selecting, improving and distributing.

During that time we have introduced to growers many excellent varieties of Vegetable and Flower Seeds that have played an important part in the upbuilding of the agricultural wealth of California. Among these are: A & M California Pearl Cauliflower, introduced by us in 1900 and approximately 7,000 acres are being grown annually at this time; White Rose Potato, introduced in 1901 and now grown more extensively than any other; A & M Los Angeles Market Lettuce, introduced in 1903, thirty to thirty-five thousand carloads of this lettuce now being shipped out of California annually; A & M Hybrid Casaba, introduced in 1902 and A & M Golden Beauty Casaba in 1908, now the leading casabas on the market; A & M Anaheim Chili Pepper; Klondike and Chilean Watermelons; A & M First Early Tomato and many others too numerous to mention.

Our latest introductions are: The A & M Riverside Sweet Spanish Onion. This is now attracting the attention of growers and consumers alike throughout the country. Now comes the A & M White Sweet Spanish Onion, destined to become a leader wherever it is grown.

It is with considerable pride that we look back over the years of successful seed growing that we have enjoyed and, in soliciting the business of planters throughout the country, we can only add that we expect to do as well in the future as we have in the past, and by so doing we hope to gain many more friends among those who till the soil.

Aggeler & Musser Seed Co.'s

Vegetable Seeds are the Standard Seeds of the Southwest

A & M Asparagus

Culture Drill the seed thinly in rows fifteen inches apart apart for strong plants.

Exercise great care in preparing a field because it will last

Transplant during February setting the roots one foot apart, Transplant during February setting the roots one foot apart, in furrows four feet apart. Carefully spread out to avoid matting. The furrows should be ten or twelve inches deep and run North and South to get the sun on both sides of the rows. Cover the roots about three inches and as the plant grows throw the soil toward the plant. Each year when the berries are red, cut the plants close to the ground and burn, then dust the entire field with Anchor Brand sulphur, to destroy any germs of mildew, red spider or rust that may be there. Keep a mulch over the row with a harrow, but cultivate more deep by between the rows. Use stable manure liberally and hill up a little higher each year. Irrigate freely during the growing period. Three pounds of seed is sufficient to plant an acre.

ROOTS: Plant one year old roots and do not cut them back. When planting see that the roots are well spread out so that the soil will touch every part. If this is not done the plant cannot thrive.

Mary Washington This is the latest introduction of the rust resistant varieties and the best with the advantage over all other varieties of being earlier, which means so much to the grower. Per (pkt. 10c) (oz. 45c) (1/4 lb. \$1.50) (1/4 lb. \$1.50) (lb. \$4.50) postpaid.

Mary Washington Roots

We grow our asparagus roots in good, clean land and they are given the very best attention in the way of cultivation. If you are planting an acreage of Asparagus tell us how many roots you expect to use and let us quote you prices on the larger quantity. Roots are usually ready for shipping about January 15th. (60c per dozen) (100, \$3.00) (1,000, \$20.00) postpaid.

Argenteuil An excellent variety for shipper. This variety is now more extensively grown by large planters and shippers because it is more prolific and stands shipping better. Also its purple tinge is attractive, and its excellent flavor puts it on an equal with the Palmetto for table use.

(Pkt. 10c), (oz. 20c), (1/4 lb. 50c), (lb. \$1.50

postpaid).

Roots (per doz. 50c) (100, \$3,00) (1,000, \$15.00) postpaid.

Palmetto A popular variety for the home garden or for shipping.
The sprouts are green and of delicious flavor.
(Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25 postpaid).

Roots (per doz. 50c) (100, \$3.00) (1,000 \$15.00) postpaid.

REMARKS: The green growth above the ground is tender and palatable. The white stem below the surface is tough and unpalatable. Why then is the custom to cut so deep? Would it not be better and a fairer practice to allow the stem to grow a little taller in order that the consumer may get more nearly full measure when he buys a pound of asparagus? To do this would cause no loss to the grower.

Asparagus Knife

Fish-tail Shape

Also an excellent weeder. Price 50c each, 55c postpaid.

Asparagus Moss

We always have on hand a large supply of moss for asparagus shippers. Price on Mary Washington application.

Culture Sow any time except during hottest weather, when all seed beds require special care. Soil should be a free, moist loam and seeds should be planted an inch deep. Plant out when six inches high in rows four feet apart each way. Save offsets from best plants for new supply, as artichokes never come true from seed, some will prove inferior. When planting seedlings, reject those with spiniest leaves.

Green Globe (Pkt. 10c) (oz. 90c) (1/4 lb. \$3.00) (lb. \$9.00)

Artichoke Plants. Half Moon Bay offshoots 25c each, 6 for \$1.35. doz. \$2.50. Postage extra.

A & M Beans

Write for Quantity Prices

Market gardeners who are beginners and not familiar with gardening in the Southwest would do well to consult us either in person or by mail before buying, as to variety and time of planting. Special attention should be given to the instructions concerning the time of planting, which is an important factor in Southern California, as each month requires a different variety according to the market for which they are grown. All A & M Beans, Peas and Corn are hand-picked. This gives the grower more and better seed per pound. When buying get the best.

The hand picking of seed beans is a task of large proportion and it may surprise you to know that we have employed almost throughout the entire year, six or more persons constantly hand-picking beans, peas and corn. The cost of hand picking is never less than one cent per pound and often as much as two cents, according to the amount of waste that is picked

The loss to the planter of seed that is not hand-picked is approximately 10 per cent of the crop. Cheap seeds are dear at any price. We realized this many years ago, hence the A & M reputation for quality.

Culture During the early spring give sandy soil preference, but heavy soil in summer. When the ground is properly moistened and pulverized, plant bush beans one or two seeds every four inches, in rows twenty to twenty-four inches apart. If the soil is heavy, one-half inch is deep enough. Plant deeper in sandy soil. During the cool spring months plant shallow; during the hot summer months plant down to moist earth. Do not plant in soil that is too wet, nor irrigate immediately after planting, else the seed will rot. During the winter months do all irrigating in the morning, because the water from the pipe is warm and will help the growth. When applied in the evening the water chills the plants, cools the soil, retards the growth and causes mildew. During hot summer days irrigate in the later afternoon. Never sprinkle beans.

To prevent mildew dust frequently with Anchor Brand sulphur while the plants are young. Mildew may be prevented but is difficult to cure.

Sulphur will not cure, but will arrest and prevent mildew.

Sulphur will not cure, but will arrest and prevent mildew.

Mulford Culture

Inoculate beans at time of planting with Mulford Culture. This will not only benefit the land but will increase the yield materially. Garden size 35c, 1 bu. size 60c, 2 bus. \$1.00, 5 bus. \$2.25, 20 bus. \$8.00.

FLAT YELLOW POD BUSH VARIETIES

A & M Golden Wax

Long, flat pod, rich golden yellow, stringless. This variety is sarded all but this. Plant early in April and until August. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid—(25 lbs. \$6.50) (50 lbs. \$12.00).

Ventura Wonder Wax or Davis Kidney Wax

This is the best Garden Bean for the interior, Imperial Valley, Arizona and New Mexico, because the blossoms will not fall even at a high temperature, when most other varieties fail, the Davis will yield a big crop. It is an excellent dry

Good bearer; pods are long, rustless and hardy; very tender when young. (Pkt. 10c) ($\frac{1}{2}$ lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid. Not prepaid—(25 lbs. \$6.50) (50 lbs. \$12.00).

FLAT GREEN POD BUSH BEANS

Canadian Wonder
hardy. Desired above all others by gardeners growing on the foothills for winter shipping, because of its luxuriant growth and continuous bearing of long, straight pods. Plant in September, October, November, December and January, according to your locality. (Per pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid. \$3.00) prepaid.

Dwarf Horticultural Desirable for green, shell and excellent flavor. It is of Italian origin and is very popular with the Italian population. (Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid.

Six Weeks A strong, rapid grower, which matures quick-in February and March, also early in September and October. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid.

French Mohawk Long oval pod, very tender and pro-for a profitable short crop, as only two months is required from seed time to the end of the crop. Plant every month from March to October. (Per pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid.

ROUND YELLOW POD BUSH BEANS

Prolific Black Wax Pod round, straight, five to six desirable for mid-summer gardening. Plant from April to August. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid.

Improved Butter Wax Beans

A & M IMPROVED **BUTTER WAX**

The demand for wax beans is gradually increasing in the local market and this bean has become a decided favorite because of its clean and most attractive yellow color. They are so clean and crisp looking that buyers just cannot resist them. We think they are the best way cannot resist them. We think they are the best wax bean for the commercial grower and many gardeners bear proof of our contention. They are very early and exceedingly prolific. The pods are long, straight and of uniform size. They are absolutely stringless, resistant to Rust and Mildew, and of bush habit. The blossoms set well throughout the summer and are not affected summer and are not affected by heat. The home gardener will find them a highly satisfactory bean, easily grown and exceedingly prolific. (Pkt. 10c) (½ lb. 20c) (1 lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid (25 lbs. \$6.50) (50 lbs. \$12.00.)

ROUND GREEN POD BUSH BEANS

A & M Stringless Green Pod One of the best varieties for the first early spring planting. It is very prolific and tender, a great favorite with market gardeners, for a quick maturing crop. Plant from April 1st until Aug. 1st. (Pkt. 10c) (1/2 lb. 20c) (1b. 35c) (10 lbs. \$3.00) prepaid. Not prepaid (25 lbs. \$6.50) (50 lbs. \$12.00)

Early Refugee or 1000 to 1 An all round favorite months. Round pod, medium size, tender, desirable for table and cannery. It is a favorite with the market gardener because its a good shipper, a good seller, and very prolific. Plant from April to August. (Pkt. 10c) (½ 1b. 20c) (1b. 35c) (10 lbs. \$3.00) prepaid. Not prepaid (25 lbs. \$6.50) (50 lbs. \$12.00.)

It is not generally known that-

When your bush varieties of string beans have borne a croq don't pull them up but as soon as you have finished the last picking, cut the bush off about six inches above the ground A new growth will appear and in a remarkably short time bear another crop of beans. The same is true of Fordhook Limas

Bush Lima Beans

Lima beans planted in cold soil will rot. The last of April and the month of May is as early as they should be planted.

Fordhook Bush Lima

In order to get the best results plant one foot apart in rows $3\frac{1}{2}$ feet apart. It is an improvement feet apart. It is an improvement over the well known bush Lima because it is more prolific. It is a strong grower, more resistant to blight, and is more profitable to blight, and is more profitable to grow for the market because the pods remain green. This is of great advantage to the peddler, retailer and shipper. It has received universal praise. We recommend it to our customers for both home and market gardens—for the home garden because of its excellent flavor and productiveness; for nome garden because of its excelent flavor and productiveness; for the market gardener because it is demanded by the shipper and con-sumer. (Pkt. 10c) (½ 1b. 20c) (lb. 35c) (10 lbs. \$3.00) (prepaid. Not prepaid, (25 lbs. \$6.50) (50 lbs. \$12.00.)

Improved Bush Lima

Improved Bush Lima

This bean differs from the old
bush variety in being ten days earlier. Will yield one-fourth more
tonnage per acre. The pods contain four to five beans that are
larger and thicker than the old
bush lima. Where the Improved
Bush Lima is known the old variety is no longer in demand. (Pkt.
100; (½ 1b. 20:) (lb. 35:) (10 lbs.
\$3.00) prepaid. Not prepald, (25
lbs. \$6.50) (50 lbs. \$12.00.)

Henderson's Bush

Also called Baby Lima. Small white Lima Bean, of excellent flavor and enormously prolific. It is grown so extensively here that it ranks commercially with common limas and other commercial varieties. It is used largely for canning. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid. Not prepaid, (25 lbs \$6.00) (50 lbs. \$11.00.)

Burpee's Bush Lima

This bean has become very popular with the market gardener in all irrigation districts because it is earlier and more easily grown. There are no vines in the way when irrigating and cultivating. It

Fordhook Bush Lima

Fordhook Bush Lima

When irrigating and cultivating. It is enormously prolific and keeps bearing a long time. (Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid. Not prepaid, (25 lbs. \$6.50) (50 lbs. \$12.00.)

Monstrous Lima

Plant 6 feet by 6 feet, leaving one stalk in each hill. If convenient, plant in a sheltered place about April 1st. You will then be gathering beans during September and possibly until January. After a while new growth will appear, then prune as you would a grape vine, protect with straw or a similar material, and by May 1st you have a new crop as profitable as peppers or string beans or any other early vegetable. During July the vines will show age and become mildewed; prune as before and in October you will begin gathering your third crop. Continue pruning twice a year; irrigate and fertilize. (Pkt. 10c) (½ lb. 35c) (lb. 60c prepaid) (10 lbs. \$5.50 prepaid).

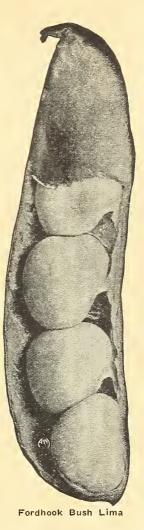

King of the Garden Very prolific; large and desirable both for the home garden and for the market gardener. Not quite as early as the bush varieties, but bear over a longer period. Plant from April 1st to September 1st. (Per Pkt. 10c) (1/2 lb. 20c) (1b. 35c) (10 lbs. \$3.00) prepaid.

HUMUS

Southern California soils require humus for best results. Humus is decaying vegetable matter. Save the leaves, lawn clippings, vegetable tops and all other such material and bury it in the garden to make humus. Listen-in on the weekly radio garden talks from KHJ 2:30 Wednesday of each week, for other garden information.

BEANS (Continued)

Beans—Continued

Kentucky Wonder

Pole Beans

A & M Rust Resistant Kentucky Wonder

An improved and selected strain. Realizing the importance of having a strain of Kentucky Wonder Beans that is more resistant to rust we have been selecting and improving along this line until we now have what we consider one that is more immune to attack by rust than any other, and it is as hardy as Canadian Wonder.

Reports from customers indicate that this bean is all that we claim for it and commercial growers are very enthusiastic

over it. Along the coast and where there is considerable moisture in the air the A & M Rust Resistant Kenfucky Wonder will thrive and yield well even under adverse weather conditions. We have bred up both a brown and white seed stock of this. Brown Seed (Pkt. 10c) (l/2 lb. 20c) (lb. 35c) (10 lbs. \$3.50). Not prepaid, (25 lbs. \$7.75) (50 lbs. \$14.00). White Seed (Pkt. 10c) (l/2 lb. 20c) (1 lb. 35c) (10 lbs. \$3.50). Not prepaid, (25 lbs. \$7.75) (50 lbs. \$14.00).

White Seeded Kentucky Wonder

This popular bean was first introduced by us in 1909. Because of its resemblance to the well-known Kentucky Wonder but having white seed, we named it the White Seeded Kentucky Wonder. It proved to be all that we had claimed for it, so that it is now the most popular green bean on the market. It is preferred by the shippers because of its solid pods, and by the canners for the same reason. The grower prefers it because it is a good seller and a money-maker. This variety of the many pole beans may truly be termed the All-Round Money-Maker. In the South where earliness and lateness mean so much to the market gardener, the White Seeded Kentucky Wonder is far ahead of other varieties. It is enormously prolific of firm pods that withstand shipping to almost any part of the United States. It matures ten days earlier than the Brown Seeded Kentucky Wonder. (Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid. Not prepaid, (25 lbs. \$6.00) (50 lbs. \$11.00.)

Kentucky Wonder The Kentucky Wonder was for many market gardeners as well as for the home gardeners. Its long round stringless pods are very prolific and tender. Its only drawback was the fact that it is much more susceptible to mildew than other varieties. For April and May planting it cannot be excelled. It has brown seed of little value as dry beans. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c.) (10 lbs. \$3.00) prepaid. Not prepaid, (25 lbs. \$6.00) (50 lbs. \$11 00.)

Kentucky Wonder Wax The Pride of the Garden. Its popularity as a home garden bean soon reached nationwide proportions, and today is offered by nearly every seedsman in the United States. It commences to bear when scarcely higher than the average bush variety, and keeps on producing until killed by a frost. It is a rampant grower, one plant filling a pole with a mass of vines densely loaded with luscious golden beans. They are firm, entirely stringless, and when cooked, deliciously rich and buttery. The seed is brown, closely resembling that of the Kentucky Wonder. Plant from April to August. (Pkt. 10c) (1/2 lb. 20c) (1/2 lb. 35c) (10 lbs. \$3.00) prepaid.

Horticultural Pole Also referred to as Romaine, Cranberry, Italian and Cornfield. Its large succulent tender pods make it a favorite bean for the table. It is one of the most desirable green shelled beans for succotash and excellent as a dry bean. It is also first rate when parhoiled and pickled in a mild solution of vinegar and water. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepald.

Celestial or Yard Long

A good table bean as well as a curiosity. It is very prolific and a rank grower. Should have ample arbor to climb upon. It should be grown more extensively in the home garden. It is of Chinese origin and one of the best vegetables emanating from that source. It is also absolutely rust-proof. (Pkt. 10c) (1 oz. 20c) (1 lb. \$1.50) postpaid.

The Scarlet Runner An old-time favorite that hereto-fore has been planted chiefly for ornamental purposes. But few people know that the Scarlet Runner may be planted May 1st and in six weeks attain a height of eight feet, and rapidly cover an arbor with vines twenty feet long. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00)

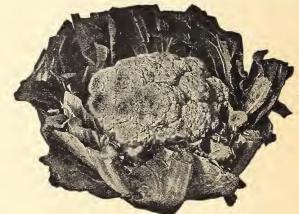

A Word About Pole Beans Many growers hesitate to plant pole beans because of the scarcity of poles. This objection is easily overcome, and the greater profit in growing the pole variedes should be sufficient reason for going to a little extra care.

Plaster laths will answer the purpose and cost very little.

BRUSSELS SPROUTS

A & M Medium Dwarf

The culture for Brussels Sprouts is the same as for cabbage. It is a very highly esteemed vegetable and our strain of seed produces plants of dwarf, robust habit, and bearing in profusion the small compact heads. (Pkt. 10c) (oz. 30c) (1/4 b. 90c) (1 lb. \$2.75) postpaid.

A & M St. Valentine Broccoli

BROCCOLI

A & M St. Valentine
it so much resembles. For years we have been supplying commercial growers throughout California and Pacific Coast States, with a special strain of seed. This seed produces the very finest Broccoli and it will easily pass for cauliflower in any market. It matures from four to six weeks later than cauliflower, has a beautiful dark green foliage, and is of spreading habit. Market gardeners should give this a trial if you are not familiar with it. It has its place in most every market. It is easily grown and will find ready sales. Our strain has been developed to suit market conditions. Seed should be sown from July to end of September. (Pkt. 15c) (oz. \$1.50) (1/4 lb. \$5.00) (1 lb. \$20.00) postpaid.

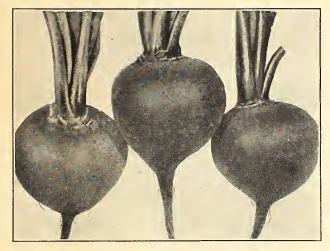

A & M Table Beets

Culture

Beets may be planted all the year round where the temperature does not linger below 30 degrees. Sow the seed one inch deep in well prepared, moist soil in rows eight or ten inches apart, or on ridges same as lettuce. Drill 10 pounds of seed per acre. Thin out to one plant every three inches, and transplant the discarded plants in any convenient spot about the garden. Irrigate about every two weeks, unless the nature of the soil is such that more frequent irrigation is found to be necessary. Mulch the soil after each irrigation. Beets are ready for use in ten weeks and continue in prime condition for another ten weeks. For the home garden sow one ounce of seed for 100 feet of row. the home garden sow one ounce of seed for 100 feet of row.

Early Flat Egyptian The Egyptian is a small, dark red, flat, smooth variety. It is sweetest and best for the table and is the market gardener's winter favorite on account of its beautiful appearance, earliness, and excellent flavor. (Pkt. 10c) (oz. 15c) (1/4 lb. 35c) (lb. \$1.00) rostnale. postpald.

Early Blood Turnip Of large growth. Flesh very tender and retains its blood-red color when cooked. On account of its tall leaves it is a favorite summer time beet with market gardeners. (Pkt. 10c) (oz. 15c) (1/4 lb. 35c) (lb. \$1.00) postpaid).

Early Wonder

Early Wonder In size and shape this beet is very similar to Early Crosby. Because of its very bright color it is becoming very popular on the local market and we think it is destined to become one of the best market varieties. It is extremely early, of good uniform size, a bright red in color and with a very small top, which makes it most suitable for bunching. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (1 lb. \$150), nesthaid. \$1.50) postpaid.

Early Crosby One of the favorites among California garing. They are of uniform shape and size, with good color and medium top. (Pkt. 10c) (oz. 15c) (1/4 lb. 40c) (1 lb. \$1.25) postpaid.

Detroit Dark Red This is an ideal beet for all purposes. It cannot be excelled for the table; free from all fibre and very sweet. It is the best of all for pickling or canning. Even the tops are good when pickled. (Pkt. 10c) (oz. 15c) (1/4 lb. 40c) (lb. \$1.25) postpaid.

A & M Stock Beets

Culture May be sown all the year round in drills sixteen in rows. Keep well cultivated; 8 pounds of mangel, or 10 pounds of sugar beet seed will plant an acre and yield 20 tons or more of beets.

For the breeder of hogs, small stock and poultry, we recommend the planting of beets. The Stock Beet is one of the finest fat and milk-producing crops we have today, and when fed in conjunction with grain they are worth nearly as much, pound for pound, as the grain itself.

Half Sugar Rose
roots of giant size and richest food quality. It has yielded 55 tons per acre, several tons per acre more than the heaviest producers of other sorts on the list. They have a small top, and are easily trimmed. The roots are heavy, but are so easily harvested that they may be uprooted by a push of the foot. The flesh is white, solid, tender and very sweet and imparts a rich, pleasant flavor to dairy products when fed to milch cows. Also particularly good for fattenling hogs. Half Sugar Rose is a profitable Stock Beet to grow. (Pkt. 10c) (fb. 60c) (10 lbs. \$5.50) postpald,

Stock Beets—Continued

Long Red Mangel The largest Stock Beet. Wilds 40 in land containing more alkali than any other beet. Will grow except horses eat it readily. (Pkt. 10c) (lb. 60c) (10 lbs. \$5.50)

Golden Tankard Mangel Contains more sugar and less water than any other Mangel. Rich in milk-producing qualities, hence a favorite with dairymen. Horses will eat it. (Pkt. 10c) (lb. 60c) (10 lbs. \$5.50) postpaid.

Klein Wanzleben (Sugar Beet.) This variety is without the largest in size, but the richest in saccharine. It will fatten hogs as quickly as grain. (Pkt. 10c) (Ib. 60c) (10 lbs. \$5.50) postpaid.

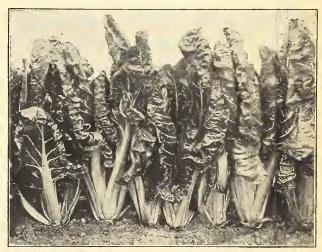

A & M SWISS CHARD

Culture
Same as for beets; transplant 8 inches apart in rows 18 inches apart.

Grown for its leaves only; one of the best early greens. Cook the leaves as you do spinach and the stems in cream as asparagus. Leaves grow to enormous size, 20 inches to 2 feet in length. The plant is almost perpetual if kept trimmed, but it is better to have a new crop every year. The tender leaves make it a desirable plant for poultry greens; much more desirable than alfalfa, because it can be grown with less care and in any convenient place about the premises. Try it for your hens.

Luculus Used extensively for poultry and is one of the popular varieties for this purpose because of the tendency to grow to a good height and to produce longer leaves and more forage. (Pkt. 10c) (oz. 15c) (1/4 lb 35c) (1 lb. \$1.00) postpaid \$1.00) postpaid.

White Swiss Chard Best suitable for table use, but is also used extensively for poultry feed. It has a large white rib, a rather smooth leaf, making it easily cleaned for table use. The large midrib is sometimes cooked as you would prepare asparagus. (Pkt. 10c) (oz. 15c) (1/4 lb. 35c) (1 lb. \$1.00) postpaid.

White Swiss Chard

Agriculture is a Business

The successful grower of the "Great Southwest" is an expert in his line. He has all the United States for a market during the winter months, and all the arid Southwest in the summer time. He must consider well his soil, be an expert in the selection and use of fertilizers, in the selection of his seed suited to his soil, to his climate, to the time of planting and the market for which he intends to grow. He must know to perfection when to irrigate, to cultivate, and when not to do so. He must study insecticides, know what, when and how to apply them. He must not only keep posted as to market conditions and prices, but must figure ahead on these conditions. these conditions.

When giving consideration to approximate yields and values, take into account the cost of labor, irrigation, time to fertilize, and expense of marketing. All these figure in determining the net profit. Then consider too the adaptability of each crop to your soil and the purpose for which the crop is intended. All must be considered when deciding the advisability of planting field crops.

When in doubt buy Aggeler & Musser's seeds, and always consult AGGELIER & MUSSER SEED CO, on all the above subjects. And keep this catalog.

A & M Cabbage

Culture The secret of growing hardy plants is to thoroughly prepare the soil in the plant bed. Plow the soil to a depth of eight or ten inches, pulverize well. Sow in drills not too freely, about one-half inch deep, press the soil firmly over the seed; this is important. In about six weeks transplant in rows three feet apart, one foot in the row for Winnigstadt, eighteen inches for large-heading varieties. Keep the crop well watered and cultivated for when the growth is checked the seed head matures and bursts forth as soon as moisture is again applied. This accounts for much cabbage going to seed. Early varieties mature about three and one-half months after transplanting, late varieties in about five months.

Cabbage may be grown all the year in Southern California and throughout the Southwest.

It should be borne in mind that the big planting of cabbage is intended to meet the Eastern demand in midwinter and early spring, and that our time of planting is out of the natural season, and therefore often subjected to unseasonable

weather, which causes it to be stunted and often shoot to seed. The wonder is that any of it matures.

Improper culture, too, will stunt the normal growth of cabbage and cause the heads to prematurely go to seed.

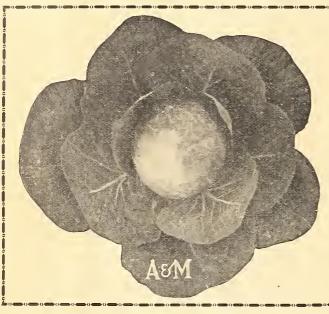

Cabbage requires heavy soil but good drainage and frequent but shallow cultivation.

Should there be a cold spell when the thermometer lingers below 25 degrees, just at the time the cabbage begins to head, you may expect twenty-five per cent of your crop to shoot to seed.

One large and constant grower says: "November transplanting escapes the hard winter season that causes so much loss by shooting to flower."

Five ounces of seed will produce plants for one acre.

Ahpids may be controlled by spraying with Destruxol or Black Leaf 40 and for worms and other leaf eating insects, spray with Arsenate of Lead.

A & M GOLDEN ACRE CABBAGE

This is one of the earliest varieties of cabbage we have ever had in our trials. It resembles somewhat in shape the Copenhagen Market, but is a trifle smaller in size and is 12 to 14 days earlier. In habit of growth it is quite dwarf, very compact and produces a head of desireable size for family use or for packing. The heads average in weight 2 1-2 to 3 pounds. Because of its compactness and the few leaves it may be planted 12 to 14 inches apart in the row and at this rate about 15,000 plants are required for one acre. It is very solid, of uniform shape and size and is what we consider an extra fine all around variety. Our strain of seed comes from the originator and is carefully selected by us for uniformity and other qualities of importance,

(Pkt. 10c) (oz. 75c) (1/4 lb. \$2.50) (lb. \$7.50)

Early Jersey Wakefield Very early, maturing in 90 to point like the Winnigstadt. Recommended for home garden where earliness is desired. (Pkt. 10c) (oz. 35c) (1/4 lb. \$1.20) (lb. \$3.50 postpaid).

A & M Winnigstadt

No other vegetable listed in our catalog has retained its popularity so continuously and for such a long time as our strain of Winnigstadt Cabbage, introduced by us in 1896. It is now, and has been ever since that date, the most popular cabbage grown in Southern California. It is popular because it is early, solid, good flavor, sure header, and good shipper. The small heads are particularly desirable for home use, making it a most satisfactory home garden variety (Pkt. 10c) (oz. 25c) (1/4 lb. 80c) (lb. \$2.50) postpaid.

Late Flat Dutch Year by year this variety becomes early, tender, crisp, and just the right size for the dealer. Truckers like it because every stalk produces a head. (Pkt. 10c) (oz. 30c) (1/4 lb. \$1.00) (lb. \$3.00.)

Drumhead Savoy The best of all Savoys. Short stump, (oz. 30) (1/4 lb. \$1.00) (lb. \$3.00) postpaid. (Pkt. 19c)

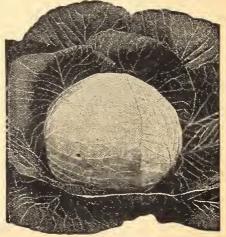

Red Dutch Heads of deep color and remarkably solid. Excellent for slaw. (Pkt. 10c) (oz. 35c) (1/4 lb. \$1.20) (lb. \$3.50) postpaid.

A & M Early Flat Dutch

This is a splendid strain of Flat Dutch Cabbage.

It is a favorite with many market gardeners and home gardeners for the reason that every plant produces a head. Heads are large, well flattened on top, and it is a good producer under most any climatic conditions where other cabbage can be produced. (Pkt. 10c) (oz. 30c) (1/4 lb. \$1.00) (1 lb. \$3.00) nostnaid. postpaid.

Copenhagen Market

Copenhagen Market

Our European grower has given great praise to this variety. It is earlier, larger and better than the Winnigstadt for the local market or for shipping. It for shipping. It is grown more extensively for the markets of Northern Europe than any other variety. It excels—because of its extreme tenderness and delicious flavor, which is compared with cauliflower. We give it urgent give it urgent recommendation to all growers.

One grower reports having purchased from us ¼ lb. of Copenhagen Market seed with which he planted 1 1/8 acres from which he marketed \$524.00 worth, having sold his cabbage at \$40.00 per ton. (Pkt. 10c) (oz. 40c) (1/4 lb. \$1.35) (lb. \$4.00)

A & M Cannon Ball

Cannon Ball or Short Stem Danish Ballhead

This has become one of the standard varieties for shipping. It is now grown as extensively as the Winnigstadt but it is planted mostly during August and September for early shipping while Winnigstadt is preferred for mid-winter crop. (Pkt. 10c) (oz. 40c) (1/4 lb. 1.35) (lb. \$4.00) postpaid.

A & M CHINESE CABBAGE

Pe-Tsai-Chinese Cabbage

Culture
Grow it as you do lettuce; transplant 10 inches apart in rows 12 inches apart. Plant from Sept. 1 until Feb. 1. It needs plenty of moisture and will grow to maturity in 60 days.

Our seed is imported from China. It is the genuine article as pictured here and cannot be compared with the Pe-Tsai seed grown in Europe.

Boiled with beef or pork it is excellent, having a much more pleasing flavor than cabbage. The inner leaves make better cold slaw. It is now being used extensively for poultry. (Pkt. 10c) (oz. 50c) (1/4 lb. \$1.65) (1/2 lb. \$2.50) (lb. \$5.00) postpaid.

A & M COLLARDS

The Collard is an old-time favorite, adapted to all parts of the South, and as a producer of "greens" during winter and spring it has no equal. It will pay you to have a collard patch just to feed the chickens.

Southern Georgia This variety is the old-time favorconditions without injury. Is very hardy. In many places
where the soil is too poor to grow cabbage, the collard grows
easily, and makes a good substitute for cabbage. (Pkt. 10c)
(oz. 20c) (/4 lb. 60c) (lb. \$2.00) postpaid.

A & M Table Carrots

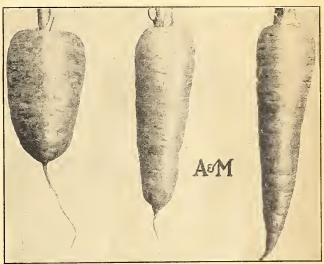

Culture Sow one ounce of seed to 100 feet of row, three pounds per acre.

Carrots are very profitable because of the large quantity that a small patch can produce, and there is no waste, as any surplus may be fed to rabbits or other animals.

Carrots may be planted all the year round. Sow the seed from one-half to one inch deep in rich, moist, loamy soil, well prepared. Sow in rows eight inches apart, and as thin as the drill can be set to sow, or, if sown by hand, aim to have two seed to the inch, or sow in ridges same as lettuce. The carrot has few insect enemies. Nematode is the worst, Irrigate same as for beets. Carrots are ready for use in eight weeks and remain palatable for six months or longer.

Market—The local demand for Carrots is all the year round, but the chief demand is from the shipper, who wants them from December 1st until May. For this trade the seed should be planted in August and September. The shipper wants the Chantenay, Oxheart and Danver Half Long.

There are many rabbit hutches within the city where carrots are used throughout the year, If you live a convenient distance from one of these places you may be able to secure a contract from the owner to furnish carrots. Chantenay and Danver's half long are now the favorites with large growers.

Ox Heart

Chantenay

Danvers Half Long

Danver's Half Long The roots are smooth and of a rich, dark orange color. One of the best sorts for a main crop because it remains edible in the fields longer than other varieties. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Chantenay Flesh is a deep golden orange color, always smooth and fine in texture, very tender. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Improved Long Orange A deep orange colored vagarden culture. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Oxheart Beautiful shape and color. The roots generally attain four or five inches in length, and about three inches in diameter. Quality first rate, very tender, and a variety that is used in quantity. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Early French Forcing A small sort but desirable on account of its extra early habit. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

A & M STOCK CARROTS

Culture Drill in rows 12 inches apart, and thin to three inches apart in the row. It requires three pounds of seed to plant an acre.

Carrots are healthful food for stock of all kinds and should be more generally grown.

Half Long White Belgian
very large size; is easily gathered.

Makes splendid food for attle, horses and hogs; known to yield forty tons per acre. Will keep four or five months after pulling. (Pkt. 10c) (oz. 20c) (1/4 lb. 40c) (lb. \$1.10) postpaid.

Large Yellow Belgian Is similar to the above, but said to be richer, but does not keep so well. (Pkt. 10c) (oz. 20c) (1/4 lb. 40c) (lb. \$1.10) postpaid.

A & M Cauliflower

Culture (For Shippers)—Choose soil from a rich loam to a heavy adobe. The field should be level to afford a uniform moisture. Avoid planting Cauliflower or Cabbage on a hillside.

Early varieties should be planted in the seed bed from May 1st to July 1st. Late varieties from June 1st to August 1st. Early planting of seed is advised in order that the plant may have fully developed before the proper season for maturing. Growers are constantly endeavoring to mature a normal crop out of season. Proper culture will accomplish much toward producing a good crop but too much is expected out of the normal season.

Plants should be ready to transplant from six to eight weeks after seed is planted. Early varieties should be ready for market in November; late varieties in December and January, and later according to the time of planting the seed.

Do not attempt to grow Cauliflower or Cabbage unless you have water in abundance.

Five ounces of seed will produce plants for one acre.

A & M Pearl Cauliflower is a great favorite from Callfornia to New York, because of its excellent shipping qualities. It originated here and has made Southern California famous for her excellent cauliflower. The California Pearl is thoroughly adapted to our mild winter climate and is particularly suited for shipping because of the flower being completely enveloped within spiral curled leaves, which protect the flower from injurious exposure to rain, sunshine or frost, but particularly from injury in packing and in transit. It retains its fresh appearance longer than any other variety. It is decidedly the gardener's, the shipper's, the dealer's and the consumer's favorite. To be packed for shipping it is only necessary to cut the stem at the base of the head, and the leaves about two inches above the head. This leaves foliage enough to cover the crown without wrapping in paper. These heads are packed two layers in a crate (16 inches deep), with the base at the top and bottom, the crowns facing the center, usually 24 heads per crate.

The small grower may plant at any time from May until February, but for profit the large grower should carefully peruse instructions given with each variety.

Extra Early Pearl From seed planted in May the crop may be harvested in November. This is the usual procedure in planting this variety in Southern California. It is a most dependable Cauliflower and is sure to head if properly cared for.

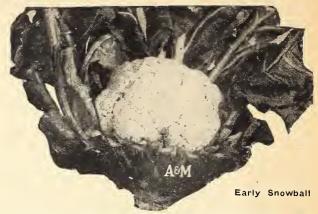

We have growers who plant this variety year after year. (Pkt. 10c) (1/4 oz. 65c) (oz. \$2.00) (1/4 lb. \$6.50) (lb. \$20.00).

Medium Early Pearl Similar in all respects to the frieties except that it should be planted not earlier than June 1st nor later than August 1st. (Pkt. 10c) (1/4 oz. 65c) (1 oz. \$2.00) (1/4 lb. \$6.65) (lb. \$20.00).

A & M Late Pearl Late Pearl Cauliflower attains a seed during July to harvest during January and February. This is the variety that has made California Cauliflower famous throughout the United States and is bringing annually more than \$1,000,000 to growers. (Pkt. 10c) (1/4 oz. 65c) (oz. \$2.00) (1/4 lb. \$6.65) (lb. \$20.00) postpaid.

A & M Pearl Cauliflower

Snowball This variety is in a class by itself for earliness. The demand for seed begins in April for May planting, which is ready for the local market beginning October 1st.

There is good profit in the early variety, but care should be exercised to avoid blighting by excessively hot weather. At such times apply water abundantly, but cultivate judiciously to prevent any baking of the soil. (Pkt. 25c) (1/4 oz. 90c) (oz. \$2.50) (1/4 lb. \$7.50) (lb. \$30.00) postpaid.

How Cauliflower is Planted

The field is irrigated several days before and the furrow immediately after planting. Note the size of the plants, also see the water coming in the furrow.

A & M CRESS

Pepper Grass Sow curled or pepper grass thickly, in shallow drills, every two or three weeks. It should be cut often, and will continue to grow. It is used not only for salad, but on the breakfast table and for garnishing. Used with lettuce its pungency adds an agreeable flavor. (Pkt. 10c) (oz. 15c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

True Water Cress Should be sown in damp soil or if it would be much better. It will also thrive well in damp cold frame. Rightly managed, its culture is very profitable. (Pkt. 10c) (oz. 60c) (1/4 lb. \$2.00) postpald.

Pop Corn

Rice Sharp pointed grain is preferred by vendors, but is not profitable to grow here at the usual price because of the devastations of the worm. (Per pkt. 10c) (lb. 30c) (10 lbs. \$2.50) prepaid.

Yellow Large smooth grains of Golden Yellow Color. It pops large, has excellent flavor and is the most profitable to grow. (Pkt. 10c) (lb. 30c) (10 lbs. \$2.50) prepald.

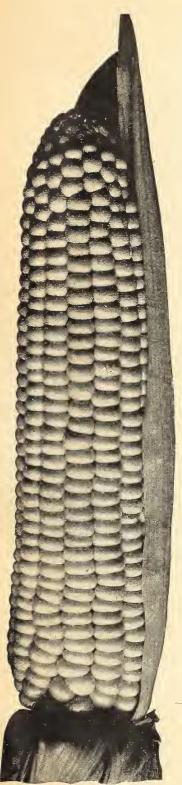

A Tip to the Amateur

Mix one part arsenate of lead, three parts hydrated lime and dust the silks to prevent corn ear worms.

Break off sucker stalks as they appear leaving but one

main stalk.

A & M Sweet Corn

Culture Plant from Feb. 15th to September 1st in hills 18 inches apart, in rows three feet apart. Allow two stalks to the hill, break off all side shoots; cultivate after each irrigation until the corn shades the ground; irrigate every two weeks until in the milk, then once or twice a week, and this will produce a solid tight husk, which solid tight husk, which will prevent the worms from doing much dam-

Instead of planting long single rows of corn it is preferable to sow several preferable to sow several short rows along side each other so that pollen scattering from the top tassles is more likely to reach the silk of the ears below. A rotation of corn may be obtained by planting at the same time planting at the same time some A & M Early Golden, Golden Bantam and Ore-gon Evergreen and they will mature at intervals in the order named. Plant 10 lbs. per acre.

A & M Oregon Evergreen

Oregon Evergreen corn now has the en-dorsement of every gar-dener that grows for the Los Angeles mar-ket. We are safe to say that any gardener growing this will show to his customers its to his customers its superiority over all other sweet corn. It is many years since we first offered this new and distinct variety. The demand has grown each distinct variety. The demand has grown each year until it is now practically the only variety offered on the Los Angeles market. The advantages of this corn Angeles market. The advantages of this corn over all others are its earliness, its large size, rarely less than eight inches long. The grains are full to the tip and delicious delicious.

are full to the up and delicious.

The husk is very thick and folds so tightly over the grains that the worm does very little damage, compared with other varieties. It is desired by the peddler and groceryman because of its thick husk, and it can be held over two days before it appears old or wilted. It is very productive, often bearing five marketable ears. (Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid, (25 lbs. \$6.50) (50 lbs. \$12.00).

A & M Early V Golden

Oregon Evergreen.

This is a light golden colored corn maturing earlier than Golden Bantam and are of a very fine flavor, being sweet and tender. The stalks are dwarf in nature, growing to a height of about 3 feet, each stalk producing two or three ears. See illustration on back cover. (Packet 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpald. Not prepaid (25 lbs. \$6.50) (50 lbs, \$12.00).

A & M Early Adams This is a blend between the Eastern Extra Early Adams. The superiority of this strain over the former eastern-grown Adams is shown in its earliness, large size and sweetness. It is nearly as good as the Oregon Evergreen, and it is earlier and hardier. It is one of the many good things that originated here. Although it may be frosted when six inches high it will come again. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid. Not prepaid, (25 lbs. \$6.00) (50 lbs. \$11.00.)

A & M Large Adams This is the best market valate crop. It will mature in fifty-five days. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3 00) prepaid. Not prepaid, (25 lbs. \$6.00) (50 lbs. \$11.00.)

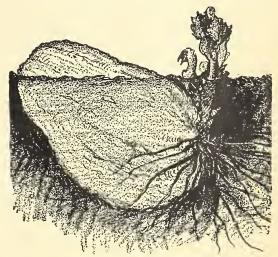

Golden Bantam A home garden variety that is highly desirable because of its flavor and sudesirable because of its flavor and sugar content. It is very early, dwarf in habit and a good yielder. By removing the suckers as they appear several ears may be produced on the main stalk. (Pkt. 10c) (l/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid. (25 lbs. \$6.50) (50 lbs. \$12.00.)

Country Gentleman A delicious sweet corn. The ears showy than the coarser varieties, but for private family use, where quality is preferred to size, it is excelled only by the Golden Bantam. The cob is very small, giving great depth to the kernels. The great merit of "Country Gentleman" is its fine quality. It matures in ten weeks. (Pkt. 10c) (1/2 lb. 20c) (1b. 35c) (10 lbs. \$3.00) prepaid. Not prepaid, (25 lbs. \$6.50)

Stowell's Evergreen If planted at the same time with earlier varieties and at intervals of two weeks until July 1st, it will keep the table supplied until November. It is hardy and productive, very tender and sugary, remaining a long time in a fresh condition. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs \$3.00) prepaid. Not prepaid, (25 lbs. \$6.50) (50 lbs. \$12.00.)

Black Mexican One of the best sweet corns for this very productive. (Pkt. 100) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) prepaid. Not prepaid, (25 lbs. \$6.50) (50 lbs. \$12.00.)

A & M Chayote

Chayote as it Should be Planted

Cultural Directions One fruit envelopes one seed, which sprouts from the large end. Plant where you intend it shall grow. Cover only the large end, leaving the small end exposed. (See picture.) Or let the fruit lie around until it has well sprouted, and then plant the seed, teaving the sprout well above ground. Water freely and do not be alarmed if frost should destroy it. A new shoot will soon appear. Give it abundance of water throughout the hot summer season.

The Chayote is no longer a novelty. It has now become an article of commerce. It may be found on sale at many grocery stores throughout the season, which lasts from October until March.

The vine is a rampant grower. The first year from seed it will grow twenty to thirty feet. Destroyed to the ground by frost, it soon sends out new growth, and during the second season will extend vines forty or fifty feet in every direction. During September it starts blooming, having a small, white, insignificant flower. Within four weeks the fruit is large enough for the table. One vine in two years if properly trellised will produce more than one thousand fruit. Orders shipped January, February and March only.

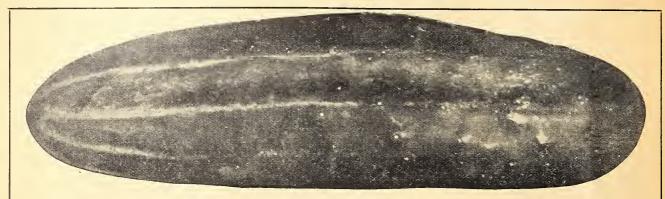

Each 50c postpald.

& M Cucumbers

CULTURE FOR HOT-BED-Make the frame eight feet wide and as long as is desired, using 12 in. boards. Select a place with good loamy soil on a sunny slope. Mix the soil almost half and half with horse manure. About February 1st sow liberally with seed, in hills three feet apart each way. Stretch wire over the frame across and lengthwise. Sew muslin in widths and lengths to cover frame. Arrange to roll the muslin on a stick as a curtain. Cover each evening, and open

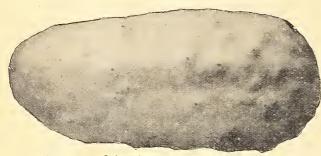

lin on a stick as a curtain. Cover each cooling, and each day.

FIELD CULTURE—Plant from March to October in hills 4 to 6 feet each way, 8 to 10 seeds to a hill. Cover an inch deep When danger of insects is past, thin out the plants, leaving 3 or 4 of the strongest in each hill. It is ready for the table in six weeks from planting seed. One ounce of seed will plant 50 hills; two pounds to the acre.

A & M Davis Perfect

This is the ideal cucumber. Long, slender, dark green, tender and crisp, around cucumber yet offered for the family garden, and the hot house. I plant this variety. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid. Do not hesitate to

Salad Cucumber

SALAD CUCUMBER

When we have a good thing and know it we believe in talking about it and recommending it until you begin to realize that it is really worth while. This is true of the Salad Cucumber. One of our own introductions and one of the finest cucumbers ever grown. It is now being sold on the market and we advise market gardeners to introduce it to their trade. It is a very mild cucumber and does not have the bitter or strong taste often found in other varieties. For the home gardener a few hills of Salad Cucumber will be one of the most interesting things in the garden and the crisp tasty cucumbers will provide a most delicious salad. The picture above shows the shape. The color is a bright, appetizing yellow. Try them and you will not be disappointed. (Pkt. 10c) (oz. 30c) (¼ lb. \$1.00) (1 lb. \$3.00) postpaid. not be disappointed. \$3.00) postpaid.

Chicago Pickling This is the variety that is grown seed has given the growers satisfactory results for years.

It is chosen because of its delicious quality and its shape, being one inch thick and three inches long when at pickling size. It is enormously prolific, bearing in clusters. We can recommend it for the home garden. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Japanese Climbing Cucumber This variety should be grown more extensively; it is equal to others in quality and can be grown more economically in a small garden by planting near a fence or trellis of any kind, and climbs by tendrils as a grape vine. Whether space is a factor or not, we recommend it. (Pkt. 10c) (0z. 20c) (1/4 lb. 65c) (lb. \$2.00) postpaid.

Lemon Cucumber Every one who has tried it is unant-think of omitting it from the spring garden. It is the color of a lemon when ready to use, and similar in shape, being less pointed at the ends.

There is nothing but approval for the Lemon Cucumber. It may now be found at almost any vegetable stand, and no home garden should be without it. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50) postpaid.

Everbearing Cucumber This variety is entirely discount of its close, bushy growth and everbearing character. The first cucumbers are ready very early and the vines continue to flower and produce fruit continually until late in the season, whether the ripe cucumbers are picked off or not, differing in this respect from all other varieties of cucumbers in cultivation. One of the old reliable varieties growing 10 to 12 inches long. The skin is dark green, the meat firm and crisp. Is used extensively for forcing, and early field growing. Our strain of seed produces a large percentage of uniform size and shape for packing and shipping. We recommend this to be planted in home gardens at all times, but especially in September. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (lb. \$2.00) postpaid.

A & M Klondike

Klondike

This cucumber has steadily grown into favor since we first offered it. It is the one variety that made carload shipments possible because it is firm, dark green color, and stays green until consumed; turns neither white nor yellow with age, but stays green. It is a desirable size, just 7 to 8 inches long, symmetrical in shape, and especially crisp and palatable. It is an excellent variety for pickling when young, as well as desirable for the market. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid.

Improved Long Green ten to twelve inches long, as favorite with home gardeners. Hotel trade like a long cucumber for slicing; this is ideal for such purpose. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid.

White Spine A popular, early variety for slicing. Very

White Spine A popular, early variety for slicing. Very prolific, crisp and excellent for pickling when young. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) post-

SMALL GHERKIN.

Gherkin This cucumber is the most delicious of all the cucumber family when properly pickled. It should be more extensively grown. Planted where it may climp on a trellis, one vine will cover a section of fence eight feet high and twelve feet wide, producing possibly a thousand or more of the delicious and oddly shapped gherkins. It should be planted to shade a window or back porch. (Pkt. 10c) (oz. 25c) (1/4 lb. 90c) postpaid. postpaid.

A & M Celery

Culture Sow one-half ounce of seed to 100 feet of drill; ¼ lb. per acre. Sow the seed from Jan. 1st to May 1st, in drills 6 inches apart, not too thick in the row to secure stalky plants. In June when the plants are strong, transplant to furrows three feet apart and six inches deep. Set the plants six inches apart in the furrows; as the plant grows fill the earth toward the plant to secure proper bleaching. Never allow dirt to rest on the heart of the plant. Never work in celery when it is wet with rain or dew. Spray frequently with Bordeaux.

celery when it is wet with rain or dew. Spray Irequency with Bordeaux.

Celery Rot—Do not allow water to stand during the heat of the day after irrigating. It will cause Celery Rot in the early crop.

Hollow Stem—When the growth is rank and the stalks so close that free ventilation of air is retarded during the hot weather, the stems become soft and hollow; therefore we recommend the single-row planting.

Market:—The local consumption and outlying distribution dis-

ommend the single-row planting.

Market:—The local consumption and outlying distribution disposes of a very large acreage, but owing to its erratic nature it requires a peculiar soil and professional culture. Therefore, there are few localities where it can be forced to earliness.

May, June and July celery brings a high price to the grower. Then there comes an oversupply until the shipper disposes of it. When a surplus exists cold storage is resorted to, with doubtful profit, on account of the perishable nature, the shrinkage and the expense.

A & M GOLDEN SELF BLANCHING We have two distinct strains of this seed, one being the standard height while the other is 8 to 10 inches taller. Please specify on your order which you want. This very fine strain of A & M Celery grows rapidly, the outer leaves are quite tall on the long tops, so that the grower may sometimes be inclined to market it before the We have two dis-nct strains of this

to market it before the heart is mature. Be careful about this and give it more time if necessary. If you are producing celery for

producing celery for the market see us about seed, for we have made a careful study of this particu-lar crop over a period

of years and can probably be of assistance to you. Long top or short top. (Pkt. 10c) (oz. \$1.50) (1/4 lb \$5.00) (1 lb. \$20.00) postpaid.

Golden Self Blanching California Grown Seed Another year has

Another year has demonstrated that our strain of California grown seed is equal to the imported in producing good celery. Every grower in Florida who tried our California grown seed has

ida who tried our Callfornia grown seed has ordered ever since in larger quantities. Our seed is now accepted by all who have used it as fully up to the imported. We offer it to you with our full recommendation. (Pkt. 10c) (oz. 80c) (1/4 lb. \$2.65) (lb. \$8.00) postpaid.

White Plume

French Grown Seed

A & M Golden Self Blanching French Grown

Smooth Prague

A large celery flavored root used extensively for flavoring soups, pickles, etc.; also relished as a salad. (Pkt. 10c) (oz. 35c) (1/4 lb. \$1.20) (lb. \$3.50) postpald.

A & M CHICORY

WITLOOF CHICORY.

Large Rooted

Large Rooted

Seed should be sown quite thinly in shallow drills early in the spring. When well started, thin out to stand two or three inches apart in the row and give good cultivation all summer. (Pkt. 10c) (oz. 40c) (1/4 lb. \$1.35) (lb. \$4.00) postpaid.

Witloof Sow the seed in deeply prepared ground during June, July and August. In December make trenches ten inches deep and twelve or fifteen inches wide. Set the roots three inches apart in rows eight inches apart, within the trench, so the tops of the roots are eight inches below the top of the trench. Then fill with a mixture of sand and humus, water thoroughly.

This is a most delicious

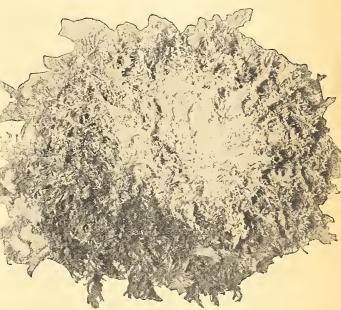

thoroughly. This is a most delicious salad. (Pkt. 10c) (oz. 40c) (1/4 lb. \$1.35) (lb. \$4.00) postpaid.

A & M ENDIVE

Culture
Same as for lettuce. Seed may be sown any time during the year. When plants are well started, thin out to ten inches apart or they may be transplanted. When plants have reached a good size, gather the leaves closely together and tie loosely in an upright bunch. This blanches the inner leaves in about ten days and adds to the crispness as as alad, as it renders the flavor mild and delicate. One ounce will sow 400 feet of row.

This plant furnishes an attractive and appetizing salad for the fall and winter months; by repeated sowings a supply may be had nearly all the year 'round.

Endive is now largely grown for the shipper. Its field culture is the same as for lettuce and it is sown about the same time. Sow 2 lbs. to the acre.

A & M Golden Heart Endive

Green Curled Golden Heart Leaves are finely giving the plants a rich, mossy appearance, which is greatly enhanced when the centers are nicely blanched.

This is the variety generally preferred because it blanches to a beautiful golden yellow. (Pkt. 10c) (oz. 20c) (1/4 lb. 70c) (lb. \$2.00) postpaid.

White Curled This beautiful variety does not need blanching to prepare it for use, the midribs being naturally of a pale, golden yellow, the finely curled leaves are almost white. (Pkt. 10c) (oz. 20c) (1/4 lb. 70c) (lb. \$2.00) postpaid.

Batavian or Escarol Forms large heads of broad, thick a salad or it will make excellent cooked greens, as well as being useful to flavor soups, stews, etc. (Pkt. 10c) (oz. 20c) (1/4 lb. 70c) (lb. \$2.00) postpaid.

A & M ECG PLANT

Culture The seed should be sown in a hotbed during December or January; it is slow to germinate and requires warm and even temperature. The plants should be ready to set out by April 1st, and may be planted as late as August 1st. Plant eighteen inches apart, Keep well watered and pick closely as soon as large enough. In very warm protected spots they will survive the winter. Even if the foliage is destroyed sprouts may appear the following spring from the stem bereath the soil and mature marketable fruit the following May. Egg plants require four to six months to mature. One-fourth pound of seed is sufficient to plant an acre.

Tree Egg Plant This variety is of medium size and extremely good shape, being particularly adapted to slicing, as there is no waste of material. It resists drouth and bad weather to a wonderful deveather to a wonderful degree, partly on account of its strong, upright growth. It bears its fruit sometimes one or two feet above the ground, thus escaping liability to rot. It is very satisfactory for the home garden. (Pkt. 102) (02. 75c) (1/4 lb. \$2.50) (1/2 lb. \$4.00) (lb. \$7.50) postpaid.

New York Improved

This variety has super-seded all others, both for market and home use. The large size and high quality of its fruit and its extreme pro-ductiveness make it the most profitable for the market gardener. It is spineless, which is a great advantage in shipping. (Pkt. 10c) (oz. 75c) (1/4 lb. \$2.50) (lb. \$7.50) postpaid.

Edible Gourd

Lately advertised as New Guinea Bean. Has been mon table vegetable in China from time immemorial. Has been a com-

All of us have curiosities and many persons have reported to us how "Good is this New Guinea Bean." We tried it and sure enough we found it even better than the most delicious

Recipe: Take fresh from the vine a young gourd about sixteen inches long and three inches in diameter or smaller, while the fuzzy growth is yet on. Cut into cubes about % inch, bring to a boil, pour off the water once or twice. Season well with pepper and salt, add butter. You will be surprised how good it is. (Pkt. 10c) (oz. 30c) (1/4 lb. 90c) postpaid.

New Guinea Butter Bean as an Arbor Plant Same as any Gourd

GOURD

Dishrag Gourd

CULTURE—Gourds are tender annuals, of trailing or climbing habit. The seed should not be planted until the ground is warm. Plant in hills and cultivate as cucumbers. Leave only two plants in a hill, and allow the vines to ramble or train over a trellis for shading windows.

Dish Rag Gourd
the gourd gives it its name. The fruit grows about one foot long. The interior fibre is serviceable for a variety of household purposes, being used as a dish cloth, or sponge. The fibre is tough, elastic and durable.

(Pkt. 10c)

Mock Orange A good old sort, the gourd often finding its way into the family sewing basket. A beautiful and rapid climber, quickly covering trellises. (Pkt. 10c)

Hercules Club

This often grows to a length of four feet. This is not the same as the New Guinea

Butter Bean which it resembles. (Pkt. 10c).

Dipper.—Bowl with long handle. (Pkt. 10c).

Bottle.—Bowl with short handle. (Pkt. 10c).

Pipe.—Often made into pipe for smoking tobacco.

Nest Egg.—(Pkt. 10c).

Mixed Gourds.—(Pkt. 10c).

Buy a packet of mixed Gourds.

Aromatic and Medicinal Herb Seeds

Aromatic and Medicinal Herb Seeds

Anise—Used as a cordial and for garnishing and flavoring
Seeds have an agreeable aromatic taste. (Pkt. 10c) (oz. 35c).

BasII—Sweet. The leaves are used for flavoring soups, stews
and highly seasoned dishes. (Pkt. 10c) (oz. 50c)

Borage—The leaves are used for flavoring and the flowers
furnish bee pasture. (Pkt. 10c) (oz. 50c)

Caraway—Grown for the seeds, which are used extensively
for flavoring of bread, pastry, etc. (Pkt. 10c) (oz. 25c)

Catnip or Catmint—The leaves are used for seasoning. It
also makes an excellent bee pasture. (Pkt. 10c)

ChervII—Used in soups and salads. (Pkt. 10c (oz. 15c)

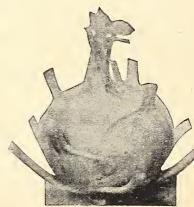

Corlander—The seeds are used in the manufacture of liquors
and confectionery. (Pkt. 10c) (oz. 25c)

DIII—The seeds have an aromatic odor and warm, pungent
taste. They are used as a condiment and also for pickling cucumbers. Pkt. 10c) (oz. 25c)

Fennell—Sweet. The boiled leaves are used in sauces. (Pkt.
10c) (oz. 30c)

cumbers. Fat. 10c, (cc. 10c)
Fennell—Sweet. The boiled leaves are used in sauces. (Pkt. 10c) (oz. 30c)
Lavender—Used chiefly in the manufacture of perfumery. (Pkt. 10c) (oz. 75c).
Marjoram—Sweet. The leaves and the ends of the shoots are esteemed for seasoning in summer and are also dried for winter use. (Pkt. 10c) (oz. 75c)
Rosemary—The aromatic leaves are used for seasoning. (Pkt. 10c) (oz. \$1.00)
Sage—The most extensively used of all herbs as a seasoning for dressing. (Pkt. 10c) (oz. 75c)
Sorrel—Used in soups and salads for its pleasing flavor. (Pkt. 10c) (oz. 35c).
Summer Savory—A hardy annual. The dried stems, leaves and flowers are evtensively used for flavoring—patricularly in dressings and soups. (Pkt. 10c) (oz. 75c.)
Saffron—Used for flavoring. (Pkt. 10c)
Thyme—Used for seasoning. (Pkt. 10c) (oz. \$1.00).

A & M KOHL RABBI

Kohl Rabbi

Culture

Seed may be sown every month in the year. Drill on ridges same as beets, Thin to three inches apart. An ounce of seed will produce 2,000 plants.

Early White

Vienna

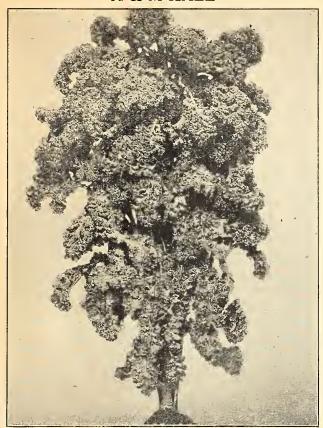

The earliest sort, very tender, excellent for table use. (Pkt. 10c) (oz. 30c) (1/4 lb. \$1.00) (lb. \$3.00) post-

Early Purple Vienna

Similar to above, but has flesh of purple color. (Pkt. 10c) (oz. 30c) (1/4 lb. \$1.00) (lb. \$3.00) postpald.

A conscientious, painstaking, seedsman is an educator and up-builder in his community.

A & M KALE

Tall Scotch Kale

Culture Seed should be sown thinly in drills, about the middle of June for the tall sorts; 2 lbs. seed for the acre; transplant the young plants 12 inches apart in rows three feet apart. Later in the season 12 inches apart may be sown rather thickly in drills to furnish small heads to be cooked like spinach. One ounce to 100 feet of drill.

Tall Scotch This makes a beautiful plant, 3 to 8 feet tall. The crinkled leaves resemble parsley, but they are much larger. An excellent table variety. (Pkt. 10c) (oz. 25c) (1/4 lb, 65c) (lb. \$2.00) postpaid.

Jersey or Thousand Headed

The large smooth leaves may be cut or broken off when they are full grown and they will soon be replaced with new ones. Ninety to one hundred pounds of green feed per week may be cut from fifty plants if they are well cared for. We furnish seed to many large poultry colonies and can supply it in large quantities. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Siberian We believe this to be superior to other varieties because it grows more greens for poultry, and is of better flavor for the table. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Packet Seeds That Grow

Look for this case. If your dealer does not carry Aggeler & Musser Seed Co.'s packet seeds request him to get them, because we do not put our seeds out on commission. A & M packet seeds are the best obtainable. They are the same high quality as our bulk seeds and quantities are regulated entirely by quality. Another important thing is that our packets are never put up until new crop seed is harvested. You are sure to get fresh seeds when you buy them from the AGGELER & MUSSER SEED CO.'S CASE.

Success is more certain if the seed be selected to suit the soil, season and purpose. This catalog will help you make the proper selection.

A & M Mustard

Yellow Seeded The seed is used extensively for spicing, pickling and other culinary and medicinal purposes. The young plants make delicious greens. (Pkt. 10c) (oz. 20c) (lb. 50c) postpaid.

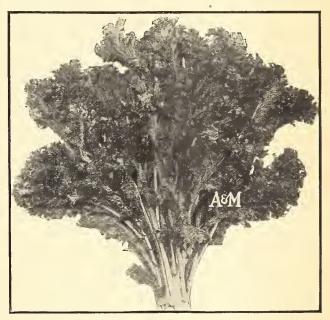

Southern Giant The true curled-leaf variety so popular in the South for planting in the fall. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Ostrich Plume

Is delicious as well as ornamental; the leaves resemble ostrich plumes, hence (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Chinese White This is a delicious vegetable and savors pungent than the American varieties. It is greatly relished by the Orientals, and can be seen all the year 'round at vegetable stands kept by the Japanese and Chinese. (Pkt. 10c) (oz. 40o) (1/4 lb. \$1.35) (lb. \$4.00) postpaid.

Chinese Green This is an Oriental vegetable, and like year 'round, but like our American Spinach, thrives best in the winter season, (Pkt. 10c) (oz. 40c) (1/4 lb. \$1.35) (lb. \$4.00) postpaid.

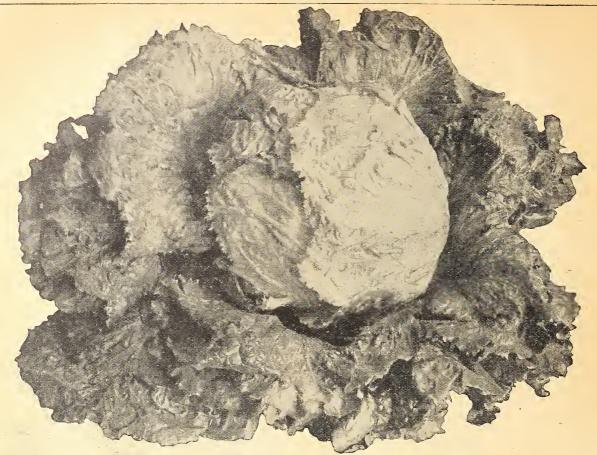

A & M Southern Giant Mustard

Leek

A & M Leek We believe in having the best of everything. With this idea always before us, we have secured this fancy strain of leek. It is large, white, tender and mild—the best in the world. Its mild, delicate flavor makes a delightful addition to lettuce salad. (Pkt. 10c) (oz. 35c) (1/4 lb. \$1.15) (lb. \$3.50) postpaid.

A & M Los Angeles Market Lettuce

A & M Lettuce

Culture

At the time of sowing the soil should be in finest possible condition, well pulverized. The plants should be grown on ridges 14 to 18 inches wide, 4 to 6 inches high and in double rows 10 to 15 inches apart. The water should be run between the ridges and not permitted to flow over the tops as this cakes the soil. Water should never be allowed to cover the plants. There should always be an adequate amount of moisture in the soil from the time the plants have commenced to head until they have matured. The hoeings necessary on raised beds will vary from one to three times. The earth around the plants should not be allowed to harden. Drill 2 lbs. of seed per acre for double rows and thin plants to 10 inches when about one inch high.

Los Angeles Market Lettue We introduced this market gardeners' trade in 1904 and in 1906 we shipped the first crate of lettuce which ever left California. This arrived in Philadelphia in satisfactory condition and was the beginning of the great lettuce shipping industry. Los Angeles Market has now become the leading variety, thousands of carloads being shipped each year, and growers and distributors have learned to depend upon the A & M strain for the best shipping type. Every pound of A & M Los Angeles Lettuce seed is from fields that have been carefully inspected for type, and our crops are otherwise given personal attention. It is one of the largest and most solid heading varieties in existence, often weighing 2½ and 3 pounds to the head, and always a prizewinner.

During the past few years there has been an insistent demand for us to put up our strain in sealed bags, and we are now offering specially branded and sealed bags of our now famous strain of A & M Los Angeles Market Lettuce for your protection as well as ours. (Pkt. 10c) (oz. 25c) (½ lb. 85c) (lb. \$2.50) (5 lbs. \$11.50) (10 lbs. \$21.00) postpaid.

Iceberg This is next to Los Angeles Market as the heading of course it is better during the winter months, but not so solid as the Los Angeles Market, which is strictly a winter variety, while the Iceberg is a good all-season lettuce. and hundreds of carloads of Iceberg are being shipped when the other is not available. Iceberg Lettuce planted later than March 1st should be grown on dark, heavy soil, because if grown on light, sandy soil, the heat of the sun reflected from the sand on the under side of the leaves causes them to burn almost to the heart.

The light green, curled, red-tinged leaves of the Iceberg form heads as large as the Los Angeles Market, but not so solid, but it is as tender and crisp, and is of excellent flavor. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (lb. \$2.00) postpaid.

Early Curled Simpson This is a very popular va-The leaves are large, thin, very tender and of a very good quality. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Hanson Without exception this is the best variety for late spring and mid-summer crop. Prof. F. W. Mally, Farm Demonstrator of Webb County, Texas, discovered Hanson Lettuce to be resistant to both heat and disease, and particularly resistant to eel worm which is often prevalent where least expected. Hanson Lettuce is similar to the loeper Lettuce, except that it has not the tinge of red. We recommend it for the home garden. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (lb. \$2.00) postpald.

Big Boston

Very large, smooth-leaved, solid-heading variety grown extensively throughout the east and south. It is congential to all climates, and is a good shipper. In flavor it probably excels all other smooth-leaved varieties, An excellent all year round lettuce. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (1b. \$2.50) postpaid.

Grand Rapids Similar to Early Curled Simpson. The luxuriant growth makes it a desirable variety for the poultryman. It is also an excellent variety for the table and good all the year. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpald.

Chicken Lettuce

This variety of lettuce should not be confused with the regular heading or loose-leaved varieties. The plant grows very much like kale, to a height of four to five feet, with much growth of leaf. It is used mainly for chicken and rabit feeding. It does not head and is seldom if ever used for table purposes. The wonderful leaf growth makes it ideal for green food for chickens, etc. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Paris White Cos (Romaine)

Paris White Cos

(Romaine)

This might well be spoken of as the "Aristocrat" for the reason it is used almost exclusively at aristocratic clubs and hotels for salads, because it is crisp and has a delicious nutty flavor. flavor.

Gardeners would profit to give more attention to this variety. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (lb. \$2.00) postpaid.

Amco

The Amco Hotkap Paper Plant Cover is strictly a California product and is the most convenient and sure way of protecting plants from early spring frost. Great fields of tender vegetable plants are covered each spring in California and the Amco Hotkap, because of the convenience of setting, has become the most popular among the thousands of growers in It is so con-California. structed that the wind cannot blow it away because the machine places dirt

around the edges to hold it down. They are already folded, ready for use. One man can do the work of four. After setting the field looks uniform, like a well kept garden. Amoo Hotkaps are made from a transparent wax paper which admits light to the plant, but still protects it from frost. When the plants have grown to good size and it may still be too early to remove the Kap, the top may be split and it will still remain as a protection, but will give the plant additional light, air and room.

Eastern vegetable growers have become quite enthusiastic over the Amco Hotkap and during the past year we shipped many thousands of them to eastern States. For large growers who might need them in very large quantities it would be well to place orders some-

The size of the Amco Hotkaps is 11 inches in diameter at the base. Prices are f. o. b. Los Angeles, and postage should be sent if they are wanted by mail.

11 inch size Amco Hotkaps, packed 1,000 in bundle, shipping weight 26 lbs.

Prices f. o. b. Los Angeles. Send postage extra if wanted by mail.

COLLECTION B. E. 50c POSTPAID A & M "Best Ever" Melons

Plant this splendid collection of melons and have varieties for all purposes. 1 packet each of A & M Klondike, A & M Black Seeded Angeleno, A & M Black Seeded Chilian, A & M Tip Top Musk Melon, A & M Honey Dew, A & M Persian and A & M Golden Beauty Casaba. 50c postpaid.

GROW YOUR OWN PLANTS

Because of the danger of introducing new soil pests or fungus into your soil, you should grow your own plants. Tomatoes, peppers, egg plant, in fact all vegetable and flowering plants may be grown very easily in small boxes or beds and transplanting directly from these will be found more satisfactory than to have plants delivered or sent by mail. In addition to this you have a greater choice of varieties and when the seed is purchased from a reliable source you are assured of better vegetables and better flowers. In planting flower seed, a light covering of well decayed barnyard fertilizer or leaf mould should be used as a covering for the seed and the seed should not be covered to a greater depth than twice or three times the diameter of the seed itself. Placing a burlap bag on the top of the seed bed or box, laying it flat on the surface and watering through it will assist in holding moisture and better germination will result. The burlap should be removed when the seed begins to germinate and the soil kept thoroughly moist at all times.

& M Muskmelons

Culture The soil must be thoroughly soaked down to subenough plow ten or twelve inches deep. Thoroughly pulverize
the soil. Make furrows eight to ten inches deep. Plant from
February 15th to June 15th in furrows six feet apart. In the
Imperial Valley, seed is sown under paper covers or other protection in December.

As the plant grows gather the soil around it until the roots are twelve inches or more below the surface. Thin out all surplus plants as soon as tney are hardy and well established. The rows are now straight and an equal distance apart. This makes it easy to cultivate close to the hills, both lengthwise and crosswise. Cultivate deeply as long as there is no danger of disturbing the roots. Be always mindful that the roots are as long as the vine, therefore when working close to the hills and among the vines, let the hoeing or cultivating be shallow. Always cultivate the irrigation furrow as soon as the soil

is dry enough to mulch nicely.

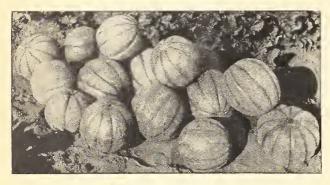

If this rule is intelligently adhered to your vines will never suffer from drouth, or root blight, and will be healthler in every way, because the roots are deep down in the cool, moist earth unaffected by the heat of the sun. This is the secret of success with all midsummer crops.

Rocky Ford
This is an improved Netted Gem, oblong, slightly ribbed, heavily netted, having reen flesh of excellent flavor. A very early small melon.

(Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Hearts of Gold

It is a splendid shipping variety and is increasing in use. The melons are oval to oblong in shape and are a little larger than the Rockyford variety. While it is a ribbed melon the ribs are not prominent and the melon is very heavily netted. The flesh is a rich orange color, fine grained and of excellent flavor. The seed cavity is small. It does not turn yellow when ripe but retains its natural green color and remains solid and firm for days after it is picked from the vine. The vines are very strong growers and are rarely effected by rust. Hearts of Gold might be considered one of the leading commercial varieties in California for shipping purposes and we strongly recommend it be given a thorough trial. (Pkt. 10c) (oz. 20c) (1/4 lb. 55c) (lb. \$2.00) postpaid.

A & M Tip Top

A & M Tip Top This popular muskmelon is another triumph for Aggeler and Musser Seed Company because of our effort years ago to introduce it. The gardener was slow to accept it, but knowing its merits we persisted in offering it. It is now the most popular muskmelon grown for the local market. We have the right strain as you can see in the picture. The yellow flesh is edible to the rind. The melon is of medium size. Our seed is pure. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid.

The Famous Indiana This melon has a rich yellow flesh and a flavor that may be

compared with the Persian.

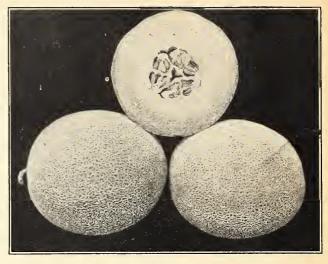

It is heavily netted, very thick meated and holds up in good condition for several days. (Pkt. 10c) (oz. 30c) (1/4 lb. \$1.00) (lb. \$3.00) postpaid.

Improved Burrell's Gem
one of the biggest yielders. The shipper calls for it because it is solid and carries well in transit. The consumer wants it because of its excellent flavor. The growers all want our seed because we have the best strain. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpald.

Gautier Pineapple It is medium to large size, heavily netted, green fleshed with excellent

flavor; solid and a good carrier.

We have the true type and recommend it to melon growers that they may again get the Old Original Pineapple Muskmeion. (Pkt. 10c) (oz. 20c) (1/4 lb, 60c) (lb, \$1.75) postpald.

Edward's Perfecto

Edwards Perfecto
This is a new and very promising type of the Rocky Ford. Growing and shipping trials of these during the past season proved very satisfactory and there is reason to believe that it will become a most popular shipping and marketing variety. The seed cavity is triangular and small; the flesh being extremely thick, sweet and spicy; the meat is pink. Melons are almost perfectly round, heavily netted, no ribs and the shipping qualities are splendid. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (lb. \$2.00) postpaid.

Whites Favorite

business as quickly as did Famous Indiana.

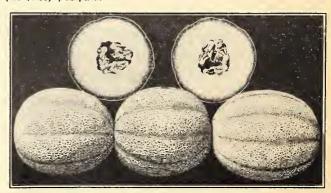

The flesh is white without fibre. It melts away like the flesh of the Hybrid Casaba and is as sweet. The rind is creamy yellow, scantily netted but with large ridges. No muskmelon is so prolific. It is ideal for the home garden or to grow for a roadside market. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.75) Postpaid.

A & M Honey Dew This melon has won its way into favor wholly because of its excellent flavor and good keeping qualities. It is enormously prolific. It is ready to pull when the green luster has changed toward a creamy yellow. It is not ready to be eaten until like the Casaba, you can make an impression with the thumb as in a mellow apple.

The average size is about the same of the control of of the contro

The average size is about as large as a cocoanut, but the smaller sized melons are not inferior in flavor. Every melon is a good one. Flesh is light green and sweet as honey. The rind is light green or silvery-gray in color, smooth as an egg and hard as the rind of a winter squash. It is therefore a good shipper. (Pkt. 10c) (oz. 25c) (1/4 lb. 75c) (lb. \$2.25) postpaid.

Hale's Best An extra early salmon tint of remarkable flative salmon tinted flesh is firm. Melons are oblong, well netted and very attractive. It is ten days to two weeks earlier than other shipping varieties and yields wonderfully well. Quite a few of them are being planted in the Imperial Valley for shipping purposes. Our strain of seeds is regular A & M quality from carefully rogued fields (Pkt. 10c) (oz. 30c) (1/4 lb. \$1.00) (lb. \$3.00) postpaid.

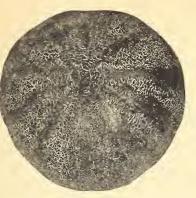

Hale's Best

Melons—Continued

Turkish Melon

This is one of the excellent melons brought to California by the Armenians. Its flavor is equal to the Persian melon. It has yellow flesh and resembles the Persian melon in every way except that it shows on the rind a faint stripe and is without the heavy netting. Do not hesitate to order it for it is just as good as the Persian for the home garden or nearby market. (Pkt. 10c) (0z. 30c) (1/4 lb. \$1.00) (lb. \$3.00) postpaid.

Turkish Melon

Nicholson's Honey Ball This Melon has become bles in appearance the Honey Dew and the flavor is blended with the popular Texas Cannonball. The Honey Ball is a cross between the two. It is a good long distance shipper and may supercede the popular Rocky Ford Melon. Average weight is 4 lbs. (Pkt. 10c) (oz. 30c) (1/4 lb. \$1.00) (lb. \$3.00) postpaid.

Gold Lined Netted Rock

This is the Rockyford with the tinge of yellow around the seed cavity bred up to the highest state of perfection from the rust-resistant strain. The heavy netting forms a rind so hard that it will ship to the far Eastern markets with practically no deterioration. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid.

Thank You Florida

"We shall continue to plant your Los Angeles Market Lettuce. We had wonderful success with it last spring. None better than A & M Los Angeles Market."

Lake Monroe, Florida.

A & M Pollock 10-25

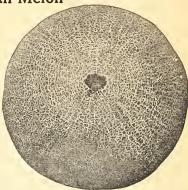

Pollock 10-25 This is the latest improved strain of the popular Rocky Ford. It eliminates every defect of all other strains. Perfect in size, shape, netting, flavor, and long keeping and good shipping qualities. Our seed is pure. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) post-pald.

Irondequoit This excellent melon originated in Irondequoit, New York; hence its name. It is as popular in New York City as the Tip-top is in Los Angeles. We sent to Irondequoit and purchased some pedigreed seed from the original introducer and now offer you the pure strain.

This melon may well be called the Improved Tip-top, for that is what it is. The appearance is similar except the netting which is heavier; it is more solid and less prone to split. The average size is slightly larger; the flesh is yellow and the flavor unsurpassed. It is an ideal melon for the peddler or the cafeteria. It is neither too large nor too small. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50) postpald.

A & M Persian Melon

Culture the same as for muskmelons. Large, extremely netted, without ridges, thick yellow flesh of delightful flavor. A good keeper and a good shipper, It should be picked while yet quite solid. Customers should be educated to purchase half a dozen at a time and set them away to be eaten as they become mellow like a Casaba. When properly picked they are ready for the table within six to ten days. (Pkt. 10c) (oz. 50c) (1/4 lb. \$1.65) (lb. \$5.00) postpaid.

A & M Persian

A & M Casabas

Culture In general the culture for Casabas is the same as your locality, from February 15th until June 15th, in furrows 8 feet apart. For late shipping many are planted from June 1st to July 15th.

Casabas may be taken from the vine as soon as they lose the green lustre, but should not be eaten until the hard rind of such varieties as the Pineapple and Golden Beauty will give slightly under pressure of the thumb. The Improved Hybrid in particular is not at its best until quite an impression can be made with the thumb as in a mellow apple. The best way to keep the Casaba late into the Fall is to gather them together in the hill, leaving them attached to the vines and covering them completely with the vines. They should be planted about 8 feet apart each way and it requires about one pound of seed for an acre.

Golden Beauty Introduced by us in 1906, it at once became popular locally. It is now grown more extensively throughout California than any other casaba because of its beautiful appearance, and delicious flavor. Distributors also prefer it as it stands up well after long journeys in carload shipments. Where a melon is required for fall or late consumption this variety is planted more than any other. It is the casaba that added much to the fame of California, as well as adding a million dollars each year to the wealth of the state. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (lb. \$2.00) postpaid.

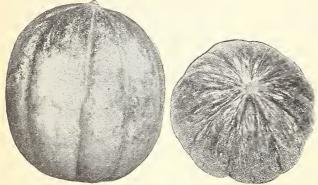

Golden Beauty

Casabas-Continued

Winter Pineapple This is the first of Casabas introduced into America. We have carefully maintained the purity of type so that it is now just as distinct as when introduced more than forty years ago. This and the Golden Beauty are identical in all except color, which when mature is light green. The Winter Pineapple is more profitable as a late melon, therefore we recommend to growers near the Coast that it be planted during June. Our type of Winter Pineapple is round, selected for its good shipping qualities. (Pkt. 10c) (oz. 20c) (1/4 lb. 70c) (lb. \$2.00) postpaid.

Golden Hybrid Just as the green Pineapple Casaba changed to the bright yellow Golden Beauty, so did the large green Hybrid Casaba change to the Golden Hybrid which we introduced in 1917. At that time we stated that it would in a few years supersede the Green Hybrid.

It is no longer necessary to give special recommendation to the Golden Hybrid—it is now established as one of the best sellers. (Pkt. 10c) (oz. 35c) (1/4 lb. \$100) (lb. \$3.00) postpaid.

A & M Hybrid

A & M Hybrid This is a cross between the Winter Pineapple and the Montreal Muskmelon. It grows to a very large size and is of delicious flavor. It is a rampart grower and yields enormously; as many as seventeen large melons were taken from one vine. It is profitable early and late. This melon is now grown as extensively for a midsummer crop as the muskmelon, and finds a ready sale. Plant from March 1st until July 15th. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50) postpaid.

Yellow Fleshed Honey Dew When the Honey duced it quickly became popular. One would not believe another melon could be better, but the Honey Dew hybridized with the Tip Top produced a melon of the same outside appearance as the Honey Dew but with a deep yellow flesh that is positively more delicious. Do not hesitate to plant it if for the home garden or for shipping. (Pkt. 10c) (oz. 30c) (1/4 lb. \$1.00) (lb. \$3.00) postpaid.

Santa Claus

Santa Claus

As the name implies, this variety is recommended of for planting in June or July for gathering in the fall and holding for consumption in December and January. It is a fairly good keeper when stored in a cool ventilated place and care being taken that the fruits do not touch one another. It is a de-

lightful present to send to your Eastern friends at Christmas. It is of delicious flavor, beautiful in its mottled gold and black coloring. We advise that it be grown more extensively for the local trade. (Pkt. 10c) (oz. 25c) (1/4 lb. 80c) (lb. \$2.50) postpaid.

A & M Watermelons

We grow every pound of our Watermelon Seed and field rogueing is conducted under the most stringent rules. One percent off type melons in the seed field will mean ten percent off type for the grower; therefore, we are careful to take out every vine that is producing melons the least bit off in shape, color, or size. Search where you will, you will find no better melon seeds than we offer. In fact we probably supply the most critical trade in the country—the large growers of the Imperial Valley and other watermelon producing sections of the great southwest, where melons are produced for shipment to outside territory.

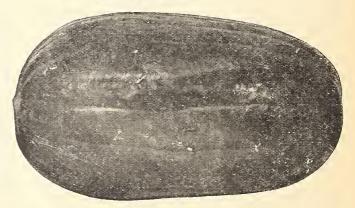

Culture

Generally speaking, the same cultural directions for musk melons apply also to watermelons. Plant the seed in furrows, dropping ten seeds every eight or ten feet apart; cover about one inch. The furrows should be eight feet apart. When the plants are established, thin out, leaving two vines to the hill. Plant 1 to 1½ lbs, of seed to the acre.

A & M Klondike Watermelon

THE GENUINE STRAIN—A & M Klondike Watermelon is without doubt the most popular melon in the State of California. We introduced the Klondike in 1909 and naturally we are very proud of its present reputation. The Imperial Valley alone grows several thousand acres of them for shipment to outside territory and they are always the first melon to arrive on the Los Angeles market. The meat is a rich, bright red and very appetizing. Vendors along the boulevards always cut a Klondike when they wish to attract customers. The rind is thick enough to protect the melon in shipping and yet it is not a thick, heavy rind like many varieties. If you are planting for market or for home consumption you will not go wrong by planting the Klondike. The genuine A & M strain is put up in sealed bags for your protection. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (1 lb. \$2.50) (5 lbs. \$11.00) (10 lbs. \$20.00) postpaid.

Excel To the grower and shipper who wants a large melon the Excel fills the bill. It is oblong, dark green with a suspicion of a stripe, and will average 35 lbs. and is of excellent flavor. It is a good shipper and has maintained its popularity for many years. Our seed is from our own growing and is true to type. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

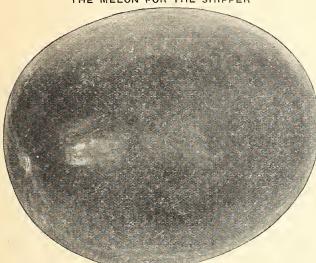

A & M Klondike Watermelon

Kleckley Sweet

This is an excellent melon either for the home garden or for shipping. It is of medium size, a very green rind, with deep red flesh of delicious flavor. Kleckley's is planted quite extensively in the Salt River Valley of Arizona and other southern districts. (Pkt. 10c) (oz. 20c) (1/4 lb. 40c) (lb. \$1.25) postpaid.

A & M Watermelons—Continued

ANGELENO THE MELON FOR THE SHIPPER

A & M Black-seeded Angeleno

Black Seeded Angeleno This is another triumph for Aggeler and Musser Seed Company. The original Angeleno had white seed. The cafeteria managers said their trade required a black seeded melon because they knew that when the seed was black the melon was ripe.

We hybridized the Angeleno with Black Seeded Chilian and got the desired results the first season. It required but two years more to perfect the type. The flavor was also improved. It at once became a favorite with shippers.

As a shipper it is extraordinary because it rarely breaks, even supporting the weight of a man weighing 170 pounds. A carload will average in weight from 25 to 30 pounds to the melon.

It is like the original Angeleno in shape and appearance except the stripe of the Chilian is sometimes apparent. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) (5 lbs. \$6.50) (10 lbs. \$11.50) postpaid.

White Seeded Angeleno
melons—its large size, beautiful dark green rind with a tinge
of gold showing through the green. No other variety compares with the Angeleno in its bright red flesh, red to the
rind, and entirely free from fibre, simply melts. If the picker
will observe the gold showing through the green as soon as it
is ripe, he need never pick an unripe melon. The seed of
white secded Angeleno very often splits, therefore, it is well
to soak the seed in water an hour or two before planting.
This will cause the seed to close up and prevent danger of
soil getting into the seed shell and causing decay.
(Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (1b. \$1.50) (5 lbs. \$6.50)
(10 lbs. \$11.50.) (Pkt. 10c) (oz (10 lbs. \$11.50.)

Tom Watson has for several seasons been the most popular melon in the South. Its shape is similar to the Kleckley Sweet, but the color is a lighter green. Its great merit is in its earliness, good flavor, thin rind, and good keeping qualities, making it one of the best of shippers. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) post-

Florida Favorite

Rearliness, and all round good qualities as a good shipper. In appearance it is similar to the Rattlesnake, the rind being considerably darker. (Pkt. 10c) (oz. 20c) (1/4 lb. 40c) (lb. \$1.25), nostpand. \$1.25) postpaid.

SEGMENT CORN PLANTER

Growers who are planting a large acreage of melons will find this Planter will do the work in good time and do it well, It is especially good for replanting. Weight 5 lbs. Price \$2.00 by express. If wanted by mail, add postage.

Rattlesnake

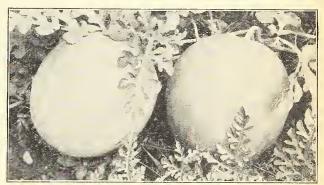

Has long been a popular melon with shippers. It is a long melon, having a white rind, with dark green stripes. Flesh of excellent flavor. (Pkt. 10c) (oz. 20c) (1/4 lb. 40c) (lb. \$1.25) postpald.

Yellow-Fleshed Ice Cream
This melon grows a very large size, is long in shape and the rind an even dark green. In quality it is simply delicious, sugary and of a rich flavor peculiar to itself. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Black Seeded Chilian Most every Californian knows the Chilian Melon and those who do not know it in California or elsewhere have missed a real treat in melons. Its thin rind and delicious flavor make it one of the best home garden varieties. Our strain of seed produces a good shipping melon and one that is a favorite not only with the grower but with the dealer. It is very prolific and a most desirable size for market. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

White Seeded Chilian
except to those who prefer the black seeded variety,
except to those who prefer the black seed. All Chilians are
good regardless of the color of the seed, but the black seeded
one is planted for the early crop. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Winter Melon This melon is slowly but surely forcationary good qualities which are not apparent at first acquaintance. The flavor when cold is sweet, crisp and surprisingly delicious, and when you have finished you realize that you have eaten a melon as entirely distinct from a water melon, as the Casaba is apart from the Cantaloupe and just as delicious. Like the Casaba it should not be eaten right off the vine, but be allowed to lie around until the first signs of decay. It decays slowly like an apple, not like other watermelons. (Pkt. 10c) (oz. 35c) (1/4 lb. \$1.00) (lb. \$3.00) postpaid.

A & M Winter Melon, also King and Queen

Citron Large Green Striped Weighs from thirty than pumpkin for stock. Allowed to lay in field or piled in the barnyard will not be damaged by frost nor decay until the following summer. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpald.

Preserving Citron Red This melon with a proper portion of lemon makes an excellent preserve that is as good as marmalade. (Pkt. 10c) (oz. 20c) (1/4 lb. 40c) (lb. \$1.25) post-

If you have any soil too sandy to grow the usual crops, plant the large green striped citron, you will be sure of a big crop.

FOR ALL KINDS OF MELONS

FOR APHIS—First keep the vines hardy by deep planting and proper cultivation, irrigation and fertilizing. Then if the aphis appears, which is unlikely, spray with Nico-Dust, or bury the affected part with dust. Either way is a constant fight. Lady hugs in some instances are destroying the aphis very satisfactorily.

FOR MELON BLIGHT that is caused by a fungus at the root, spray the hill freely with Bordeaux so that the liquid will follow the stem several inches beneath the surface. This should be done as a precaution rather than as a remedy.

READ THIS. If you would prolong the life of your vines, make a path between the rows by training the vines to grow along the rows and not across from one row to the other.

For a good yield of melons grow a crop of Melilotus indica during the winter. Plow under during February; broadcast two sacks of each of Toro Sulphur and lime. This is a pre-caution against blight and will fertilize your field as nothing else will do.

Onions

Culture.—No crop is so liable to variations by cultivation and soil as the onion. Having rich soil with too much irrigation will produce thick-necked scallions, while the same soil, well drained, would produce the finest onions. A sandy loam well fertilized is best.

No vegetable is so sensitive to variations of climate as the onion. It is of utmost importance that the right variety is selected for each month in the year, and for your particular climatic conditions.

Irrigate in the furrow between the ridges to avoid flooding the onion, which causes the onion to rot readily, rendering it unfit to ship or to keep.

Two pounds of seed are required to plant one acre for dry mature onions. One ounce will plant one hundred feet of row. For bunching onions, plant one-fourth pound of seed to 100 feet of row or 10 lbs. per acre.

We claim our onion seed to be the highest type as to germination and purity. When you wish to plant onions consult us as to when, how and what variety to plant.

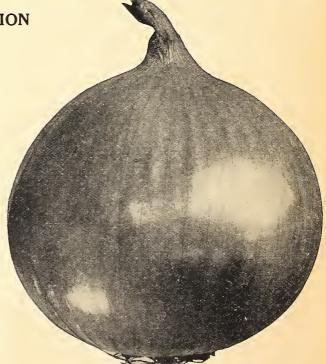

A & M Riverside Sweet Spanish Onion Seed Field

A & M RIVERSIDE SWEET SPANISH ONION Now Planted From Coast to Coast. A Sensation Wherever It Is Grown.

A & M Riverside Sweet Spanish Onion is a separate and distinct strain of the original imported sweet Spanish onion and was developed by us a few years ago. By careful plant selection we have each year improved the type until the A & M Riverside Sweet Spanish Onion is recognized by best authorities as superior to all other strains in flavor, mildness, good keeping qualities and yield per acre. This onion is very popular and commands the highest market price.

It is a large, well shaped brown onion weighing from 1 to 3 pounds. It is unusually mild but still retains its genuine onion flavor. Planted at the proper time and thoroughly cured it is a good keeper and will ship as good as any other shipping onion. It requires about 3 pounds of seed to plant one acre, if planting is made directly in the field, this being the system mostly used in California. Planting in the seed bed for transplanting requires about 1½ pounds of seed per acre. In irrigated districts plant in double rows on ridges, having the rows on the ridges about 8 inches apart and 24 inches between the double rows. The size of the onion can be regulated by the distance between onions and the closer they are together the smaller will be the onion. To produce the larger size they should be thinned to 6 or 8 inches between plants. It is important to keep a uniform moisture content in the soil and to keep them growing continuously from the time they are up until harvested. Drying off from lack of moisture may start new buds and may result in splits or goose-necks. Reported yields are from 50,000 pounds to more than 100,000 pounds per acre. Packed in specially branded and sealed bags. (Pkt. 10c) (oz. 60c) (1/4 lb. \$2.00) (1 lb. \$6.00) postpaid. No onion sets of this variety.

& M Riverside Sweet Spanish

A & M Onions-Continued

A & M White Sweet Spanish

A & M WHITE SWEET SPANISH ONION

In flavor, uniformity and mildness this new onion is just as good as the now famous A & M Riverside Sweet Spanish. It is a good keeper, good shipper and the pure white skin is of course most desirable. Many letters of recommendation have come to us from all parts of the country indicating that it may be successfully grown in any soil where other onions are being produced. Many growers and dealers are trying to imitate the A & M Riverside Sweet Spanish and the A & M White Sweet Spanish and we have found in many cases where growers have been disappointed in their crops because the seed they planted was not the true variety. These two onions are genuine A & M introductions and they are not some other variety renamed. The seed crops are grown under our personal supervision so that we are in a position to furnish true type stock without any danger of mixture. For your protection as well as ours, the seed of these is packed in specially printed and sealed bags. (Pkt. 15c) (oz. 75c) (1/4 lb. \$2.50) (lb. \$7.50) postpaid

Southport White Globe There is an increasing demand for white onions and this variety is very popular being used extensively for shipping purposes. It is a good keeper, either in the field or in cold storage. It is silvery white in color, globe shaped, and of delicious flavor. (Pkt. 10c) (oz. 45c) (1/4 lb. \$1.50) (lb. \$4.50).

The proper way to grow Onions is on ridges

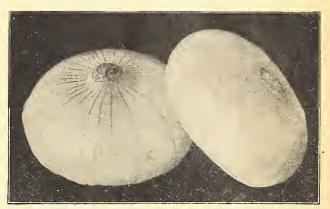

Crystal Wax

The Crystal Wax is a medium sized pure waxy white onion and is one of the mildest sorts grown. The seed of this variety is generally sown in seed beds and the plants transplanted to the field when they are five or six inches high. Planted the latter part of September, they mature in March and April and usually bring the highest market price. It is grown extensively in Southern California and Texas. (Pkt. 10c) (oz. 60c) (1/4 lb. \$2.00) (lb. \$6.00) postpaid.

Yellow Bermuda This variety goes hand in hand with the Crystal Wax and should be given the same culture. It is about the same size as the Crystal Wax but is a yellow straw color and is slightly better for shipping over long distances. Our seed is a heavy producer and there will be very few off colored onions. (Pkt. 10c) (oz. 40c) (1/4 lb. \$1.35) (lb. \$4.00) postpaid.

White Portugal, or Silverskin A good second onion to follow the Extra Early White Queen. It should be planted any time from November 1st until April 1st. It is a good keeper and desired for shipping. It has long been a favorite, and probably no other variety is more generally popular with growers throughout the United States. Under good cultivation the average diameter is from four to six inches. The thick skin is a clear silvery white, flesh snowwhite, sweet and tender. (Pkt. 10c) (oz. 40c) (1/4 lb. \$1.35) (lb. \$4.00) postpaid.

Australian Brown Quick to mature; a good keeper; solid and heavy; an excellent onlon for shipping. The skin is a light brown. Its solidity gives it great weight and a sack weighs several pounds heavier than a sack of many other kinds. The onions are thin-necked and ripen very early in all soils. As the plant makes a very quick growth it matures the bulbs before the hot, dry summer weather sets in, and this in connection with the exceptional keeping qualities makes it a most profitable variety. (Pkt. 10c) (oz. 20c) (1/4 lb. 70c) (lb. \$2.00) postpaid.

Extra Early White Queen

Extra Early White Queen This is one of the best onions to plant for early production in Southern California. Planted during August and September it attains marketable size in March and April and is sold on the local market as early as the Bermuda. Local growers market them while quite young, cutting the top off close to the onion. They harvest only what can be sold from day to day. This practice is very profitable for the reason you are selling a green onion at the price of the early dry onion. (Pkt. 10c) (oz. 40c) (1/4 lb. \$1.35) (lb. \$4.00) postpaid.

Yellow Globe Danvers This onion is the standard markets. The shape is almost globe form and the bulbs are quite large with thin necks. The skin is a straw yellow, while the flesh is pure white, solid and of good quality. Its earliness makes it valuable for market. The crop is very uniform and ripens at one time. (Pkt. 10c) (oz. 30c) (1/4 lb. 90c) (lb. \$2.75) postpaid.

Red Wethersfield Probably the most popular red onion, and the one grown more largely throughout the United States than any other. It is a large medium flat onion of excellent mild flavor. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50) postpaid.

The Italian Red Bottle Onion is as popular in some sections of Northern California as is the Sweet Spanish Onion in Southern California. It grows as large, weighing 3 to 4 pounds and has a similar sweet non-nurgent flavor.

whether you grow for the local market or in the home garden, you will make no mistake to plant this onion. Any consumer who once having eaten them will want more. (Pkt. 10c) (oz. \$1.00) (1/4 lb. \$3.00) (lb. \$9.00).

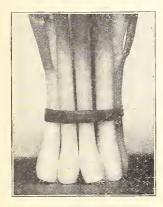

ONION (Continued)

Onions—Continued

Red Bermuda In shape, like the White Bermuda, color a pale red.

Planted during January matures latter part of June. No other onion is ready for use so quickly after planting seed. It is the right onion for the home garden. (Pkt. 10c) (oz. 50c) (1/4 lb. \$1.65) (lb. \$5.00) postpaid.

Prizetaker
A large Yellow Globe Onion of finest flavor, handsome shape and enormous size, many or over. The Prizetaker grows always to a perfect globe shape with a bright straw color. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50) postpaid.

A & M Bunching Onion

Selected especially for market gardeners who are growing on-ions for bunching.

Many think any white onion will do for a bunching onion, but this is not true. Our growers for fancy trade have learned that we have the best strain of seed for this purpose, and our sales amount to thousands of lbs. each year. The picture shows a sample of what our seeds produce. They are just the right shape. (Pkt. 10c) (oz. 35c) (1/4 lb. \$1.20) (lb. \$3.50) postpaid.

Bunching Onions

& M Onion Sets

The earliest onions are grown from sets planted in September. This brings them in the market in February and March, when prices are highest. About 250 lbs. of sets will plant one acre.

We have sets only in two varieties. The White Portugal and the Yellow Globe Danver. Therefore state whether you wish white sets or yellow.

We have no sets of the Riverside Sweet Spanish.

For the home garden no vegetable is so valuable as the onion, and for this purpose it is better to plant sets, because they are ready for the table six weeks after planting. Set them three inches apart in rows six inches apart. When ready for use, take up every other one as needed, allowing the balance to grow to mature size. One pound of sets will plant about fifty feet of row. (Lb. 40c) postpaid) (10 lbs. \$3.50 postpaid). For larger quantities write for prices.

Chives The famous Schnittlauch and highly prized for flavor. The seed of this is not easily germinated and it will be necessary, therefore, to plant a fairly good quantity of the seed if many plants are desired. (Pkt. 15c) (1/4 oz. 85c) (oz. \$2.50) postpaid

& M Mushrooms

Mushrooms can be grown in any dark room or cellar where the temperature can be kept at 50 to 75 degrees. The main conditions in mushroom growing are proper and uniform temperature, and very rich soil. One pound of spawn is sufficient for a bed 2x8 feet. We have the very best spawn obtainable. Many inquiries come to us from would-be growers of mushrooms. Our reply is not always encouraging because many growers have marvelous success for a time, but we know of not one permanently prosperous grower. There seems to be an element of uncertainty.

Pure Culture Spawn—Brandywine—Put up in bricks. (Per brick 40c) (5 bricks \$1.75) postpaid.

A good and health-l vegetable for a summer crop.

Culture—Plant seed from April 1st until Aug. 15th. Plant six to ten inches apart in rows three feet apart. On e oun ce will plant one hundred feet of row

A & M Early Greenpod

We have for a long time endeavored to produce an okra that is earlier than the White Velvet, which has long been the popular market variety. We have succeeded by selection, in producing not only an earlier variety, but a much more tender and prolific okra, and have named it A & M Early Greenpod.

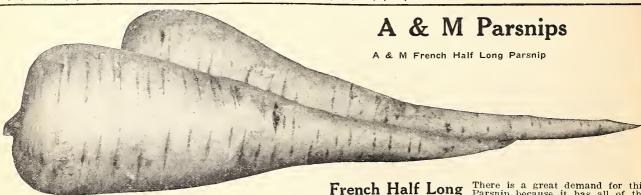

It is just the thing for truckers in the Coachella and Imperial Valleys, because it matures in April, fully a month ahead of other varieties; bears continuously until late in the season.

The pods are three to four inches We have for a long time endeav-

The pods are three to four inches long, deep green in color, and when young are absolutely stringless.

Every early trucker should have this variety. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

White Velvet On account of its attractive white color, good flavor and tender pods when quite young, it has long been a favorite variety. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid. White Velvet Mammoth Long Pod We have greatly improved the original strain and now its productiveness is simply wonderful, the pods shooting out from the bottom of the stalk within three inches of the ground, and the whole plant is covered with them to the height of a man's head five or six feet. Pods are an intense green in color, of unusual length, nine or ten inches, tender, and of good flavor. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postnaid. (lb. \$1.00) postpaid.

Culture

The seed of parsnips should be sown during the fall and winter months in Southern California and similar climates. It requires about one ounce of seed to plant a 100 ft. row and about 5 lbs, per acre. Do not apply manure soon before planting, for it tends to make coarse roots

A & M Hollow Crown

This variety is in general use for both table and stock feeding. The color is pure white, it is uniformly smooth and is of good texture and flavor. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid.

French Half Long There is a great demand for this good qualities of other parsnips and only grows about one-half as long. It is easily harvested, is of good quality, being tender and crisp at all times. It is very desirable particularly for heavy soils and is a good home garden variety because it is easily dug. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid.

A & M Devonshire
This Parsnip was recommended to us by our European growers. It is scarcely more than half as long as the Hollow Crown, but it is often three inches in diameter. Tender and has an excellent flavor. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) lb. \$1.75) post-

& M Peppers

Culture For early green peppers, sow seed in hot beds in December and January. Transplant as soon as weather and soil in your locality will permit. For main crop sow seed in February, March and April, in hot bed. Pepper seeds need the heat of a hot bed to germinate it during these months. For fall and winter crop sow seed in out-door beds well prepared, during May and June. Winter crops can be grown in places that are entirely frostless.

All large growers are now planting seed in the fields and thinning out. This does away with the expensive and tedlous method of raising plants and transplanting, and is proving satisfactory.

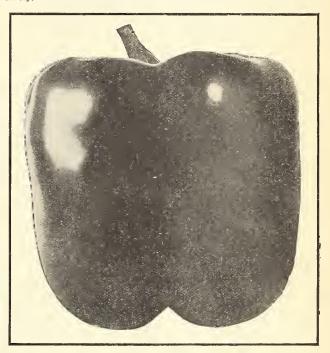

For field culture the plants are set eighteen inches apart in rows thirty inches apart. This would appear too close when the full grown plant covers the field solidly; but it is important to get the rows as close as possible in order to irrigate effective.

A&M Wonder Bell Pepper

See Illustration on Back Cover

Here is a pepper which promises to become one of the leading market varieties, and we want to especially call the attention of the trucker or shipping market gardener to its regularity of size and shape, making it an exceptionally desirable variety for good packing and fine appearance on its arrival in the market.

In size they average about 4 inches in length and about 31/2 inches in diameter at the top, with a very slight taper making it almost square. The weight of this size is approximately 9 to 91/2 ounces and this is considerably heavier than any other pepper of the same size. This additional weight is due to the thick side walls which are very meaty and are ¼ to % inches in thickness. Because of its shape it packs well for shipping east, the skin is smooth and glossy, a rich deep green color, they are solid and will not wilt in shipping. We feel that this pepper is an important addition to our very complete line of peppers in which we have specialized for a number of years, and we want you to try it. What is good for the shipper is good for the home gardener, and this pepper used for salad purposes, for stuffing or otherwise, will please the most critical. (Pkt. 25c) ($\frac{1}{4}$ oz. 75c) (oz. \$2.50) ($\frac{1}{4}$ lb. \$7.50) (lb. \$25.00) postpaid.

A & M Wonder Bell

A & M Chinese Giant There is probably no better one we have and since we have given particular attention to selection for uniform shape, we think we have the finest strain for shipping purposes. This is a very large pepper, often growing to the size of five inches in diameter. The sidewalls are thick and where they are given proper cultivation the yield is enormous. One Southern California grower says "I have planted your A & M Chinese Giant Pepper for a number of years and it has been most satisfactory year after year. When I cultivate it properly a big percentage of the peppers are what I call first grade." (Pkt. 10c) (oz. \$1.20) (1/4 lb. \$4.00) (lb. \$12.00) postpaid.

Anaheim Chili Pepper Anaheim above all others for culimary use because of its agreeable pungency. Other pungent varieties are intolerable, not so with the Anaheim Chili. That is what makes it the best seller in the market and the best pungent variety for canning. (Pkt. 10c) (oz. 50c) (1/4 lb. \$1.65) (lb. \$5.00) postpaid.

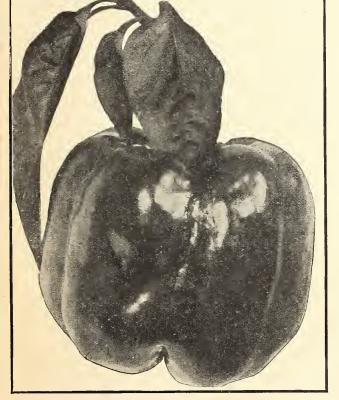

Ruby King A very satisfactory pepper for the home gardeners. It bears in profusion, handsome fruit, 4 to 5 inches in length and about 3 inches in diameter. Fruits are a rich, dark green while young, turning ruby red when ripe and the flesh is thick and meaty. (Pkt. 10c) (oz. 60c) (1/4 lb. \$2.00) (lb. \$6.00) \$6.00) postpaid.

Small Chili This small pepper is ½ inch in diameter, and two to three inches long. Is very pungent and marketed when quite green, although it is also sold when it has become red. It is an old time favorite and finds a market with canners and at stores catering to the Spanish population. (Pkt. 10c) (oz. 80c) postpald.

Cherry A very pungent pepper, round as a cherry, about one inch in diameter, marketed when green. Used largely in pickling and by the foreign trade. There is a profit to the person who will specialize on this and other small pungent peppers. (Pkt. 10c) (oz. 80c) postpald.

Mexican Chili In a class by itself on account of its extreme pungency. It is not canned but Is used almost exclusively for grinding and sold as cayenne, the trade of which is surprising. Our seed is pure and taken from selected peppers grown far from other varieties. (Pkt. 10c) (0z, 50c) (/4 lb. \$1.65) (lb. \$5.00) postpaid.

Cayenne A long, slim pepper, rather pointed, and when ripe, a bright red color. Extremely pungent. (Pkt. 10c) (oz. 80c) (1/4 lb. \$2.65) (lb. \$8.00) post-

A & M Chinese Giant Pepper

PEPPERS—Continued on Next Page.

Peppers—Continued

Floral Gem

This beautiful yellow pepper became popular several years ago. It is 1½ inches in flavor quite distinct from other peppers, and commands an independent price. The supply has not yet caught up with the ever-increasing demand. Inis pepper turns from green to a beautiful waxy yellow. When mature it is red. It is marketed when yellow. (Pkt. 10c) (oz. 75c) (1/4 lb. \$2.25) (lb. \$8.00) postpaid. \$8.00) postpaid.

Spanish Gem Like the Floral Gem it is very pungent with a flavor that is desired for pickling. In size it will average from ¾ to 1 inch in diameter, and linch to 1½ inches in length. It is marketed when quite yellow. (Pkt. 10c) (oz. 75c) (1/4 lb. \$2.25) (lb. \$8.00) postpald.

A & M Pimiento Every home garden should have a parboil it to remove the skin. Stuffed and baked it is far superior to all other peppers. (Pkt. 10c) (oz. 60c) (1/4 lb. \$2.00) (lb. \$6.00) postpald.

Salad Pimiento Thick, firm meat of mild flavor. Color bright red. It is a little more flat than a Pimiento and is perfectly smooth from stem to blossom. The size is about one to % inches, 2 inches in diameter and is a convenient size for canning. (Pkt. 10c) (oz. 75c) (1/4 lb. \$2.50)

Bell or Bull Nose
Shape but scarcely more prolific and a very desirable variety for the home garden. (Pkt. 10c) (oz. 80c)

Do not confuse this similar in the similar in th

Appreciation from Missouri

The Klondike Melons were fine last year. I have been raising melons for many years but have never seen anything to equal them. The average weight was 25 to 30 lbs. and solid and crisp all the way through.

A & M Potatoes

Essential Factors in Successful Potato Growing

Treat seed stock before cutting. The very best seed may have traces of one or more of the many diseases to which potatoes are subject. It is, therefore, advisable to soak seed potatoes in a solution which will kill whatever disease may be lurking on the outside of the tubers. Make this solution by dissolving four ounces of corrosive sublimate in about two quarts of hot water (be sure it is thoroughly dissolved) in a glass jar and then add to thirty gallons of cold water in wooden vessels. A barrel or wooden tank makes a good receptacle for this purpose. Place the sacks of potatoes in this solution and leave one and one-half hours, then drain, and, if the potatoes are not to be cut immediately spread out to dry. Use the same solution for only four or five lots, as the strength becomes weaker the more it is used. This solution is poisonous and should be handled with care and kept where animals may not drink it. Treated potatoes should also be kept away from stock.

Plant four to five inches deep, 14 inches apart, in rows 30 inches apart.

If potatoes follow alfalfa or Melilotus good yields can usually be obtained without the use of commercial fertilizer; but commercial fertilizer will be found profitable. 50 lbs. of nitrate of soda per acre is about right.

Keep soil moist at all times. Do not judge moisture by appearance of the potato plants as when the plants become a very dark green or begin to turn yellow it is then too late to apply water for best results; and potatoes are likely to become rough and knobby.

When cultivating throw the earth toward the plants a little higher at each cultivation; until at last cultivation the ridges are

When cultivating throw the earth toward the plants a little higher at each cultivation; until at last cultivation the ridges are six to ten inches high and broad at top so that tubers will be kept cool and free from tuber moth infection.

POTATO INSPECTION—All potatoes intended for seed purposes must be inspected by the County Horticultural authorities before they may be received and again before they may be shipped out. This is a great protection to the If price is lower at the time of shipping your order, a refund will be made you; if price is higher you will be notified before shipment is made.

The White Rose of the popular varieties, but we recommend the White Rose for the reason that for twenty-five years it has proven more satisfactory than other varieties.

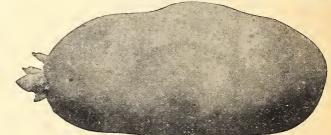

It is not particular as to soil. It matures quickly which makes it a good variety to grow without irrigation, besides it is out of the ground before nemetode and other enemies have done great injury. Because of its earliness, it costs less to grow it. In stock Dec. 1st to April. (5 lbs. 50c) (10 lbs. 90c) (25 lbs. \$1.75) (100 lbs. \$6.00) f. o. b. Los Angeles. Write for quantity prices.

British Queen Many growers have excellent results with this variety. They have a fairly heavy soil and find it more profitable to plant for a fall crop; it does not mature early enough for spring planting to get the higher price. In stock Oct. 1st to February 1st. (5 lbs. 50c) (10 lbs. 90c) (25 lbs. \$1.75) (100 lbs. \$6.00) f. o. b. Los Angeles. Write for quantity prices.

Early Red Rose

Planted during December, January market in lug boxes. It is a long, red potato, early, and due to its color is very desirable as a lug box variety where there is a demand for new potatoes. When you buy seed potatoes from Aggeler & Musser Seed Company you get the variety you ask for. In stock Dec. 1st to April. (5 lbs. 50c) (10 lbs. 90c) (25 lbs. \$1.75) (100 lbs. \$6.00) f. o. b. Los Angeles. Write for quantity prices.

A & M Special Potato Fertilizer Prepared especially for pota-(\$4.75 per 100 lbs.) f. o. b. Los Angeles.

A Typical White Rose DIPPING SEED POTATOES

Pursuant to our policy of doing everything we can to give our customers the best and cleanest seed possible, we have installed a large dipping vat in which we can dip the seed potatoes you purchase from us, if you so desire. We make a nominal charge for this service and we believe that it would pay you to let us do the dipping if you are not equipped to do it yourself. Seed potatoes should never be planted without being treated, for if your land is clean and you plant infected potatoes, then it will take you a number of years by crop rotation to again get the land clean. Sometimes we find planted meglecting this when they know better. Don't be careless in farming for it is a costly practice. Price for dipping seed potatoes 35c per 100 lbs. up to one ton; one ton or more \$5.00 per ton.

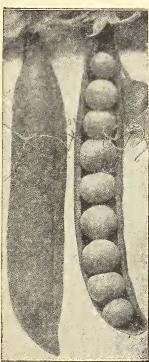

& M Garden Peas

Culture Peas are very susceptible to soil and climate. Within the radius of a few miles of Los Angeles and in one locality or another peas may be grown every month

and in one locality or another peas may be grown every month of the year.

In a thermal zone plant peas from September 1st to February 1st, and in lowlands from January 1st to September 1st. In summer months, from May to September, plant two inches deep in heavy soil and deeper in sandy soil. From December to April plant not more than one inch deep. The object of this is to have the seed deep enough to lie in the moist earth, and shallow enough to get warmth from the sun. Never, irrigate after planting peas until they come up. Irrigate before planting, but do not plant until the soil Is tillable. Peas will rot in soil that is too wet, especially during the winter months. They will stand a great deal of frost and cold weather until they bloom, but after they bloom a heavy frost will destroy the pods, and if cold enough, will kill the vines. Many planters sow one hundred pounds of seed per acre, but fifty pounds of seed per acre drilled in rows and well cultivated will produce larger pods and more peas per acre; besides, there will be less mildew. Fut the rows north and south for winter planting to give them as much sun as possible. The following varieties are best adapted for planting in the fall in California—Hundredfold, Laxton's Progress, Dwarf Telephone, Laxtonian, Admiral and Stratagem,

Dwarf Telephone

Stratagem The Stratagem has been a favorite among market gardeners and it is just as good for the home garden as it is for larger acreage. The pods are a dark green color and remain firm several days after picking. It is a strong grower, very prolific, the pods are of good size and are always well filled. The vines usually stand upright, to a height of about 2 feet on good soil and they are very productive. The dark green color of the pod makes it a good seller in all markets and in addition to this the grower is usually rewarded with a good yield. (Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid—25 lbs. \$6.00, 50 lbs. \$11.00.

Little Gem Is a very desirable, extra early, dwarf, wrinkled variety, growing about 15 inches high. Very large, sweet, and of delicious flavor. (Per Pkt. 10c) (1/2 lb. 20c) (1b. 35c) (10 lbs. \$3.00) postpaid. Not prepaid—(25 lbs. \$6.50) (50 lbs. \$12.00).

Laxton's Progress

Similar type of pea to Laxtonian, foliage being of a dark green color. The pods are long and also of a dark hue. It is a very desirable variety and has become very popular with market gardeners. For home gardens it is also highly recommended. Height 18 inches. (Per pkt. 10c) (1/2 lb. 20c) (1b. 35c) (10 lbs. \$3.00) postpald. Not prepaid—(25 lbs. \$6.50) (50 lbs. \$12.00.)

American Wonder The earliest of all wrinkled peas. to 11 inches high, and producing a profusion of good-sized and well-filled pods of the finest flavor. (Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepald—25 lbs. \$6.50, 50 lbs. \$12.00.

A & M Hundredfold
Plantings of these in the Imperial Valley and other pea producing sections have aroused considerable enthusiasm for the variety. It seems to have all of the good qualities of some of the more popular peas and sufficient acreage was planted this past season to indicate that it stands approved by some of the producers who plant a large acreage. It is dwarf, stands up well, and produces abundantly. The large pods are well filled with highly flavored and sweet peas. If you have never planted the Hundredfold, give it a trial in your locality, it may prove a winner, Height 18 inches. (Pkt. 100; (1/2 lb. 20c) (1 lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid—25 lbs. \$6.00, 50 lbs. \$11.00.

(1 b. 35c) (10 bs. \$3.00) postpaid. Not prepaid—25 bs. \$6.00, 50 lbs. \$11.00.

A & M Laxtonian
learned to depend upon A & M Laxtonian Peas. We sell great quantities of this variety to particular growers who want the best. It is the standard early variety for the west coast of Mexico, Imperial Valley and other large producing districts. In habit of growth it is medium dwarf, bearing pods five to six inches long, and yielding enormously. September plantings in the Imperial Valley are ready for picking in November and in some cases we have known them to be ready for picking within 50 to 55 days after planting. Height 18 inches. (Pkt. 10c) (½ bb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid—25 lbs. \$6.00, 50 lbs. \$11.00.

Yorkshire Hero A very popular market pea in this section. Abundant cropper and excellent in quality. Height 2½ feet.
Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid—25 lbs. \$6.00, 50 lbs. \$11.00.

Admiral This is one of the favorite varieties in many sections of Southern California and it is becoming wines, bears abundantly and the pods are large and well filled. In favored sections it matures in about twelve weeks from planting. We suggest that commercial growers include a few of these in their order and try them out. They may be a winner for your particular district. Height 2½ feet. (Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid—25 lbs. \$6.00, 50 lbs. \$11.00.

Dwarf Telephone Medium tall; pods very large; medium green peas, very sweet; a favorite with shippers probably because it carries well and commands a high price because of quality. Height 20 inches. (Pkt. 10c) (½ lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepaid—25 lbs. \$6.00, 50 lbs. \$11.00.

Tall Telephone Vines vigorous, growing about 4 feet high, with large, coarse, light-colored leaves and producing an abundance of very large pods filled with immense peas which are tender, sweet, and of excellent flavor. Throughout the south and by some growers in Callfornia it is preferred

Dwarf Gray Sugar (Edlble pods.) Of extraordinary passed as an edible-pod variety. (Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpald. Not prepaid—25 lbs. \$7.50, 50 lbs. \$13.00.

Nott's Excelsion Although a few days later than the age fully one-third larger, containing 6 to 8 large peas, so closely packed together that they become flattened. Height 15 inches.

(Pkt. 10c) (1/2 lb. 20c) (lb. 35c) (10 lbs. \$3.00) postpaid. Not prepald—25 lbs. \$6.50, 50 lbs. \$12.00.

NOTE—For increased yields, inoculate peas before sowing with Mulford Culture.

A & M Peanuts

READ—The Peanut is too much neglected. Its various uses are of great economic value. Its value as a food is well known, but few ranchers realize its value as a soil renovator, adding humus and nitrogen. As hog food, there is nothing better. The straw is rich in food value and may be pastured green, cured as hay or ensilage, and the yield of hay is often from two or more tons per acre. It grows on soil that may be too sandy for other crops. Therefore, if you have sandy soil, make it valuable by planting peanuts.

Virginia Improved
This variety is much superior to the ordinary Peanut, yielding fewer imperfect pods and combining earliness, productiveness and size; yields on ordinary land about 40 sacks to the acre. (Lb. 30c) (10 lbs. \$2.50) postpaid. Write for quantity price.

Spanish Hulled This is the small peanut used so largely in confectionery lines, salted peanuts, etc. It is very prolific and is more profitable to grow as a crop than the Virginia. They grow in small compact bunch on a small vine and are easily harvested. Plant 40 to 50 pounds of hulled nuts per acre in furrows 4 to 6 inches deep and about one foot apart in the rows, with the rows far enough apart to allow for harsh cultivation. (Lb. 35c) (10 lbs. \$3.00) postpald.

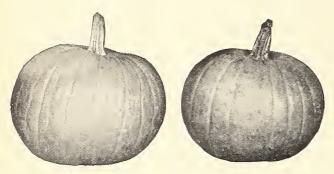

Ask for Peanut circular.

A & M Pumpkin

Culture Pumpkins delight in rich, sandy soil that is perpetually moist—the soil that retains moisture by the lary farming method, because pumpkins do not want too much water, and to flood them would destroy them, so when irrigating make the furrows nearly as far from the hill as the tip of the vine, and when the vines intersect, run the water through the middle of the row. Plant the seeds every 8 or 10 feet, allowing only one plant to remain, 1 lb. of seed plants

Kentucky Field or Large Cheese This variety is locally called Sweet Pumpkin, and is grown more than any other of its kind for stock, because it is a good keeper, notwithstanding it has a soft shell. It is fleshy and very sweet; also good for ple, and is largely used for canning. On one large ranch in the San Fernando Valley there was planted a large acreage to nearly all the popular varieties; this one was unaffected by the hot sun, and remained in perfect condition while other varietles were sun-burned and decayed quickly. (Pkt. 10c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Estampes We have the purest stock seed from which to grow this pumpkin. It is the heaviest pumpkin slze for them to attain. It is the canner's favorite because of its thick, deep red flesh and the fine sweet flavor. It is without exception the best for dairy stock, and only the scarcity of the seed has prevented it from being more widely known. We are informed by dairy-men that the percentage of butter-fat is increased greatly as the result of feeding this pumpkin. (Pkt. 10c) (1/4 lb. 50c) (lb. \$1.50) postpaid. We have the purest stock seed from which to

Sugar, or Boston Pie

Sugar or Boston Pie A small handsome variety, and deep orange yellow; flesh fine grained and sweet in taste. Famous in Boston as a pie pumpkin. It sells better on our local market than any other variety except the Jack o' Lantern at Hallowe'en time. (Pkt. 10c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Sandwich Island The most popular pumpkin in Ventura County. It is as hardy as a citron. A good one to plant where water is scarce. (Pkt. 10c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Mammoth King This is the large pumpkin so well known locally. As many as 20 tons have been taken from one acre. It not infrequently attains a weight of 200 pounds. (Pkt. 10c) (oz. 20c) (½ lb. 60c) (lb.

Japanese Pie (Green Cushaw) An excellent pumpkin for pies. The flesh is sweet and of a rich salmon color and free from fiber. It is very prolific; on this account it is profitable to grow for stock. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Cushaw or Crookneck This excellent pumpkin ought more largely. There is more pumpkin for its size because of the small seed cavity. It is excellent for pies, and yields enormously. (Pkt. 10c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

MONEY IN GROWING SQUASH AND PUMPKINS.—The canners consume enormous quantities. They use principally the Large Cheese pumpkins, paying about \$6.00 per ton. Next to the canners are the bakers, who use Hubbard Squash and Small Sugar, paying about \$20.00 per ton.

PLANT PUMPKINS AND CITRON FOR THE DAIRYMEN If you have an idle space of rich sandy loam plant pump-kins any time from May 1st to August.

See the managers of your nearest cannery. Secure a contract with them to grow pumpkins.

Connecticut Field (Jack-o'-Lantern)

Connecticut Field (The Jack-o'-Lantern)—This is the Hallowe'en and Thanksgiving trade, at which time they bring \$20.00 per ton, and two cents per pound at retail stores. Twenty tons to the acre is no unusual yield. If the land has been manured liberally a full crop can be grown among corn. It is a most excellent keeper, and will be sure wealth to all who grow and feed it liberally. (Pkt. 10c) (1/4 lb. 45c) (lb. \$1.25) postpaid. \$1.25) postpaid.

Appreciation from San Diego, Calif.

Last February I planted one regular 10c packet of your Riverside Sweet Spanish Onion seed in sandy loam soil that had grown Whip-Poor-Will Cow Peas the season before. In October I harvested 150 lbs. of onions from them—the largest being 5% inches in diameter and weighing 42 ounces. Many of them weighed more than 2 lbs. each. They are the finest, juciest and sweetest onions I ever ate, and what we have not used are keeping perfectly so far.

A & M Parsley

Culture The seed usually takes, 3 to 4 weeks to germinate and it is best to soak it in water about 12 hours before planting. Sow in drills a foot apart and thin plant to

A & M Champion Moss Curled An immense acreage of this parsley is grown in Southern California for the local market and for shipping to outside territory. A small plot of this in the garden will furnish garnishing material almost the year around. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid.

Plain or Smooth-leaved This variety has a richer parsley flavor than the curled varieties and should be preferred for the home garden. It is not profitable to the market gardener for the reason that the curled variety will produce much more per acre. (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Extra Double Curled A good curled variety for gar-

Extra Double Curled A good curled variety for garnishing. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpald.

Hamburg Turnip Rooted Fleshy vegetable roots for soups, (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpaid.

A & M Radish

Long White Icicle

Culture Seed may be sown the year round in California. Radishes thrive best in light, sandy loam, made rich with manure. Sow in drills 10 inches apart. An ounce of seed will sow a hundred feet of row, 12 pounds to the acre.

Early Scarlet Turnip
One of the earliest and best
sorts for forcing; its color is
very handsome; flavor very
mild, crisp and juicy; stands a great amount of heat without becoming pithy. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) (5 lbs. \$6.00) (10 lbs. \$11.00) postpaid.

French Breakfast

A splendid variety, medium-sized, olive-shaped, very crisp and tender; of a beautiful scarlet color. (Pkt. 10c) oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Chartiers A distinct, exceedingly handsome and attractive sort; color of top scarlet rose, shading into pure waxy white at the tip. Attains a large size before it becomes unfit for the table. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Early Long Scarlet
Very brittle and crisp; color
a bright scarlet; small top.
Six to eight inches long.
(Pkt. 10c) (oz. 20c) (1/4 lb. 45c)
(lb. \$1.25) postpaid.

Large White Chinese

This is a winter radish of deliciously sweet flavor; can be eaten as a turnip as it is without stringency. The Chinamen use this variety exclusively. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Half Long Scarlet

This variety should be more popular because it is just the right size for table use, not too large, never pithy, but always crisp and sweet. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Try This

Plant the little round radishes in the same row at the same time with beets or carrots. The radishes will break the way for the beets and carrots and will be ready for pulling by the time they need the room.

Read

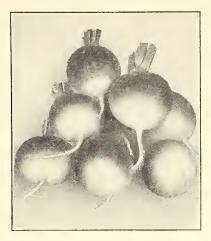

Every variety listed in this catalogue is the best for the purpose intended. If you will read the instructions you will be able to select just what you should have.

When planting a small garden you will find that a packet of seed is sufficient for one planting, usually enough for a row of 20 feet.

When buying seeds the grower rarely gives credit to the seedsman for the clean seed and high germination. Seedsman are just as careful about the purity of the seed, but too often they must depend upon the integrity of growers over whom they can have no control and whose crops cannot be inspected.

The A & M Seed Co. have a record on file of every sale by mail and every sale delivered to market gardeners, amounting to more than one hundred thousand sales per year. We receive hundreds of complimentary letters, but it is rarely that we receive a compliant about the quality of the seeds we send out. Usually the cause of failure is traced to improper culture, lack of moisture, improverished soil or unseasonable planting.

The experienced gardener understands the unfavorable conditions and often corrects them, thus avoiding a crop failure. It is the inexperienced grower who fails. It is for these that to much space in this catalogue is given to cultural instruction.

Scarlet Turnip White Tip Scarlet Turnip White Tip

An early variety of medium size and excellent flavor, and of a very handsome appearance. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) (5 lbs. \$6.00) (10 lbs. \$11.00) postpald.

Long White Icicle For the home consider this a most excellent table variety. Its extreme earliness, beautiful, pure white appearance, excellent flavor and crispness should make it a favorite everywhere. "(Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) (5 lbs. \$6.00) (10 lbs. \$11.00) postpaid.

Crimson Giant A variety extra-while growing to an unusually large size, it is always tender, crisp and of mild flavor. It remains in perfect con-dition a remarkably long time, and un-like other forcing varieties, does not be-come pithy; root turnip shaped; color a beautiful crimson; flesh firm and crisp. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpald.

Japanese All Season It is a very large, long, snow-white radish; deeply rooted, does not extend above the soil, hence it always is tender and crisp and has a delicious flavor. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (lb. \$2.00) postpaid.

Japanese Winter

A half - long white radish more adapted to our winter climate. It compares very favorably with our American varieties, besides it is much larger. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50) postpald.

Japanese Summer

Its beautiful white color and mammoth size attracts great attention. It is very tender and the flavor is exceedingly mild. It attains perfection in California, growing twenty-six inches in length and three inches in diameter. It is a profitable radish to grow, as it sells readily. It is excellent cooked as a turnip. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50) postpaid.

California Mammoth Whit

the flesh is tender, sweet and crisp, keeps well. Plant from September Ist to March. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

China Rose A delicious radish, crisp, with little tendency to become pithy. Skin is a beautiful deep scarlet and flesh pure white. It is a good seller and is in great demand by the vegetable peddlers. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpaid.

Chartier

A & M Spinach

Market gardeners write for quantity prices.

Culture Sow in drills, one foot apart, and for succession, thin out for use, keeping clean of weeds. It grows the year round in California. One ounce of seed for 100 feet of drill; 12 pounds to an acre. Field culture is the same as for lettuce but requires no thinning out. Better Spinach may be grown in the shade of an orchard.

Spinach is well adapted to a large area in California and may be grown wherever the conditions are favorable for the production of vegetables. The yield per acre varies from three to five tons, with an average production of four tons. (As much as 8 tons have been grown). When selling to the cannery the customary price is about \$25 per ton.

"Spinach is best adapted to a rich, light loam and is not a satisfactory crop to grow on soils of poor quality or those which will not retain moisture. The climate requirements of this crop are very exacting. The plants will stand without injury a relatively low degree of temperature, but are seriously injured by heat. Planting early in the fall and late in the spring should be avoided since the plants will not make a satisfactory growth during hot weather. When planted during the rainy season, provided the soil is of a sandy nature and is free from weeds so that it will not pack, this crop may require no cultivation. The crop is ready to harvest in six weeks to two months after planting.

MARKET.—On the local market there is a uniform demand throughout the year for home consumption, but during the winter months the shipper requires enormous quantities. The canners contract for large acreages each year.

Viroflay

Viroflay

This variety has become popular as an all-round Spinach. It is desired by the grower because it is hardier than other varieties and will produce in tonnage per acre more than any of them.

The canner and shipper like it because of its large smooth leaves.

The consumer prefers it because it is exceedingly tender and of mild flavor. (Pkt. 10c) (1/4 lb. 20c) (lb. 60c) (5 lbs. \$2.75) postpaid.

A & M Summer Success For several years we have endeavored to secure a type of Spinach that would prove profitable to grow in summer time, and after several trials this one proved the greatest success. With moist, loamy or peat land the A & M Summer Success will grow leaves 14 inches long. The leaves are very meaty and crisp. It is the best summer Spinach, but it is also the best winter growing variety. (Pkt. 10c) (1/4 lb. 25c) (1b. 75c) (5 lbs. \$3.50) postpaid.

Prickley Seeded Winter
This variety thrives best in the coldest weather.
Our strain is the highest type possible and the seed we are offering has proven very satisfactory, especially to market gardeners, as it produces wide thick leaves of dark green color.
(Pkt. 10c) (1/4 lb. 20c) (lb. 60c) (5 lbs. \$2.75) postpald.

Bloomsdale Large green thick crumpled leaves, grows luxuriantly, producing twelve to fifteen tons per acre. Will stand more heat than other varieties. (Pkt. 10c) (1/4 lb. 20c) (lb. 60c) (5 lbs. \$2.75) postpald.

Broad-Leaved Flanders for summer planting.

Is one of the best varieties for all purposes, and excels others for summer planting.

(Pkt. 10c) (1/4 lb. 20c) (lb. 60c) (5 lbs. \$2.75) postpaid.

New Zealand A spreading vine with numerous branches. One plant will cover an area four feet in diameter. Prefers a partial shady situation, where plenty of moisture is available. The tender tips may be cut every few days and cooked as spinach; it is just as good. One packet of seed is enough for a family garden. (Pkt. 10c) (0z. 20c) (1/4 lb. 50c) (1b. \$1.50) (5 lbs. \$6.75) postpaid.

A & M ROSELLE

Culture — Sow seed early in April in the field, four feet apart, in rows six feet apart. Cultivate as Okra There is an early and a late Roselle. Be sure to get the early variety, because the frost is almost sure to destroy the late variety before it matures. We offer only the early variety. It is an annual plant that has been sufficiently tested to indicate its great value and to warrant more extended cultivation. The calyx surrounding the seed pod is used as soon as the flower drops for making

It is an annual plant that has been sufficiently tested to indicate its great value and to warrant more extended cultivation. The calyx surrounding the seed pod is used as soon as the flower drops for making felly and jam. The jelly Is superior to guava or currant, and labeled as "Queensland Jelly," is shipped from Australia to all parts of Europe. It is easily grown from seed if planted after the ground is warm; grows rapidly, resists drouth and is very ornamental. Every home garden should have a row of this ornamental and useful plant. (Pkt. 10c) (0z. 75c) (1/4 lb. \$2.50) postpaid.

Roselle Buds

A & M RHUBARB

Culture—Sow the seed any time from February 1st until July 1st, in drills two feet apart, in order that you may cultivate with a horse cultivator. Within five months after sowing the seed the Giant Winter variety will be large enough to market, even though the roots are not larger than your thumb. Transplant at any time when the roots are as large as a peneli. Rhubarb requires a rich sandy soil. Therefore plant it on ridges or on the sides of an irrigating ditch. In our hot climate partial shading is beneficial. If you can do so, plant it in an orchard, setting the foots three feet apart, but if in a sunny place, set the roots 18 inches apart, that the leaves of one plant will shade the crown of another.

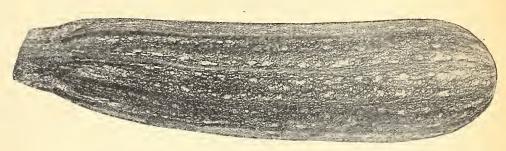

Giant Winter It is undoubtedly a very productive and therefore very profitable variety. It is displayed at the market places in apple boxes, and the boxes are barely long enough to accommodate the large, thick stems that will average one-half pound each, often weighing more than a pound. It is remarkably early, bearing large stems within five months from planting the seed, and grows nearly the entire year. The stems are so tender that they do not need peeling. (Pkt. 10c) (oz. \$1.60) (1/4 lb. \$5.00) lb. 16.00) postpald.

RHUBARB ROOTS

Giant Winter—In stock from December 1st to April 1st. 25c each, \$2.50 per dozen, postpaid.

& M Squash

Culture
Seed should not be planted until all danger of frost is past. In open ground plant in hills ten feet apart where irrigated, and fifteen feet apart where not irrigated. In orchard plant only one row between trees. When the vine is well along do not flood the hill, but keep the irrigation furrow nearly as far from the hill as the length of the vine. Keep in mind that the roots are longer than the vines. Very early plantings may be protected with Hot Caps. Two lbs. of seed plants an acre.

A & M Zucchini Squash

SUMMER VARIETIES

A & M White Bush Scallop

The well known sumbeen the standard for more than fifty years, and always in demand because of its earliness and it is delicious on the table whether stewed or fried as Egg Plant. (Pkt. 10c) (oz. 20c) (1/4 lb. 40c) (lb. \$1.25) (5 lbs. \$5.75) (10 lbs. \$11.00) postpald.

Zucchini or Italian

The favorite Italian Squash. It should be eaten when quite variety; do not hesitate to plant it. It is very prolific, a few hills will suffice to keep the family well supplied the entire summer. It is now more popular on the market than the White Bush Scallop. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (lb. \$2.00)

Cocozelle An excellent squash for many purposes. Equal to the White Bush Scallop for the table when taken quite young. It is enormously prolific. When gathered closely and fed to stock, the vines will keep bearing continuously all summer, and far into the fall. It survives drouth to a wonderful degree. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50) postpald.

Golden Summer Crookneck The popular well known Crookneck (Pkt. 10c) (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpald.

Long White Marrow

This is exceedingly delicious as well as the most prolific of all English Marrows. Steamed when quite young or fried as egg plant it is equal to egg plant itself. The squash is about 12 inches long when mature, and has a light creamy color. It grows luxuriantly and bears abundantly all summer under very adverse conditions. It will grow, when continuously harvested, more food for hogs than pumpkins. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpald.

WINTER VARIETIES

English Cream Marrow or Fordhook Squash

Phis is a most desirable squash for either summer or winter use. The vines are of strong, vigorous growth and wonderfully productive. Squash oblong in form, eight or ten inches in length, slightly ridged; smooth, thin, yellowish skin and of a yellowish color. If gathered young for cooking it is excellent, while if allowed to ripen on the vine they can be stored and will keep in good condition until late the following June. Either for baking like sweet potatoes or making ples during the winter, the squash is very fine. (Pkt. 10c) (oz. 20c) (1/4 lb. 60c) (lb. \$1.75) postpald.

Boston Marrow Flesh, bright orange or rich salmon color; for sweetness and excellence is unsurpassed. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) postpald.

A & M Banana This squash grows from one to two of beautiful orange-yellow and excellent quality. It keeps from one season until another. When quite young it is excellent to cook as a marrow. (Pkt. 10c) (0z. 20c) (1/4 lb. 50c) (1b. \$1.50) (5 lbs. \$7.00) (10 lbs. \$13.00) postpaid.

Pike's Peak
An excellent winter squash. Fine grained and superior in flavor and keeping qualities (oz. 20c) (1/4 lb. 50c) (lb. \$1.50) postpaid.

Kitchenette
A small Hubbard Squash reduced in size to about 5 pounds, just right for the average family. One half of a large Hubbard is usually wasted. The Kitchenette is a good seller for the vegetable vender. (Pkt. 10c) (oz. 25c) (1/4 lb. 75c) (lb. \$2.00) postpald.

Golden Hubbard

The flesh is of a deep golden yellow—a much richer color than the Green Hubbard—fine grained, cooks very dry, and has excellent flavor. In its keeping qualities it is fully equal to the green variety. (Pkt. 10c) (oz. 20c) (1/4 lb. 65c) (1b. \$2.00) postpald.

Green Warted Hubbard This variety is grown the United States than any other. It is used in many ways, but mostly for pies. It is a good keeper and because of its hard warty rind, it is the best of shippers. Therefore many acres are grown in Southern California for that purpose, and many more for the bakers, the canners and family consumption. (Pkt. 10c) (oz. 20c) (1/4 lb. 45c) (lb. \$1.25) (5 lbs. \$5.75) (10 lbs. \$11.00) postpaid.

Green Warted Hubbard

A & M SALSIFY

Culture
Sow the seed in the spring in drills one foot apart and one inch deep, thinning out plants to four inches. It succeeds best in light, well-enriched soil. One ounce of seed for 56 feet of drill.

Mammoth Sandwich Island

A large and superior variety. Mild and delicately flavored. (Pkt. 10c) (oz. 25c) (1/4 lb. 85c) (lb. \$2.50)

Appreciation from Arcata, Calif.

Last year we raised the first and only muskmelons ever raised in this section owing to fog and cold nights. We tried your Famous Indiana and I think they were the finest that I have ever tasted. We had delicious melons in October. Am going to try your collection this season,

Tobacco Culture in California

It is true we can grow tobacco just as luxuriantly in California as elsewhere. It has been repeatedly tried in various sections of the state but at no place did the experiment extend to the third year. California cannot cure a fine grade of tobacco. The cause may be our lack of rain to wash off the gum or it may be the dry atmosphere, or our lack of frost. However, a fairly good smoking tobacco is made by carefully drying the leaves in a shed.

Acclimated Havana For quality this is the very

Pennsylvania Broad-leaf

The largest known variety. At our demonstration plot we grew leaves that measured 40 inches long, 28 inches wide. In Pennsylvania this variety developed leaves 44 inches long and 36 inches wide. It is the best variety to grow in the home garden for use in the chicken house or other insecticide purpose. Also if handled properly makes a good smoking tobacco for the pipe. (Pkt. 10c) (oz. 50c).

M TOMATOES

Culture—Tomatoes do best on light warm, not over-rich soil, and success depends upon securing a rapid, vigorous and unchecked growth during the early part of the season. Sow in hot-beds from 6 to 8 weeks before they can be set out of doors, which is when danger from frost is past.

Transplant three to six feet apart in rows four to six feet apart, according to variety—three feet for those varieties of upright growth, and six feet is not too far apart for vining varieties which soon cover the ground solidly. The soil should be plowed and pulverized to a depth of ten or twelve inches, the deeper the better, in order that the roots may keep in the cool earth, for as soon as the roots are heated by the hot, and the grower can see no cause for it.

Many growers are now treating seed with Semesan before sowing. This helps to control diseases and developes sturdier plants.

plants.

A & M MARGLOBE TOMATO

A Most Promising Introduction. Resistant to Fusarium Wilt and Nail-head Rust

Wilt and Nail-head Rust

In 1924 we received from Dr. Fred J. Pritchard, of the Bureau of Plant Industry, U. S. Department of Agriculture, a sample of this seed for trial purposes. After planting and caring for it the first year we became convinced that Dr. Pritchard had accomplished very definite results in developing a new Wilt resistant strain of tomato, and after watching it for some time and making careful selections we believe it to be an outstanding variety. It is a hybrid from Marvel, a government strain; the flesh is red and the very thin outer skin is golden. The red flesh showing through the golden skin produces a rich red color with a tinge of gold showing through. The meat is solid with very few seeds, non-acid, almost a globe shape, size is medium, averaging 7 to 9 ounces in weight, a good shipper, excellent for local market and will probably become one of the leading canning varieties. We have every reason to believe that it is resistant to Fusarium Wilt and Nailhead Rust, and this is one of the greatest things in its favor.

Small samples of seed distributed among growers in some of the most important tomato producing sections, including the west coast of Mexico, have created a widespread interest in this wonderful new tomato and we now feel that it is safe to recommend it for any soil or climatic condition adaptable to tomato growing.

(Pkt. 15c) (1/4 oz. 35c) (oz. \$1.00) (1/4 lb. \$3.35) (lb. \$10.00) postpaid. Small samples of seed distributed among growers

A & M WILT RESISTANT STONE

This Tomato has proven less susceptible to damage by wilt than any other variety. It has been grown in fields adjoining which were tomatoes that were badly infested with wilt, that made no crop and were finally plowed under while the A & M WILT RESISTANT grew an excellent crop and was a money maker. It retains all the good qualities of the Stone and has others we feel even better. The tomato is of good size, very solid, and makes an excellent shipper. It has topped all eastern market prices the past season. It yields as heavy as the Improved Stone, making it ideal for canning purposes. It has proven its value in Mexico. We can, therefore, recommend it for the canner, the shipper and the market gardener.

(Pkt. 10c) (oz. 60c) (1/4 lb. \$2.00) (1/5. \$6.00) postpald.

(Pkt. 10c) (oz. 60c) (1/4 lb. \$2.00) (lb. \$6.00) postpald.

A & M Globe This variety has become very popular with the large growers in old Mexico. They have learned that when it has turned from the green to a lighter color with just a suspicion of red it is in prime condition to ship to the farthest market with the least deterioration. It is nearly as round as a globe, produces abundantly and is a delightful table variety, almost without acidity, and is now considered the best shipper for the farthest market. (Pkt. 10c) (oz. 75c) (1/4 lb. \$2.50) (lb. \$7.50) postpaid.

Dwarf Stone (Tree Tomato)—Large, red, smooth and solid. The stalk is upright with dense a desirable tomato to grow in the heat of the sun. It is a desirable tomato to grow in the interior valleys. (Pkt. 10c) (oz. 50c) (1/4 lb. \$1.65) (lb. \$5.00) postpaid.

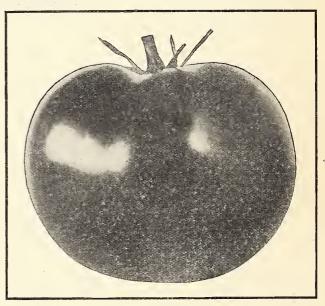

Chalk's Early Jewel Excellent early tomato for home or nearby market; very prolific, red, smooth and desirable size. Its mild flavor makes it desirable as a salad. (Pkt. 10c) (oz. 40c) (1/4 lb. \$1.35) (lb. \$4.00) postpald.

Earliana
The plants are quite hardy, with rather slender branches and moderate growth, well set with The tomatoes are bright red and close together in clusters of five to eight; all of medium size, averaging 2½ inches in diameter. (Pkt. 10c) (oz. 50c) (½ lb. \$1.65) (lb. \$5.00) post-

Root blight may very often be prevented by spraying frequently with Bordeaux Mixture, beginning when the plants are young and continuing throughout the season. A cup full of the liquid Bordo poured around the stem of the plant where it will soak down to the root system is also effective. It is also a good plan to dip the roots in a solution of Bordeaux Mixture when transplanting. Blight may often be prevented, but it is difficult to cure.

The time of planting and variety depend upon your local market, soil and climatic conditions, and the purpose for which they are grown.

On sandy loam soil near the foothills, where it is nearly frostless, we recommend planting seed of the A & M First Early in hot beds during December and January for winter and early spring tomatoes. Tomatoes that mature the latter part of April are considered early for Southern California.

A & M Marglobe

A & M IMPROVED STONE

FOR MARKET NEAR AND FAR-THE TOMATO FOR SHIPPING AND CANNING

A & M Improved Stone

California. Several thousand acres are planted to this variety exclusively for shipping to Eastern points after other tomatoes have been destroyed by frost. For this purpose the seed is planted about June 15th, and the tomato brought to full size about October 1st, after which it gradually ripens as wanted for shipping. The tomato is of good size, bright red, solid, smooth, and enormously productive.

The canners prefer it because of its uniformly desirable size and solidity for canning. The grower prefers it because of the vigorous growth and large production extending throughout the season far into the winter months. (Pkt. 10c) (oz. 50c) (1/4 lb. \$1.75) (lb. \$5.00) postpaid.

King of the Earlies This variety has become very pop-and Imperial Valleys for the reason that every blossom pro-duces a tomato, that it matures very early, is smooth, is of fair size, is of good flavor and is a good shipper. (Pkt. 10c) (oz. 50c) (1/4 lb. \$1.75) (lb. \$5.00) prepaid.

Ponderosa A very large, purple tomato with few seeds and of excellent flavor. Our strain is round and smooth—not the usual oblong wrinkled kind. Favorite for the home garden. (Pkt. 10c) (oz. 70c) (1/4 lb. \$2.35) (lb. \$7.00) postpaid.

Golden Ponderosa A very large yellow tomato having a delicious flavor. It is ideal for salads and with a little finely sliced lemon makes excellent preserves. It yields enormously. We recommend it for the home garden. (Pkt. 10c) (oz. 75c) (1/4 lb. \$2.50) (lb. \$7.50) postpald.

San Jose Canner

This variety is a favorite with canners for the sole reason of its enormend it where tonnage is desired above all else.

(oz. 75c) (1/4 lb. \$2.50) (lb. \$7.50) postpaid.

A & M TOMATOES -- Continued

A & M FIRST EARLY

We introduced this tomato in 1909 and from that time to the present it has superceded all other early varieties throughout Southern California and Mexico and is constantly gaining favor among the important tomato growers in big producing sections such as Imperial Valley, Salt River Valley of Arizona and other similar districts. As an early variety and money maker it has no equal among tomato varieties. It is uniform in size and packs well, making it a most desirable tomato for the packer and shipper. It is smooth, inclined to globe shape, of good size, an excellent shipper and bears longer than any other early tomato. During the past year many fields in Southern California were picked continuously from June to November. We cannot recommend it too highly. (Pkt. 10c) (oz. 50c) (1/4 lb. \$1.75) (lb. \$5.00) postpaid.

TURNIPS

Culture—Turnips may be sown broadcast on damp sandy soil or in drills as beets and carrots. Drill in double rows on ridges not too thick in the row. The Purple Top Globe variety is now leading in popularity because of its mild flavor and its adaptability to our summer climate.

Snowball Next to the Purple-Top Globe in popularity, and excellent flavor. It is slow to get pithy in the summer, but always crisp during the winter. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

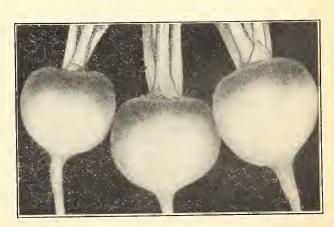

Early Purple Top Strap-Leaf
A very popular variety for either family or market use; large size, white, purple above ground; table variety. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) post-paid.

Golden Ball A rapid grower of excellent flavor; bright table variety. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Early White Flat Dutch Strap-leaved variety; for quick growth, mild flavor and excellent quality. ..(Pkt. 10c) (vz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Purple Top Globe Solid, very sweet, slow to get the summer season. Indeed the best for any season, but slower to mature than the Strap-Leaf (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Purple-Top Rutabaga The best of the Swede Turnips. Very hardy and productive; flesh yellow, is very solid, sweet and well flavored. (Pkt. 10c) (oz. 20c) (1/4 lb. 35c) (lb. \$1.00) postpaid.

Purple Top Globe

MULFORD CULTURES INOCULATE THE SEEDS OF

Sweet Peas, Garden Peas, Beans, Alfalfa, Cow Peas, Melilotus Indica, Vetches and all other Legume Crops

MULFORD CULTURES for Legumes are supplied in concentrated form, labelled according to the exact amount of culture material (concentrate) actually supplied in each bottle (1 ounce, 3 ounce, etc.), with definite recommendations, in terms of bushels, as to the amount of seed same will inoculate. This basis simplifies the question of determining the correct quantity of culture required for proper inoculation.

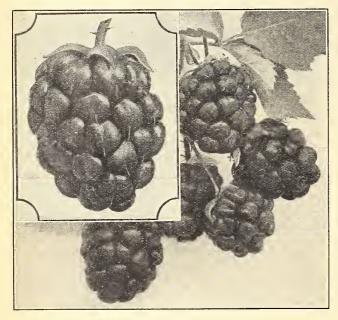

The packages are in convenient sizes, ready for use. The directions which accompany each package are plain

and easy to follow. In ordering, be careful to specify what crops are to be inoculated. FOR SMALL SEEDS EOD LADGE SEEDS

BERRIES

We can supply the following plants in large or small quantities. Our offerings are limited to what we consider the very best varieties in each case. Prices on small quantities include postage, but larger quantities are f. o. b. Los Angeles and will be sent by express. No plants will be sent C. O. D.

Youngberry

YOUNGBERRY

A new berry of exceptional merit. Offered for the first time this year. We are thoroughly convinced this has a great future.

great future.

This new type of fruit was produced scientifically by crossing the loganberry with the dewberry, and it combines to a remarkable degree the most desirable qualities of all other berries. Its sweetness makes it a fine fresh table berry comparable to the strawberry. It also has the pleasant flavor of the red raspberry, the juiciness of the loganberry, and the jelling and canning qualities of the blackberry. The seeds are small, and there is no acid.

One year old plants produced at the rate of 20,400—8 oz. baskets to the acre and it is estimated that two year old plants give a fifty per cent heavier yield. The season for ripening in Southern California is from the middle of May to the middle of July. No special method of culture is required, but good soil cultivation and a moderate amount of moisture will give desired results. Set the plants 5 or 6 ft. apart in rows 8 ft. apart, for

results. Set the plants 5 or 6 ft. apart in rows 8 ft. apart, for commercial use. In the home garden the plants can be trained much higher than in the field and they can, therefore, be set closer together in the rows. Plant during January, February and March.

Each 30c, dozen \$3.00 postpaid. Not prepaid-100 for \$15.00, 1000 \$125.00.

LA FRANCE RASPBERRY

A comparatively new berry but well known and popular for its large luscious fruits and heavy fruiting qualities. To train it provide a wire trellis near the ground. When the new growth reaches a height of about 2 ft, pinch out the tips to induce laterals. During the winter cut back the laterals about one-half. Each year after the crop is harvested remove the old wood so that all the energy of the plant will be forced into the new growth. Each 30c, 6 for \$1.65, doz. \$3.00, postpald. Not prepaid, 100 \$22.50, 1,000 \$200.00.

St. Regis Raspberry Very early, fruit round oval red. A very pronounced flavor. Culture same as La France. Each 20c, 6 for 85c, doz. \$1.50, postpaid. Not prepaid, 100 \$10.00, 1,000 \$90.00.

Black Cap Raspberry

mates. Each 20c, 6 for 85c, doz. \$1.50, postpaid. Not prepaid,
100 \$10.00, 1,000 \$90.00.

LOGANBERRIES

A wonderful berry and entirely in a class by itself. Runners should be trellised on wires. When fruiting season is past remove the fruiting canes and wind the new canes around the wire. Another method for the home garden is to set three posts in the ground, nail two or three barrel hoops above the plants and train the runners through and over the hoops. Set plants 6x8 feet. Each 20c, 6 for 85c, doz. \$1.50, postpald. Not prepaid, 100 \$10.00, 1,000 \$90.00.

A & M PROGRESSIVE STRAWBERRIES

A fine home garden and local market berry. One hundred plants should supply the average family with berries daily for the entire season from July to late fall, if weather conditions are favorable. The A & M Progressive will bear a full crop the first year if properly handled. Because it does not make many runners, the plants should be set close, say 10 to 12 inches in the row and about 22 inches between rows. This distance apart requires 20,000 plants to the acre. Encourage runners and new plants by frequent irrigation and fertilizing. Never cut off the runners, but rather train them along the row and strive for a matted row. 50 plants \$1.35, 100 plants \$2.50, postpaid. Not prepald, 1,000 \$20.00. Write for quantity price.

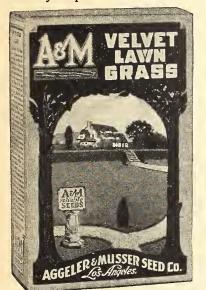

A & M CAROLINA STRAWBERRY

A good shipper and a big producer. Set the plants 3 ft. apart in the row and 2 ft. between rows. They make many runners and will fill in the space in one season. Train runners along the row, keep well irrigated and fertilized to encourage rooting of runner plants. The runner plants of Carolinas will not bear fruit the first year, but the parent plant will. Fruiting season runs well into the late fall under favorable weather conditions. 50 plants \$1.00, 100 plants \$1.75, postpald. Not prepaid, 1,000 plants \$15.00.

A & M LAWN GRASS SEEDS

For Private Lawns, Country Clubs, Golf Links and Public Parks.

The lawn is the finishing touch of the home and once planted it remains indefinitely, therefore, it is important that the proper selection of seed be made in the beginning and thus avoid disappointment. Pure seed of good germination is important and freedom from weed seed is necessary for best results. A & M lawn seeds and mixtures are cleaned thoroughly and are tested for purity and germination. When you plant A & M Lawn Grass Seed you are planting the best that the market affords.

A & M VELVET LAWN GRASS

Has been used for many years throughout the Southwest with highly satisfactory results. It is a blending of grasses best suited to the variation of temperatures to which the lawn is subjected during the twelve months period. It contains the proper proportion of the best, fine-bladed grasses and white clover and when properly planted and cared for will produce a beautiful turf of bright, velvety green color. If you are having your lawn planted by a land-scape gardener, insist that he use A & M VELVET LAWN GRASS. It is packed in 1 lb. cartons and in specially branded bags of 5 and 10 lbs. each. It requires 1 pound of A & M Velvet Lawn Grass Seed to plant a space 10 x 20 or 200 square feet. This is the least that should be used and a heavier seeding will give quicker results. (1-lb. carton 80c) (5-lb. bag \$3.75) (10-lb. bag \$7.00). Postpaid.

A & M SHADY LAWN GRASS

In planting the lawn, there are often many places under trees or on the north side of the house and it is quite difficult to obtain satisfactory growth of grass in these shaded places. A & M SHADY LAWN GRASS will grow satisfactory in the shade and will blend in with the other lawn grass. It is a special mixture of fine bladed grasses and will produce an abundant and even growth of beautiful green grass. A & M Shady Lawn Grass may also be used in parks or

other places where there is considerable shade from trees. (1 lb. 75c) (10 lbs. \$7.00) (25 lbs. \$16.25) Postpaid.

A & M FANCY RECLEANED KENTUCKY BLUE GRASS

Every bag of our Kentucky Blue Grass Seed is tested for purity and germination. There is positively no guesswork about it. You know when you buy A & M KENTUCKY BLUE GRASS SEED that it is high grade in every respect. (1 lb. 60c) (10 lbs. \$5.50). Postpaid. Write for quantity prices.

A & M WHITE CLOVER

There are many grades of White Clover Seed and A & M is always the best one. We invite comparison of samples, for when they are examined side by side it is very easy to note the difference in quality. A & M White Clover is tested for purity and germination the same as our Kentucky Blue Grass. It may be used to good advantage in reseeding Bermuda Grass Lawns in the fall of the year. (1 lb. 80c) (10 lbs. \$7.50). Postpaid. Write for quantity prices.

SEASIDE BENT GRASS

(Agrostis Maritima). For those desirous of cultivating a lawn from Bent Grass, there are many varieties available either for propogating from stolens or growing from seed. We do not offer stolens and we find from experience that the best variety of Bent Grass adapted to Southern California for the purpose of producing a lawn from seed is Seaside Bent Grass, which derives its name from the fact that it is grown near the sea shore in Coos County. It is an acid loving grass, requires much moisture to maintain a good sward and when growing at its best, helps to hold out the undesirable Bermuda Grass. (1 lb. \$2.35). Postpaid.

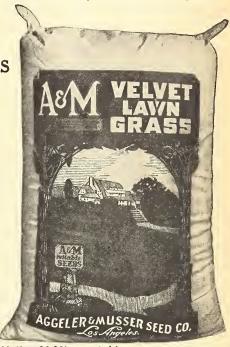

AUSTRALIAN RYE GRASS—(Lb. 35c) (10 lbs. \$3.20) posptaid. PACEY'S RYE GRASS—(Lb. 40c) (10 lbs. \$3.30) postpaid. RED TOP—(Lb. 45c) (10 lbs. \$4.00) postpaid.

A & M VELVET FERTILIZER

Used Everywhere With Best Results

Every California gardener should fully realize the necessity for fertilizing. Most growers are inclined to use too small an amount of fertilizer and particularly since it is somewhat difficult to secure barnyard fertilizer, there is too often a tendency to forget the matter entirely. This is a mistake and will often cause disappointment, not only in the lawn, but in the garden as well. A & M VELVET FERTILIZER will give you very satisfactory results and for the new lawn it should be used at the rate of about 100 lbs. to 1,500 square feet and should be raked in before planting. This should be done several days in advance of seeding. For an established lawn broadcast evenly at the rate of 5 to 8 lbs. per 100 sq. ft. and water thoroughly immediately after applying. For roses, use about ½ to 1 lb. per bush, depending upon the size of the bush; for trees and shrubs use a larger quantity. It will be found beneficial to all plant life and the results are quick and lasting. It is odorless and well balanced for general purposes. (25 lb. sack \$1.15) (50 lbs. \$2.10) (100 lbs. \$4.00). F.O.B. Los Angeles.

Radio Garden Talks, Los Angeles, California

4 to 5 P. M. Wednesday, each week, by FRED C. McNABB

GARDEN INFORMATION FOR THE AMATEUR

The amateur gardeners or plant lovers whose gardens are an expression of the soul are sure to have a healthy influence on the plant world in the coming years. With all branches of horticulture commercialized we must look to the amateurs, garden clubs and householders for the advancement in horticulture and it is to be hoped that these individuals and organizations may be ever on the increase to assist in this great work. The child who becomes interested in the study of plant life today may be a leading horticulturist tomorrow, for certainly a broad field is open to those who would attempt to solve the great mystery.

SOIL PREPARATION

California soils need humus. Humus is decomposing vegetable matter and many waste materials such as leaves, weeds, discarded garden plants, etc., may be put to good use by being buried in the garden to decay and provide humus. Humus separates the soil particles, provides a congenial home for bacteria, increases the soil's capacity for absorbing and retaining water, provides for a free circulation of air and causes a more rapid and thorough absorption of the sun's rays.

All of these have a most beneficial effect on plant life and by constantly using the materials at hand the garden soil may be greatly improved. Do not burn the leaves—your garden needs them.

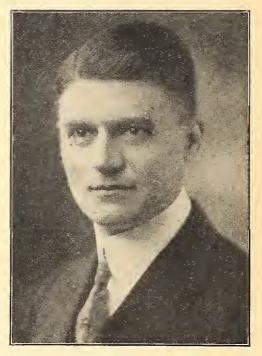

GERMINATING SMALL SEEDS

Most flower seeds are very small and if planted too deep the tiny sprouts may never grow to the surface. When one fails in germinating seeds, very often the seeds are blamed, but in most cases it may be from other causes. In planting small flower seeds a good rule to follow is to cover to a depth of about twice the breadth of the seed itself to cover with a light material such as fine leaf mold.

Keeping the seed bed moist is important and this may be done by placing cloth or burlap sacks on top the bed, removing them at once when the seeds begin to germinate. Placed after the seed has been planted and covered this additional covering will prevent washing or floating of the seeds and covering and will hold the moisture. A small frame with glass covering (window sash is good) will provide good conditions for starting some seeds that are more difficult to germinate. Learn to grow your own plants and have more enjoyment from your garden.

To celebrate the occasion of Mr. McNabb's fourth anniversary of Radio Garden Talks the studio of KHJ was turned into a regular bower of flowers on September 19, 1927. Besides the numerous floral tributes, Mr. McNabb was also the recipient of a sheath of congratulatory telegrams from countless radio garden friends—R. A. H.

FRED C. McNABB

Vice-President Aggeler & Musser Seed Co.
K. H. J. Radio Gardener

KNOW YOUR PLANTS

Label your garden plants and keep a record of the variety, time of planting, time of blooming, etc. Study each plant individually, learn its likes and dislikes and you will fiind they will respond to this loving care just as your own children.

Don't buy seeds by the picture on the packet, Learn to know them by name and you will have fewer disappointments. A conscientious, painstaking seedsman gives varietal catalogue descriptions in detail and if you will make use of this information it will reflect in your garden.

PLANTING SEASONS

A very important part of successful gardening in California is to know the proper time for planting. On the inside back cover of this catalogue is a planting calendar for each month of the year. The planting suggestions offered there are for Los Angeles and vicinity. The suggestions offered there should, however, be of assistance to planters in other districts in determining the proper planting season.

INSECT PEST CONTROL

Doing the right thing at the right time will lessen the labor and increase the benefits. For leaf-eating insects of all kinds, worm, bugs, or otherwise, spray with Acme Arsenate of Lead. For Aphis or plant lice and scale, spray frequently with Destruxol. On pages \$5 and \$6 will be found a complete list of spray materials, what they are to be used for and how. Also see pages \$3 and \$4 for spray pumps. Don't try to garden without a spray pump. A compressed air sprayer properly cared for will last for years, do the work effectively and with ease. They are cheaper in the long run. Try it once.

Classification of Flower Seeds for Special Purposes

This page is intended to aid you in the selection of your seeds that you may have flowers all the year round, and for every purpose.

A & M SELECT CALIFORNIA FLOWER SEEDS

Suited To All Climates PLANTED FROM COAST TO COAST

It is now quite generally known that California is the largest flower seed producing section in North America and that thousands of acres of California land are producing flower seeds to be shipped to all parts of the world. Being in the midst of this production, where we enjoy the privilege of frequent inspections of our own growing crops as well as those of other growers, we have a decided advantage in flower seed selection that enables us to offer our customers the very finest strains of all varieties. A & M California Flower Seeds may be planted in any climate with gratifying results. For the home gardener or the commercial grower we cannot recommend them too highly.

PACIFIC COAST PLANTERS NOTE

Tender or Greenhouse means the plant will not stand the least frost. All such must be planted late in spring (May) or in a greenhouse.

Half Hardy means the plant will stand any light frost, but needs protection against very cold weather. These should be planted in the spring (March and April), not in the fall.

Hardy means the plant will stand considerable frost, or practically all we have on the Pacific Coast. These may be planted in the fall or in the spring (October to May). If sown in the fall they will come into bloom earlier than if sown in spring, even if the plants do not make much progress during the cold weather.

Annuals are plants that bloom in the first year from seed, and the plant dies after one season. Tender annuals must be sown in spring (April to June) and hardy annuals may be sown in either spring or fall (October to May).

Biennials are plants that bloom the second year from seed, and plant dies after blooming. In California many of these will bloom the first year if sown early. Sow under same conditions as perennials

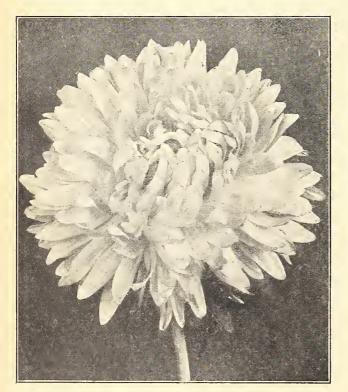

conditions as perennials.

Perennials are plants that bloom the second year from seed, and the plant lives and blooms during successive years. If sown in early spring (February to April 15) many perennials will bloom the first year from seed. Tender and half-hardy perennials are best sown in spring after frost is over (April 15 to June). Hardy perennials are best sown in late summer and early fall (July to October) for next year's flowers.

A & M California Asters

A popular half-hardy annual produced in a great variety of classes, and an almost endless number of colors. The tallest grow about two feet high, and some varieties of dwarfs are not over eight inches high. The best method of culture is to sow the seed in boxes and transplant when large enough to handle. The seed can be sown, however, in the row where the plants are to remain, thinning them from six to twenty inches apart, according to variety.

A & M California Asters are the finest strains and are used extensively by home gardeners and florists throughout the country. We call particular attention to the new A & M American Beauty, A & M King and A & M California Giants. These are highly satisfactory wherever they are grown.

Aster-A & M American Beauty

AMERICAN BEAUTY ASTERS

(Early Flowering)
This newest type has been developed from the late flowering American Beauty and has all of its characteristics, except that it is much earlier flowering. This makes possible a long flowering season for this splendid variety.

	eason for this spicified variety.

AMERICAN BEAUTY ASTERS

(Late Flowering)

This wonderful variety is a recent addition to the popular aster family. It is without doubt one of the grandest. The flowers have in-curved petals and are large and full, often measuring 4 inches across. The plants are of branching habit and the flower stems measure from 15 to 30 inches. The flowers have splendid keeping qualities. We heartily recommend this variety as one which you will be proud to have in your garden. We have a complete list of colors.

A & M KING ASTERS

This is a new California introduction that is admired by all who see it. The flowers are large and double. The petals are quilled, making them distinct form all others and a highly desirable class. They are of upright habits, growing to a heighth of from 18 inches to 2 feet. The stems are long and willowy, making them an excellent variety for cutting purposes. Home gardeners and commercial growers alike are enthusiastic over them and in Southern California the past year they were grown on a large scale for cut flowers, these flowers being shipped long distances to florists. They will do well in most any climate and are even being grown now by florists under glass.

THANK YOU ILLINOIS
"I am very much pleased with your vegetable and flower seeds. They have been most satisfactory and I shall continue to order from you."

Aurera Illinois

Aurora. A & M CALIFORNIA GIANT ASTERS

A new and most worthy Aster for home gardener or florists. The delicately curled and interlaced petals form large fluffy flowers that are most beautiful. They are produced on long willowy stems with fine foliage, but few or no side branches, which makes it possible to have large flowers without having to disbud. A & M California Giants are one of our best cutting varieties, their long stems making them particularly desirable for the commercial grower or home gardener.

HEART OF FRANCE

Heart of France—A rich dark red. The richest, most striking color and not to be found in any other aster. The plants grow about 2 feet high and are of a branching habit. Pkt. 25c, 1/4

MIGNON OR POMPON

A & M Mignon (Pompon)—One of the daintiest and most attractive varieties of Asters. The bright colored flowers are small, about ¾ to 1 inch in diameter, and are produced in great profusion. Excellent for cutting and bedding. Mixed. Pkt. 100, /4 oz. 80c

A & M QUILLED ASTERS

A & M Quilled—An old favorite which has become popular again. The quilled petals give a pompon effect and the flowers often measure 3 inches across. Its keeping qualities excell all other varieties. A variety which retains its bloom and color beyond the time of other popular sorts. Mixed. Pkt. 10c, 1/4 oz. 50c.

SINGLE ASTERS

A & M Single Asters—Single Asters make splendid bedding, border and cut flowers. They resemble daisies, and in this mixture are shades of pink, blue, lavender, rose. The flowers keep well in water when cut. We can supply these in separate color of scarlet, dark blue, lavender, apple blossom, rose and mixed. Pkt. 10c, 1/4 oz. 40c.

OSTRICH FEATHERED ASTERS

(Mid-Season Flowering)

Extremely graceful Aster, with large, loose, feathery heads, unrivaled for table decoration, flowers double and semi-double. The branching habit makes this a conspicuous border plant. Height 18 inches.

QUEEN OF THE MARKET

(Early Flowering)

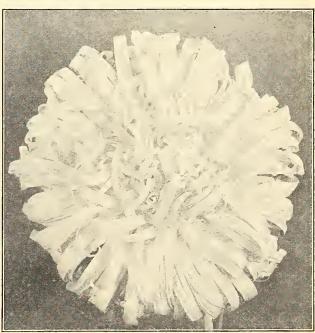

One of the earliest blooming varieties, blossoming frequently in July. Of spreading habit, 12 to 15 inches high. Blossoms medium sized, and the petals curve outward. The best early variety for bedding or edging. Pkt. 10c, 1/4 oz. 35c.

GIANT BRANCHING COMET

(Late Flowering)

The plant grows 24 inches high and about 18 inches in width and the blossoms, which are large and full-petaled, are borne on long stems or branches.

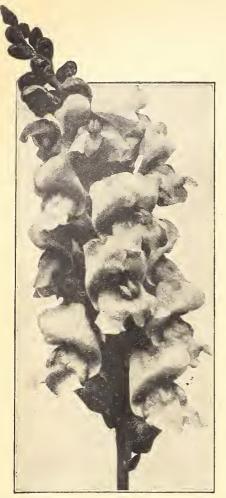

Mixed—Pkt. 10c, 1/4 oz. 50c.

A & M California Giant Aster

ASTER COLLECTION NO. 6F

To encourage you to get acquainted with the several fine varieties of A & M Asters we offer a collection of one packet each A & M American Beauty Purple, A & M King White, A & M California Giant Rose, and Heart of France. Four packets in all of choice colors 85c postpaid,

A & M Silver Pink Antirrhinum

A & M SNAPDRAGONS

(Antirrhinum)

A & M California Snapdragons are the finest strain obtainable. Our fields of these are most beautiful at blooming time and are much admired by all who see them.

The Snapdragon is now one of the most popular flowers. It is easily grown from seed and may be sown practically the year round. They may be had in great variety of separate colors or you may plant the mixed for a brilliant array of color. Be sure to include these in your garden.

Tall Maximum

This is the newest creation in Giant Snapdragons and is far in advance of the older tall type in size and color of flower. Height 4 feet. Greatly in demand for cut flowers.

Canary Bird—Canary yellow, golden center. Pkt. 25c.

Copper King—Copper scarlet. Pkt. 25c. Indian Summer—Velvety copper. Pkt.

Old Gold—Deep golden yellow. Pkt. 25c. Purple King—Deep purple. Pkt. 25c.

Snowflake-White, yellow tube. Pkt. 25c. The Rose-Rose pink. Pkt. 25c. The above separate colors-1/8 oz. 65c.

Finest Mixed—Pkt. 25c, 1/8 oz. 50c. Collection 28F—One packet each of the above seven named varieties \$1.50.

Tall Large Flowering

This type grows about 3 feet tall, the flowers are large and the flower spikes long. Splendid for cutting and tall borders.

Pink-A delicate silver pink. Pkt. 10.

Rose Pink-Bright rose. Pkt. 10c. Deep Rose-Coral rose. Pkt. 10c. Garnet-A velvety, deep red. Pkt. 10c. Scarlet-A velvety bright red. Pkt. 10c.

Golden Vellow—(Golden King) Pkt. 10c. Orange Shaded Scarlet—Pkt. 10c. White (Queen Victoria)—Pure white. Pkt. 10c.
The above tall varieties are also offered in ¼ oz.—50c.
A & M Rose King—Deep rose. Pkt. 15c. Mixed (Pkt. 10c) (¼ oz. 25c.)

Semi-Dwarf Large Flowering

The best for bedding and because of the large flowered compact spike is considered fine for cutting. Height about 18 inches.

Amber Queen—Amber. Pkt. 10c.
Silver Pink—Delicate pink. Pkt. 10c.
Pink—Medlum pink. Pkt. 10c.
Rose pink—Bright rose. Pkt. 10c.
Rose—Coral rose. Pkt. 10c.
Shrimp Pink and Yellow (Prince Ponna) Pkt. 10c.
Orange—Deep orange. Pkt. 10c. (Prima

Scarlet (Defiance)-Pkt. 10c. Crimson (Crimson Queen)-Pkt. 10c. White (Queen of the North)-Pkt. 10c. Golden Yellow (Golden Queen) Pkt. 10c. Rosy Lavender—Pkt. 10c. The above separate colors 1/4 oz. 50c. Semi Dwarf Mixed—Pkt. 10c, 1/4 oz. 35c.

ABRONIA (Sand Verbena)

A hardy annual, trailing in habit, about nine inches high, bearing verbena-like clusters of flowers, which are very fragrant. A native of California. Thrives in dry situations, and is valuable for rock work or hanging baskets. Umbellata—Rosy lilac. Pkt. 10c.

ACONITUM

Monk's Hood
Napellus — Hardy perennial, easily grown and producing long spikes of blue and white flowers. May be planted in partial shade. The seed is slow to germinate. Sow in flats in the spring and transplant. Height 3 to 5 feet. Pkt 15c.

ACROCLINIUM

Hardy annual everlasting flowers, white and self pink with golden centers. Should be cut the first day they open.

Double Rosea—Bright pink. Pkt. 10c.

Double Mixed—Pink and white. Pkt. 10c.

AGATHEA

Sometimes referred to as the Blue Marguerite. Plants dwarf and compact, covered throughout a long season with myriads of small Blue Marguerite-like flowers. These are splendid for cutting purposes. Pkt. 10c.

ANCHUSA ITALICA

Dropmore Variety—One of the best hardy perennials, growing 3 to 5 ft. high, and having long loose sprays of lovely forget-me-not-like flowers of a rich gen-tian blue. Is very free flowering, bloom-ing over a long season. Pkt. 10c.

AMMOBIUM

Hardy annual everlasting flowers. Pure white and very double. Pkt. 10c.

AGERATUM (Floss Flower)

A hardy annual of easy culture, especially valuable for bedding, as it is literally covered with blossoms all summer. Sow the seed early in the spring, either in boxes to transplant, or out of doors, and thin to four to six inches.

Blue Perfection—Deep blue, one foothigh. Pkt. 10c.

Mixed—Pkt. 10c. 1/4 oz. 25c.

ANAGALLIS

Grandiflora Mixed-Very desirable annual for edging and rock gardens. Height 6 in. Pkt. 10c.

AQUILEGIA (Columbine)

A hardy perennial of graceful habit growing about two feet high. The flowers are attractive and beautifully adapted for cut flowers. They may be successfully grown in partial shade. Fall sown seed will bloom the following spring. If sown in early spring will often flower the same season. Time required for seed to germinate is 12 to 60 days. Sow seeds in flats and transplant.

Long Spurred Hybrids—This is the Elliott strain, conceded to be the finest grown. Colors are mixed, stems extra long, fine for cutting. Pkt. 35c.

Long Spurred Blue Shades—Large flowers in most charming colors of blue. Pkt 25c.

Long Spurred Pink Shades—Containing

Long Spurred Pink Shades—Containing a variety of pink to rose shades. Pkt. 25c. Collection 7F—One packet each of the

Columbine

ANEMONE (Windflower)

Giant French Single Mixed—This lovely flower may be grown from seeds as well as bulbs. Our seed has been saved from an extra fine strain and contains a very choice mixture of colors. The seed may be sown in the fall or spring in seed bed or flats. We suggest that the seed be covered lightly with sand, then spread a thin cloth over the bed and water through this. The plants form bulbs which should be given the culture as recommended in our bulb catalog. Pkt. 25c.

Arctotis Grandis

ARCTOTIS GRANDIS (African Lilac Daisy)

Large pearly white Marguerite-like flower, with delicate mauve center sur-rounded by a narrow golden band. The whole plant is covered with white down. Half hardy annual. Height 2 feet. Pkt.

ALYSSUM

ALISOUM

A fragrant hardy annual having the odor of honey and bearing spikes of small white flowers in great profusion throughout the winter, spring and summer. Without a doubt the best white border plant, is also useful for beds and baskets and will begin to bloom when quite small.

small.

Carpet of Snow—Very compact, growing about three inches high, one plant often having a diameter of 15 inches. Pkt. 10c. 1/4 oz. 25c.

Little Gem—Grows 4 to 6 Inches high. One of the finest for low beds and borders. Pkt. 10c. 1/4 oz. 25c.

Sweet White—The tallest of this group, growing 8 to 12 inches. A profuse bloomer. Pkt. 10c. oz. 30c.

Lilac Queen—A delicate lilac (dwarf). Pkt. 10c, 1/4 oz. 25c.

Saxatile Yellow—A perennial variety of pleasing yellow color. Height 1 ft. Pkt. 10c, 1/4 oz. 25c.

AUSTRALIAN PEA VINE (Dolichos Lignosus)

A rapid growing evergreen climbing perennial, flowering freely in large clusters of rose flowers. For covering arbors, trellises, etc., they have no superior. Pkt. 10c, 1/4 oz. 50c.

ASPARAGUS FERN

Plumosus—A tender perennial for green-house or potted plant use, with long, fine, feathery foliage. The sprays when cut, retain their freshness in water from three to four weeks. Seeds start slowly and should be soaked in water before sowing. Pkt. 10c. 100 seeds

Sprengeri—A hardy variety. Used as a pot plant. Suitable in groups of potted flowers or in hanging baskets. Pkt. 10c. 100 seed 45c.

AMPELOPSIS

Quinquefolia (Virginia Creeper) — A very popular climber. Hardy perennial. Seed may be sown any time of the year. During the summer the foliage is green, changing to various shades of bronzy red during the fall. Pkt. 10c. Veitchi (Boston Ivy)—A valuable perennial climber which grows rapidly, clinging to brick and wood. The leaves are deep green, changing to scarlet in the fall. Pkt. 10c.

ARMERIA

Formosa—Fine plant for permanent border or rock garden and does well on the sea coast. Flowers rose pink. Height about 9 in. Pkt. 10c.

AMARANTHUS

Hardy annuals, grown especially for their brilliant foliage.

Hardy annuals, grown especially for their brilliant foliage.

Caudatus (Love Lies Bleeding)—Light yellowish-green foliage; long, drooping crimson flower spikes. Plants grow three feet high. Pkt. 10c, oz. 30c

Sunrise—The most brilliant variety, large bronze red foliage growing on branches from 3 to 6 ft. tall. The foliage at the end turning a brilliant scarlet. Pkt. 15c, 1/4 oz. \$1.00.

Salicifolius or Willow-leaved—This variety is like the above except that the foliage is fine, giving a drooping, graceful effect. Pkt. 10c, 1/4 oz. 50c.

Tricolor (Joseph's Coat)—The leaves of this variety are green, red and yellow. Pkt. 10c, 1/4 oz. 50c.

Molten Fire—Very attractive, the top leaves being bright crimson and the lower maroon. Pkt. 15c, 1/4 oz. \$1.00.

BALSAM

(Touch-Me-Not)

A tender annual, with brittle stems and foliage. Flowers both single and double, in bright colors and variations are wax-like and very attractive. The individual blossoms floating in a dish of water exhibit their beauty to the best advantage.

advantage.
Improved Double Camelia Flowered—In its extraordinary size, perfect form and brilliant colors, this fine strain of balsams surpasses all others. Height 18 inches. Pkt. 10c.
Rose Flowered—Handsome double flowers in form resembling a rose, Height 18 inches, fine mixed. Pkt. 10c.
Spotted—Large semi-double flowers well adapted for borders, fine mixed colors, Pkt. 10c.

well adapted f colors. Pkt. 10c.

A & M Balsam

BARTONIA AUREA

A showy California annual. Lovely large golden yellow flowers which glisten like satin in the sunshine. The height is about 18 inches, making them very desirable for bedding and cutting. Pkt. 10c.

BEGONIA

Very attractive flower for both pot and bedding use and should be more exten-sively grown for shady borders. Peren-nial Semperflorens Mixed, Pkt. 25c. Gracilis Luminosa—Large bright, scar-let flowers. Foliage reddish brown. Pkt.

BALSAM APPLE (Momordica)

A climbing annual, growing about 10 feet long. Has graceful and ornamental foliage, yellow flowers and warted golden yellow fruit, with large carmine red seeds. Thrives in hot locations, and is much planted around Bakersfield. Pkt. 10c, oz. 75c.

BALLOON VINE

Climbing annual, with small flowers. The seed pods are curiously swelled or puffed and are quite attractive. Pkt. 10c.

A & M DOUBLE DAISY (Bellis Perennis)

A hardy perennial, blossoming freely all spring and summer. Plant is about four inches high and is valuable for borders.

ders.

Extra Double Red—A variety of more recent introduction. Pkt. 15c.

Snowball—A clear, extra double white variety. Pkt. 15c.

Extra Double Pink—A beautiful shade of pink. Pkt. 15c.

Double Mixed—Pkt. 10c.

BRACHYCOME **IBERDIFOLIA** (Swan River Daisy)

A charming annual deserving greater popularity. The plants, which grow about 10 inches high, are covered with Cineraria-like blooms in shades of blue and lavender. Mixed—Pkt. 10c.

CANNA

A perennial growing 3 to 6 feet high. Suitable for bedding and back grounds. Plants have bright flowers and ornamental leaves. Soak seed in tepid water several hours before planting.

Crozy's Varieties—New large-flowered and free blooming variety. Height 3 ft. Mixed, Pkt. 10c.

Good Mixed—Height 5 to 6 ft. Mixed, Pkt. 10c.

Pkt. 10c.

A & M CALENDULA

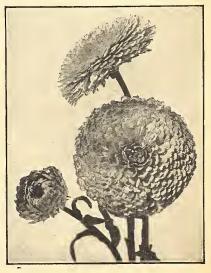

Very hardy annual, one foot high, blooming freely practically the whole year round. It is one of the easiest culture and is desirable for rather inferior soils, where less sturdy flowers do not thrive. Calendulas make one of our finest winter flowers. A hard frost will not nurt them. In fact, the flowers are larger and finer during the winter and spring months.

Ball—A very fine new sort of glistening orange yellow. Large double flowers on long stems. Center of flower is a few shades lighter in color. Pkt. 15c, 1/4 oz. 50c.

Orange King (New)—Bears giant flowers sometimes 3 inches in diameter. Color pure orange. Pkt 10c, oz. 40c. Lemon Queen—Like the above, but of pure lemon. Pkt. 10c, oz. 40c. Favorita—Large fine flowers of deep cream with the petals edged yellow. Pkt. 10c. oz. 40c

cream with the petals edged yellow. PKt. 10c, oz. 40c, Collection 9F—One packet each of the above four named sorts 35c.

Double Mixed—A good mixture of 8 or 10 different shades of yellow and orange; some clear colors and some shaded and striped. Pkt. 10c. oz. 25c.

Calendula-A & M Orange King

CANDYTUFT UMBELLATA

Excellent for Borders and Beds of Solid Color

This charming annual should be freely planted in all gardens for display or for cutting purposes. As may be noted in the illustration, the flowers are borne in umbells and when the plant is in full bloom it is indeed beautiful. Beds or borders of solid colors are most attractive and we suggest solid colors further for the reason that when one color is planted in a row or bed the plants are of uniform height, presenting a most pleasing appearance. Local florists find it a most satisfactory cut flower and it is planted quite freely for that purpose. Seed germinates in 5 to 10 days and it may be started in beds or flats and transplanted when several leaves are formed.

plants are more dwarf and compact. Excellent for
borders. Mixed Pkt. 15c, 1/4 oz. 25c.

Umbellata Candytuft

Candytuft, Giant White Hyacinth Flowered

CANDYTUFT

Glant White Hyacinth Flowered—A giant Candytuft, bearing immense snowy white spikes, which often measure 10 inches or more. Don't fail to give this a trial. Pkt. 10c.

Coronaria Empress—Large trusses of pure white flowers, one of the finest candytufts yet raised. Pkt. 10c.

CARNATION

Our strain of these popular flowers is unsurpassable in beauty and variety of coloring; also in their delightful fragrance. Seed should be sown in pots or boxes and when 2 to 3 inches high, may be transplanted to the open bed or border, giving shade until the young plants have become established. Sow any time between March and September.

Chaubaud's Everblooming French Carnation

CANARY BIRD FLOWER (Tropaeolum-Canariense)

A tender, climbing annual of the nasturtium family. Blossoms have curiously winged petals and are light yellow. Pkt.

CELOSIA PLUMOSA (Feathered Cockscomb)

Plumosa Mixed—A very fine selection of the popular feathered Celosia containing many pleasing shades of color varying from pale yellow to the deepest crimson. Pkt. 10c.

CELOSIA CRISTATA (Cockscomb)

Very ornamental and strong plants, producing magnificent combs of velvety looking flowers. They succeed well in the garden and make very attractive pot plants. Sow seed in the spring only, for they are very tender and will stand no frost. You will like these.

Dwarf Mixed—A mixture of rich velvety colors. Height 10 inches. Pkt. 10c.

Tall Crimson—Brilliant crimson combs borne on stems about 2 ft. tall. Pkt. 10c.

Tall Mixed—Contains shades of crim-son and yellow. Height 2 ft. Pkt. 10c.

CELOSIA CHILDSII (Woolflower)

A new annual of great merit. As the name suggests, the flower resembles huge balls of wool. When cut, if it is hung head down until dry, makes a beautiful everlasting flower. Height 15 inches. A & M Mixed, Pkt. 15c.

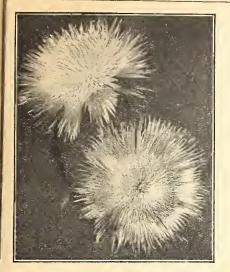

CELOSIA CHRYSANTHEFLORA

This is a new variety of Celosia obtained by crossing different species. The heads are very full and large and may be cut and dried as an everlasting flower. They are much admired for their velvety appearance and varied colors. Celosia are easily grown from seed which should be sown in the spring. Pkt. 25c.

CLEMATIS

A very fine hardy climber; leaves bright and glossy green; flowers small and hawthorne scented, and just cover-ing the plant when in bloom. Excellent for covering trellises or fences.

Paniculata-WhitePkt. 10c Hybrids Mixed—This mixture contains beautiful shades of lavender, purple, white, etc. Pkt. 10c.

Centaurea Imperialis

CALIFORNIA WINDBREAK (Lavatera Assurgentiflowa)

(Lavatera Assurgentiflowa)
This perennial shrub is easily grown
from seed, is very drought resistant and
makes one of the quickest and best windbreaks known in California. Is used extersively as a windbreak for vegetable
gardens and chicken ranches. The first
year from seed it will grow to a heighth
of at least 6 feet and flower, the flowers
being an attractive shade of red. (10c
per pkt.) (50c per oz.) (1/4 lb. \$1.75).

CARDINAL CLIMBER

A new annual climber of great merit, bearing a mass of small crimson flowers. Height 10 to 15 feet. Pkt. 15c.

A & M CANTERBURY BELLS

Campanula Medium—A hardy biennial, blooming the second year from seed, or the first if sown early. Grows about three high.

CENTAUREA CANDIDISSIMA

True Dusty Miller-Broad silvery white foliage; useful for edging. Height 12 inches. Pkt. 10c.

CENTAUREA CYANUS (Corn Flower or Bachelor's Button)

This old fashioned hardy annual is still a great favorite for cutting purposes. The deep rich blue is the most popular. The mixture contains shades of pink, white, lavender and blue.

Double White—This variety is absolutely pure white and is very double. A splendid cutting flower. Pkt. 15c.

Double Blue—A pleasing shade of blue but of much more substance than the single kind. Height 2 to 3 feet. Pkt. 10c. 1/2 oz. 35c.

Double Pink—Bright pink. Pkt. 10c. Double Mixed—Pkt. 10c, oz. 40c.

CENTAUREA AMERICANA

Beautiful thistle like flowers 4 inches in diameter. Annual. Height 2 feet. White, Pkt. 10c. Lilac, Pkt. 10c

CINERARIA

For shaded situations such as the north side of the house, under palms, trees, etc., the Cineraria is ideal. It is best etc., the Cineraria is ideal. It is best treated as an annual and under favorable conditions if the seed pods are left to mature, it will reseed itself. In Southern California seed should be sown in flats July to November Soil in the flats should consist of one part loam, one part leaf mold and one part sand. Set the flat in a cool shaded place such as north side of a building and keep well watered. 8 to 10 days are required for germination.

A & M Semi Dwarf—This is an extra-ordinary strain selected for large flowers, uniform height of plants and the most attractive colors. They may be used as pot plants or for bedding purposes and we especially recommend them to those who want the very finest strain. Pkt. 75c, 1-16 Oz. \$15.00.

Hybrida Large Flowering Dwarf — A large flowering dwarf strain, having brilliant colored flowers and is especially good for outdoor bedding. Pkt. 25c.

CLARKIA

A hardy annual of easy culture, growing about 18 inches high and flowering in great profusion. Native of California. Seed sown in the fall will give early blossoms in the spring. Seed may also be sown in the spring and summer. Will grow in shade or sun.

Double Mixed—The long sprays of bloom resemble sprays of peach blossoms and are very showy. They make beautiful cut flowers and may be had in lovely shades of pink, rose, salmon, etc. Pkt. 10c.

COBAEA SCANDENS (Cup and Saucer Vine)

A perennial climber of rapid growth; very valuable for covering trellises, arbor, trunks of trees, etc. Will cling to any rough surface, often attaining a height of 30 to 40 feet in one season. The large, bell-shaped flowers are very attractive.

attractive

tractive.
Scandens Alba—White flowers. Pkt. 10c.
Scandens Purpura—Purple flowers. Pkt.

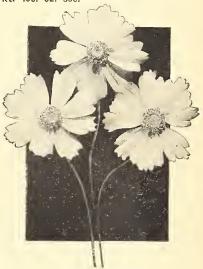

COLEUS

These ornamental foliage plants are very popular for growing in protected borders or for pot culture. They are tender perennials but make a satisfactory growth from seed the first year. A very interesting plant to grow from seed, for many new and fine color combinations are obtained in this way.

Extra Choice Mixed—Pkt. 25c.
Choice Mixed—Pkt. 15c.

COIX LACHRYMAE ("Job's Tears")

Curious ornamental grass with broad corn-like leaves and seeds of a light slate color. Valuable for winter bouquets with everlasting flowers. Strings of handsome beads are made from the seeds. Hardy annual; three feet high. seeds. Hardy an Pkt. 10c. oz. 30c.

Coreopsis Lanceolata

COREOPSIS (Lanceolata Grandiflora)

This is a hardy perennial bearing a profuse and long continued succession of large, bold, golden yellow flowers during the spring and summer months. It is a splendid cut flower, the stems are long and the flowers keep well in water. Seed sown in the early spring will flower the same season. Seed may also be sown in in the fall. Height 2½ ft. Pkt., 10c.

CHEIRANTHUS LINIFOLIUM

Bright mauve flowers, excellent for small beds and rockeries. Height 9 in. Very free flowering biennial. Pkt. 25c.

CYPRESS VINE (Ipomea Quamoclit)

A tender climbing annual with fern-like foliage and small star-like red or white flowers. A beautiful vine for grow-ing in porch boxes, hanging baskets, etc., or for covering trellises. Soak the seed 3 hours before planting. Mixed Pkt. 10c.

THANK YOU RIVERSIDE

"The roses you sent me last month are splendid, growing beautifully. Many thanks for courtesy in choosing such fine plants." Riverside, California.

Crested or Anemone Flowered Cosmos

COSMOS

A garden favorite producing an array large artistic flowers in pink, white d crimson shades. The Early Flower-

of large artistic flowers in pink, white and crimson shades. The Early Flowering varieties may be sown from early spring to late fall and they will bloom within 60 to 75 days after planting.

The late varieties are autumn flowering and should be planted in late spring or during the summer.

Sow seed in the open ground where plants are to remain, or they may be transplanted from seed bed or flats. When plants are about 10 or 12 inches high the tops should be pinched out to make a branching plant.

EARLY GIANT COSMOS

Sow the seeds of these in the early spring to late summer. They are very large flowering and excellent for garden show or for cutting:
Early Giant Pink ... Pkt. 10c, 1/4 Oz. 25c
Early Giant Crimson Pkt. 10c, 1/4 Oz. 25c

LATE CRESTED COSMOS

The large crested flowers produced abundantly on plants, equal in size to the late Giant sorts, present a most striking appearance. We offer this new sort in mixed colors only this year. Pkt. 25c.

KLONDIKE COSMOS

Autumn Flowering
A handsome variety for late autumn. blooming. Flowers are brilliant orange yellow and very large. The foliage is quite different from other Cosmos, being rather lacy and dense. It requires a long growing season, so must be planted during spring and early summer. Pkt. 25c, 1/4 OZ 50c. Oz. 50c.

CYCLAMEN

A tender, bulbous perennial, used in greenhouses and window gardens. It is easily grown from seed. Sow in the fall or early spring. A & M Choice Mixed Pkt. 35c.

CYNOGLOSSUM

Amabile (Chinese Forget-me-not)—A biennial 18 in, high, producing beautiful blue flowers. Much appreciated in dwarf borders, also as cut flowers. Pkt.

DELPHINIUM (Perennial Larkspur)

(Perennial Larkspur)
One of the finest garden flowers and becoming increasingly popular both for garden show and for cutting. Seeds sown in beds or flats during August, September, October and November will bloom the following spring. Cover the seed lightly and shade the seed bed during August and September. The first transplanting may be made when plants are sufficiently large, spacing them about 6 inches apart. After they have bloomed the first time select the most desirable plants and transplant them to a permanent place in the garden. Spray the plants occasionally with Bordeaux Mixture to prevent Mildew. Seed germinates in about 20 days.

Sunbeam Hybrids

Although individual named sorts do not generally reproduce themselves from seeds true to name or color nevertheless a carefully selected strain with good parentage is superior in all respects. Under proper cultivation the long, graceful spikes of Sunbeam Hybrids grow to a height of 3 to 5 feet and furnish abundant bloom for cutting. Seed is selected from only fine specimen plants of the most attractive blue and lavender shades. Flowers produced from this strain form some wonderful color combinations and might often be compared to those of the Orchid. Per Pkt. \$1.00. Although individual named sorts do not

A & M California Hybrids

Beautiful double flowers of lilac and light blue combinations. The spikes are long and graceful flowers are well placed and the habit of growth is robust, with many branching laterals. Per Pkt. 50c.

Gold Medal Hybrids

The finest hybrids to be found in Delphinium and all the lovely blues, lavenders and mauves are in this mixture. The plants are vigorous growers, producing tall, handsome spikes. Pkt. 25c, 1/8 oz. 75c.

Belladonna

A lovely turquoise blue, which is a continuous bloomer. Splendid for cutting This is the tall Delphinium so often seen in beds and borders and as cut flowers in the florist shops. Pkt. 25c, ½ oz. \$1.50.

Bellamosa

A rich deep blue in color and of the same type and habit of growth as the Belladonna. The two grow beautifully together. Pkt. 25c, 1/8 oz. \$1.50.

Cardinale

Scarlet perennial Larkspur. This handsome native flower grows to a height of 4 feet or more and produces its brilliant flowers during the early summer months. Pkt. 15c, 1/8 oz. \$1.00.

Chinensis Azure Fairy

A lovely azure blue Delphinium flowering from the seed the first season if the seed is sown in early spring. The height is twelve to eighteen inches. May be used for bedding, borders and cut flowers. Pkt. 10c, 1/8 oz. 50c.

Chinensis Blue Butterfly

A fine dark blue of the same type as Azure Fairy with which it is often grown. Pkt. 10c, 1/8 oz. 50c.

Chinensis Fine Mixed

A very pleasing mixture containing dark blue, light blue and white, that blooms the first year from seed sown in the early spring. Pkt. 10c, 1/8 oz. 50c.

Tom Thumb Blue

A lovely compact border delphinium growing to a height of about 12 inches. Color ultramarine or dark blue. Pkt. 25c, 1/8 oz. \$1.50.

DATURA (Trumpet Flower)

Handsome ornamental annuals with large showy flowers. Grows to a height of 3 feet, will flower continuously throughout the summer. Pkt. 10c.

DAHLIA SEED

A & M California grown dahlia seed is harvested at the end of a long growing season after the best and most double varieties have had ample time to form good mature seeds. This is not possible in other localities where growth is stopped early by frost. All of our dahlia seed is handpicked and carefully cured. Culture—Sow seed in flats, covering lightly with sand, screened leafmold or similar material. Place a square of burlap on top of seed bed and keep moist until seed is germinated, removing the burlap as soon as sprouts appear. When plants are 4 or 5 inches high pot them and when well established transplant to the garden. Dahlias from seed will bloom the first season about four weeks later

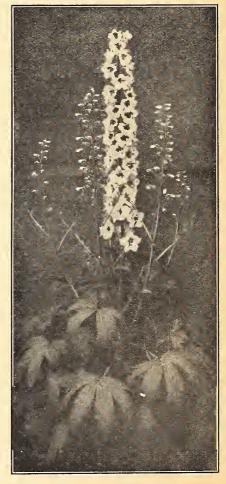

and when well established transplant to the garden. Dahlias from seed will bloom the first season about four weeks later than from tubers.

A & M Prize Mixed—All handpicked from the very finest, large flowering and double varieties which, from trial tests, have proven to be excellent parent plants. Many wonderful seedlings have resulted from this strain of seed and many customers have written to us telling of their successes. In packets containing a liberal quantity of seed. Per pkt. 75c.

Decorative—Seed selected from some of the very finest Decorative Dahlias, including those listed as tubers in this catalogue. These seeds are produced in the field where flowers have the advantage of natural cross fertilization. No seed is saved from inferior varieties. Pkt. 50c.

Cactus—Our mixture contains many of

Cactus—Our mixture contains many of the recent novelties. Giants with pointed petals. Extra Choice Mixed—Pkt. 25c.
Hybrid Cactus—This seed is selected from Dahlias of the Hybrid Cactus type.
Only those Dahlias of merit are selected as seed producers. Pkt. 25c.
Pompon Mixed—The small double dahlias so much prized for cutting. Pkt. 15c.

Delphinium-Gold Medal Hybrids

Shasta Daisy

SHASTA DAISY

This popular flower has been much improved and the Alaska is the finest of all. The Shasta Daisy is noted for its keeping qualities as a cut flower. 'They should be planted in the fall or early spring. If planted in late fall will not bloom until the following spring.

Alaska—The finest. Pkt. 15c. Ordinary—Pkt. 10c.

DIDISCUS COERULEUS

(Blue Lace Flower)
This beautiful lace flower is a very attractive cut flower of a lovely blue shade and is most effectively used when mixed in bouquets. The culture is easy and being a hardy annual may be planted from early spring to late summer. If you like to raise your own cut flowers you like to raise your own cut flowers you will be glad to have this in your collection. Pkt. 15c.

DIANTHUS OR PINKS

Hardy annuals, about 1 foot high, and bearing beautifully colored single and double blossoms in profusion all summer. Sow seed easly in boxes and transplant, or sow in rows where are plants are to remain, and thin. They are largely used for border, massing in beds and for cutting. There is a wide range of colors from purest white through all shades of pink to deepest red. pink to deepest red.

Double Annual

Chinensis, Double Mixed, Pkt. 10c. Heddewidi, Double Mixed, Pkt. 10c.

Single Annual

Heddewigi, Single Mixed, Pkt. 10c.

Perennial

Plumarlus (Grass Pinks)—A hardy perennial pink used for borders and cutting and producing a constant bloom of flow-

ers of varied hues.

Double Grass Pink, Mixed, Pkt. 10c.
Single Grass Pink, Mixed. Pkt. 10c.
Collection No. 15F—One packet each of
the above 5 Pinks 35c.

DIGITALIS (Foxglove)
A hardy perennial, blooming the second year from seed. Grows usually about 3½ feet, although in very rich soil sometimes 6 feet. The bell shaped flowers are borne on long spikes, and come in shades of purple, lavender, rose and white, all spotted lightly inside the blossom. Thrives best in cool, shady locations. Giant Shirley Mixed—Pkt. 10c.

DOLICHOS OR HYACINTH BEAN

Tender, climbing annual. Grows rapidly and is valuable for covering a trellis. Flowers in purple and white. Sow seed in open ground late in April. Mixed—Pkt. 10c.

DUSTY MILLER

See Centaurea Candidissima.

EVERLASTING FLOWERS

EVERLASTING FLOWER COLLECTION

Collection No. 16F—One packet each Acroclinium Rosea, Ammobium, Gomphrena Mixed, Helichrysum Mixed, Statice Perezii, Rhodanthe and Xeranthemum. Special 50c.

EVERLASTING PEAS

See Lathyrus Latifolius.

Didiscus (Blue Lace Flower)

EUPHORBIA

(Snow on the Mountain)

Very pretty annual plant with white and green edged foliage. Easy to grow. Height 2 feet. Pkt. 10c.

ERYNGIUM

Amethystinum—Perennial with thistle-like flowers of amethyst blue color borne on stems of bluish-green tinge. Very effective in a dried state and much in demand by florists. Height 2-3 feet. Pkt. 25c, 1/8 oz. 75c.

DIMORPHOTHECA (The Golden African Daisy)

A showy annual from South Africa which has become a great favorite on account of its easy culture and beautifully colored flowers. The colors include all shades of yellow, orange, cream and white and massed in beds or wide borders they have a very brilliant effect. They may be planted during the fall, spring or summer.

Aurantiaca-Brilliant orange. Pkt. 10c. Hybrids-Mixed Colors. Pkt. 10c.

THANK YOU SAN DIEGO

"Your seeds give the utmost satisfac-tion. I am especially delighted with the Gaillardia seed I obtained from you last spring. The varieties are wonderful."

San Diego, California.

FOXGLOVE

See Digitalis.

FORGET-ME-NOT (Myosotis)

A hardy perennial with small blue star-like flowers borne in clusters on long stems. Will bloom the first year if sown early and does best if sown in a box and then transplanted to a cool moist situation.

Alpestris Tall — Light blue flowers, strong, long stems and vigorous growers make this a popular variety. Pkt. 10c.

FOUR O'CLOCK (Mirabilis)

Also called Marvel of Peru. A hardy annual of easy culture, growing about 2 feet high. The plant is free flowering, bearing blooms of a great variety.

Mixed-Pkt. 10c.

FREESIA

These dainty little popular flowers may be grown from seeds or bulbs. They flower very early in the spring and are one of the most delightfully fragrant flowers in cultivation. Freesias are easily grown from seeds and will bloom the following spring if sown in the fall.

Purity—White. Pkt. 10c.

Appreciation from Modesto, Cal.

All ye who would be gardeners to my words give heed,

Aggeler & Musser keep the best kind of seed:

Vegetable and flower, they all produce their kind,

Whatever they say about them is honest truth, I find.

I've but a small garden, but of seed I want the best,

Their seed, like "Ben Abou Adhein," excelleth all the rest.

SEE INSIDE BACK COVER FOR A & M PLANTING CHART

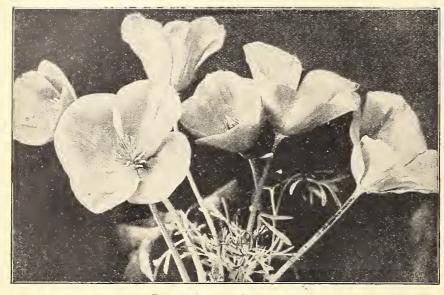

Dimorphotheca Aurantiaca

A & M California Poppy

A SUGGESTION

On your automobile and hiking trips take with you a few ounces of California Poppies and scatter the seeds along the way. Remember that every wild flower picked reduces the amount of seed matured. picking them and to scatter a few seeds as you go will assist in preserving the beautiful natural California flora we all so much enjoy.

Eschscholtzia California Poppy

ESCHSCHOLTZIA (California Foppy)

Hardy annual. Seed may be sown from October until April. Fall sown seed will bring large early flowers.

Some wonderful new varieties have been produced recently. Remarkable color combinations which make striking beds and splendid cut flowers. California Poppies have a long blooming season which may be prolonged by cutting off the seed pods. Sow poppy seeds on vacant lots and other spaces from October to March and let the winter rains germinate the seed.

Standard California Poppies

Aurantiaca—The true California Poppy.
Color is deep orange. Pkt. 10c, oz. 30c, ¼ lb. \$1.00, lb. \$3.00.
California White—A re-selected pure white. Pkt. 10c.
California Golden West—Yellow with orange center. Pkt. 10c.
California Crimson—Carmine Crimson. Pkt. 10c.

kt. 10c. California Chrome Queen-Amber yel-

w. Pkt. 10c.
Collection No. 19F—One packet each of ne above 5 named varieties 40c.
California Mixed—Pkt. 10c, oz. 30c, ½

NEW FLUTED AND RUFFLED VARIETIES

Orange Flame-Vivid orange - scarlet and most striking of all the new colors.

The plants are very erect and compact and would do for borders. Pkt. 15c, 1/4 oz. 50c.

Ballet Girl—The outside of the petals is an intense carmine, the inside a light cream, making a contrast of colors both beautiful and startling. Pkt. 15c, 1/4 oz. 50c.

Tango—A bronzy red overlaid terra cotta. This variety was introduced recently and found immediate favor. Pkt. 15c, 1/4 oz. 50c.

To Grow Poppies

In Southern California and similar climates sow the seeds of all poppies from October to March. Sow the seeds where the plants are to remain. To hold the moisture and insure good germination place burlap bags or cheese cloth on top of the seed bed or row,

Mauve Beauty—An entirely new color. Is a beautiful shade of pure mauve. Pkt. 15c, 1/4 oz. 50c.

Lovely—True to its name this variety is a bright rose pink suffused with salmon. The blooms have a satiny appearance which adds much to their loveliness. Pkt. 15c, 1/4 oz. 50c.

The Geisha-The inside of the petals is a brilliant gold and the outside orange-crimson. The petals are fluted, which makes the open flowers very attractive. Pkt. 15c, ¼ oz. 40c.

removing them just as soon as the tiny sprouts appear. Removal of the covering at the proper time is important, for leaving them too long will weaken the plants. Cultivation of poppies and all other plants during the winter months is quite necessary. Well cultivated soil absorbs the heat from the sun, allows a

Scarlet Beauty—The brightest color of all, being a deep scarlet and as the plants are erect and the flowers large it gives the effect of vivid scarlet tulips. Pkt. 15c, 1/4 oz. 50c.

Vesuvius—A very odd color of wall-flower red. Pkt. 15c, 1/4 oz. 30c.

Extra choice mixed - Contains above, also many other of the newer colors. Pkt. 15c, oz. 90c.

Collection No. 17F—One packet each of the above named 8 varieties 75c.

Collection No. 18F-1/4 oz. each of the above named 8 varieties \$3.00.

free circulation of air and provides good growing conditions generally. Poppy seeds are small and all small flower seeds should be planted to a depth of about twice the breadth of the seed itself. Use a light covering such as leafmold or a similar material. For a complete list of poppies see poppy page.

GERANIUM

A half-hardy perennial, flowering the first year from seed if sown early. A gorgeous flower of numerous shades of color; bearing continuously renders this one of the most popular plants grown.

Choice Varieties Mixed-This choice mixture includes many of the newest and finest sorts. Pkt. 25c.

Lady Washington Mixed-A very popular variety of geranium. The flowers are particularly beautiful. It is very interesting to grow from seed, many extra choice varietles are often obtained. Pkt. 25c.

GEUM

A beautiful hardy perennial producing flowers in profusion from spring till fall. It is an excellent cut flower, having long stems and keeping well.

Mrs. Bradshaw's Double Red—Large bright orange-scarlet double flowers. Pkt. 15c.

Lady Stratheden—A very striking double yellow flower, very large. Pkt. 35c.

GOMPHRENA

Entirely different in appearance from any other everlasting flower, and very attractive. Has a globe-shaped flower resembling a clover blossom which when cut and dried holds its shape and color

Mixed Pkt. 10c., 1/2 oz. 25c.

GLADIOLUS SEED

Of especial interest to our customers who grow gladioli from seed, is the announcement that we have been able to obtain, from a prominent grower, a very choice mixture of seed of the best and most expensive varieties. The seed should be sown in a well prepared seed bed where the young plants may be allowed to remain for a year. If covered with ¼ inch of sawdust and kept moist, the seed should germinate in two to three weeks. Many varieties will bloom the first year and a bed of well grown seedling gladioli, when in bloom, presents a gorgeous variation of color and type and is a real source of pride and satisfaction to its owner. Per packet 25c. nouncement that we have been able to

Gypsophila Elegans

GAILLARDIA

Beautiful show plant, remarkable for the profusion, size and brilliancy of its flowers, continuing in bloom from early summer till late in the fall. Excellent for beds, borders, or for cutting. Height for beds, 18 inches.

Grandiflora—Single perennial variety
of varying shades of reddish brown and
yellow. Pkt. 10c.
Picta Lorenziana Double Mixed—Large

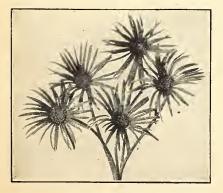

heads of bright yellow and red flowers. Very double, with quilled petals, suit-table for bouquets. Pkt. 10c.

Portola—A new variety with flowers measuring 4 inches across. They are very striking in appearance, the petals being of brilliant scarlet, tipped golden yellow. Pkt. 15c.

GERBERA

(Jamesonii Hybrids).

Large daisy-like blossoms with flower stems rising to a height of about two feet. Is also called Transvaal Dalsy. Colors range from white to crimson, pink, rose, yellow and lilac shades. Flowers both summer and winter. Start carefully under glass and grow in a sandy, well drained soil if possible. Pkt. 25c.

Gerbera

GYPSOPHILA

A hardy annual of easy culture. Grows two or three feet high, and bears a pro-fusion of small star-shaped white or pink flowers.

Elegans Grandiflora — Annual white. Very largely grown by florists for use in bouquets. Pkt. 10c, oz. 25c.

Elegans Carmine—A recent introduction of a deep carmine. Pkt. 10c., oz. 30c.

Paniculata—Fine for bouquets; white flowers, perennial. Pkt. 10c.

GILIA

Capitata-Graceful annual, growing to Capitata—Graceful annual, growing to a height of about 2 ft. and bearing beautiful, globular flowers about one inchin diameter. Color a rich lavender blue foliage is feathery and very pretty. A native of California, easily grown and very effective for mixing with bouquets. Sow seed in fall, where plants are to remain. Pkt. 10c, 1/4 oz. 25c.

GODETIA

A hardy annual, very valuable for bedding and borders. For mass effects in shades of rose, red or pink it is unexcelled. The satiny cup-shaped flowers cover the compact-growing plants. The seed should be sown in the fall or early spring. spring.

Appreciation from Lodi, Cal.

The pansies of this kind (Super Maximum) that I got from you are still blooming with extra large blooms and did wonderfully well all year.

HELIOTROPE

A half-hardy perennial growing four to eight feet high. Small flowers, borne in graceful clusters and very fragrant. Blooms the first season from seed if sown early. Forms a large plant and requires a roomy situation.

Finest Mixed—A mixture of the best types in shades of white, mauve and purple. Pkt. 10c.

HUMULUS (Japanese Hop)

A rapid growing ornamental climber covering arbors, trellises, etc. in one season. The foliage resembles the common Hop and is very luxuriant, making a dense vine. Will stand extreme heat and remain green until frost. An annual

Japonicus—Green foliage and a strong grower. Plant seed in Spring after soll has begun to warm. Pkt. 10c, ¼ oz. 25c. Japonicus Variegatus—B e a u tifu lly splashed and striped with silver. Pkt. 10c

HIBISCUS

Finest Mixed—Beautiful shrub-like plants growing from 3 to 5 feet high. The flowers are 4 to 5 inches in diameter and our mixture contains many bright and varied colors. Perennial. If sown early in the spring will bloom the first year, and it is a good idea to cut the plants back after blooming. Pkt. 10c.

HEUCHERA

Sanguinea—Hardy perennial 1½ feet high. Very easy to grow. The crimson-scarlet flowers are fine for cutting. Pkt.

IPOMOEA

Splendid rapid growing climbers. The flowers are beautiful and varied and resemble giant Morning Glories. The foliage is luxuriant and makes a growth of 10 to 30 feet a season. The seed of several varieties, especially the moon flower, should have the outer shell punctured and then soaked in water for twelve hours or more to germinate it. Coccinea—Brilliant scarlet flowers with small foliage. Pkt. 10c.

Bona Nox (Evening Glory)—Fragrant violet flowers, expanding in the evening. An annual. Pkt. 10c.

Grandiflora Alba (White Moonflower)
Large white fragrant flowers which expand at night and early morning. Annual. Pkt. 10c, ¼ oz. 25c.

Heavenly Blue—Sky blue flowers and one of the most attractive of Ipomoeas. An annual. Pkt. 10c, ¼ oz. 50c.

Collection No. 21F—One packet each of the above four named climbers, 30c.

A & M Godetia

HELICHRYSUM (Straw Flower)

A free-flowering, hardy annual, growing four or five feet high and bearing beautiful straw-like flowers in a great variety of shades and colors. The following are the most popular strains of this well-known flower offered in separate colors:

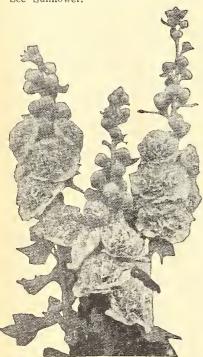

Canary Yellow—New. Pkt. 10c.
Salmon—A bright salmon pink. Pkt. 10c.
Silver Globe—A glistening white. Pkt. 10c.

Golden Ball-Deep golden yellow. Pkt. 10c.

Fireball—Bright scarlet. Pkt. 10c.
Violet—Pkt. 10c.
Separate Colors—1/4 oz. 25c.
All Colors Mixed—Pkt. 10c. 1/2 oz. 35c.
Collection No. 45-F—One Pkt. each of the above six named varieties, 50c.

HELIANTHUS

See Sunflower.

A & M Double Hollyhock A & M HOLLYHOCKS

A & M HOLLYHOURS

A hardy perennial of upright, stately growth, five to eight feet high, unequalled for a background or covering ugly places. The seed may be sown in the fall and will bloom the following spring. If sown in the early spring many will flower in the summer. The seed is generally sown in seed beds and transplanted where they are to grow. The following are the finest double flowering variables.

Double	Mixed	.50

Collection No. 20F—One packet each of the above six named varieties, 50c. Annual Single Mixed—A recent introduction in hollyhocks. This fine single mixture if sown in the spring will flower the first year. Pkt. 10c.

HUNNEMANNIA (Bush Eschscholtzia)

Known also as the Mexican Tulip Poppy. An erect-growing, tender perennial, about 2 ft. high. Foliage fine-cut, blossoms beautifully cup-shaped, bright yellow and about three to four inches across. Stems, long and smooth. Unlike the average poppy, Hunnemannia will keep for several days in water and makes a splendid cut flower. Pkt. 15c.

Helichrysum

ICE PLANT (Mesembryanthemum)

Crystallinum—The variety is largely grown for the glistening foliage. The leaves are large, fleshy and covered with glistening dots. The flowers are small and white. This is not the trailing variety used on banks. Pkt. 10c.

INCARVILLEA

Variabilis Hybrids Mixed—Very desirable for pot culture. It blooms the first year from seed and resembles a miniature Gloxinia. These hybrids contain attractive colors of pink, rose and salmon shades. Pkt. 35c.

JACOBAEA

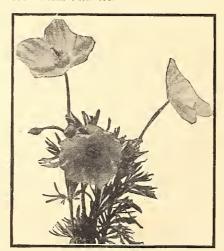

Double Red—Graceful free-flowering annual, producing dense heads of double flowers, which make delightful bouquets.

JOB'S TEARS

See Coix Lachrymae.

KENILWORTH IVY

An attractive little perennial trailing-plant, very useful for baskets, pots and rock work. Pkt. 10c.

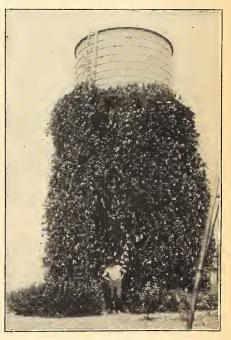

Hunnemannia

KOCHIA (Summer Cypress)

Childsll Improved—A splendid ornamental annual plant, forming dense oval bushes, 2 to 4 feet high, of small feathery light green foliage. As summer advances this changes to a carmine hue and finally to a fiery red. A very attractive plant at all times. Also called "Burning Bush." Pkt. 10c. oz. 25c.

KUDZU VINE (Pueraria Thumbergiana)

One of the most rapid growing vines known, often making 40 feet in a season. It may be trimmed frequently for stock feed. All kinds of animals eat it readily, especially good for milch cows and goats. The seed is slow in germinating and should be punctured or soaked over night in warm water. Pkt. 10c, oz. 75c.

Kudzu Vine (Pueraria Thumbergiana) 2 Years Old

LOVE-IN-A-MIST

See Nigella.

LANTANA

A tender perennial. The plants become shrubs either large or small according to variety. They are used for borders, hedges and specimen plants, and bear verbenalike clusters of flowers. The mixtures which we offer contain scarlet, orange, white, yellow, rose and other colors. We do not have separate colors.

Choice Tall Mixed-Height 3 to 5 feet. Pkt. 10c.

Choice Dwarf Mixed-Height 1 to 3 feet.

LATHYRUS LATIFOLIUS

Everlasting Pea—A hardy perennial climber of great beauty with elegant sweet pea-like flowers in great profusion; height, 6 to 8 feet.
Fine Mixed. Pkt. 10c.

LAVATERA

Splendens Rosea—An annual of easy culture growing 2 to 3 feet in height. The plants are bushy and bloom profusely through the summer and fall. The flowers resemble single Hollyhocks and make attractive bouquets when cut. Pkt. 10c.

LARKSPUR A & M SUPERIOR STRAIN TALL DOUBLE STOCK FLOWERED

Are the finest strains and produce a wonderful show in any garden. The double flowering varieties, with their long spikes, are excellent for cut flowers. They should be planted in beds, as a background for other small plants. With the great variety of colors one may carry out most any color scheme desired, and the bright shades will add a touch of beauty to the garden that will be a pleasure to note. They are easily grown and we know of nothing that will produce a greater show. By all means include a general assortment of A & M Larkspur in your garden for early spring blooming.

In Southern California, larkspur may be sown in Spring and Fall, where the plants are to remain or they may be transplanted from flats or seed beds. It requires 15 to 20 days for the seed to germinate and

the seed bed must be kept moist.

Lustrous Carmine-The glowing color, large individual flowers set closely together in a spike and long graceful stems makes this an ideal cut flower. Pkt. 10c, 1/4 oz. 50c.

LOBELIA

This hardy annual grows four to six inches high, is of compact growth, and literally covered with small bright flowers. By cutting back the plants during the summer and giving plenty of water they may be kept in flower all summer. Used for ribbon work and borders or hanging baskets baskets.

Crystal Palace--Undoubtedly the dwarf blue Lobelia for bedding. Plants very compact, profusely covered with rich blue flowers. Height, 4 inches. Pkt. 10c.

Pkt. 10c.

Hamburgia—A trailing variety specially suited as a graceful plant for hanging baskets. Light blue. Pkt. 10c.

Compact Light Blue (Emperor William)

—A dwarf light blue with light green foliage. Pkt. 10c.

Royal Purple—Deep rich, blue-purple fower, height 6 inches, very compact. Pkt. 10.

Lobelia Crystal Palace

LINARIA

Maroccana Mixed—Annual growing about 1 ft. high, producing graceful spikes of varied colored flowers. They are becoming quite popular in California and are used extensively as bouquet filler. They are of easy culture and once established will grow to good size plants and produce a wealth of bloom. May be found in many gardens in San Diego and Los Angeles. Sow in flats and transplant. Pkt. 15c, 1/4 oz. 25c.

LINUM (Scarlet Flax)

Grandiflorum Rubrum—A hardy annual of slender and graceful appearance with fine foliage and bright red flowers. It makes beautiful beds or borders and is largely used for cut flowers. Scarlet Flax makes a fine fall and winter flower, blooming profusely for several months. May also be sown in the spring. Height 1½ to 3 feet. Pkt. 10c, oz, 40c, ½ lb. \$1.00.

LUPIN

One of our most attractive and easiest grown native flowers. The plants grow 2 to 3 ft. high and have handsome spikes of flowers which are fine for cutting. If the plants are not allowed to go to seed they flower for several months in the spring.

Hartwegi Dark Blue-Pkt. 10c. Hartwegi Sky Blue-Pkt. 10c. Hartwegi Mixed-Pkt. 10c.

Perennial Lupin—A very beautiful hardy perennial. The foliage is a soft green and the stately spikes of flowers rise several feet above the foliage. They oloom continuously during the spring.

Choice Mixed-Pkt. 15c.

MATRICARIA (Fever Few)

Double White (Capensis)—A perennial bearing small double white flowers. Good for cutting. An old fashioned garden flower. Pkt. 10c.

Golden Ball—A compact dwarf plant, used for borders. The flowers are a double yellow and bloom freely. Pkt. 10c.

MARVEL OF PERU

See Four O'Clock.

MOONFLOWER

See Ipomoea.

MATTHIOLA BICORNIS (Night Scented Stocks)

An old-fashioned annual whose purplish flowers are of delightful fragrance emitted in the evening. Pkt. 15c.

MINA LOBATA

A showy hardy annual climber, bearing flowers of a brilliant red, changing to a pale yellow. Makes a luxuriant growth of 15 to 20 feet and flowers freely all summer. Adapted for porches, arbors, etc. Pkt. 10c.

MOURNING BRIDE

See Scabiosa.

MYOSOTIS

See Forget-Me-Not.

MIGNONETTE

Hardy annual, growing 6 to 12 inches high and bearing pyramid-shaped spikes, exceedingly fragrant.

The seeds may be sown from early spring until fall for a succession of bloom. It is used for bedding, borders, and cut

flowers.

A & M Colossal—A new giant Mignonette. The spikes are two to three inches in diameter and each plant has many spikes. The flowers are a deep cream and fragrant. A novelty worth having. Pkt. 15c, ¼ oz. 50c.

Goliath Red—Robust growing variety with enormous spikes of red colored flowers: height, 15 inches. Pkt. 10c.

Machet Mixed—A dwarf compact variety, with large stubby spikes covered with copper-red flowers. Pkt. 10c, ¼ oz. 25c.

Odorata Mixed-Sweet scented. Pkt. 10c 1/4 cz. 25c.

M MARIGOLD

A & M strains of Marigold are becoming increasingly popular, and below we offer varieties which are most in demand.

Marigold is a hardy annual, in dwarf and tall varieties, growing from 6 in, to 3 feet high. The flowers are various shades of yellow and brown. The tall varieties are very valuable for large bedding or background work, and the dwarf varieties for borders.

A & M Tall African Marigold

African (Fistulosa Type)

African Tall Double Orange—Beautifully formed flowers of gigantic size and bright color; height, 2½ feet. Pkt. 10c, ¼ oz. 50c, oz. \$1.50.

African Tall Double Lemon-Like the above but a pure citrus yellow. Pkt. 10c, 1/4 oz. 50c, oz. \$1.50.

African Tall Double Mixed—Pkt. 10c.

1/4 oz. 35c.

French

The flowers are much smaller than the African, but are greatly prized for bed-

ding.

Tall French Single Brown—This fine flower is being grown extensively for florists. It is a combination of beautiful shades of brown and fine for cutting.

shades of brown and fine for cutting. Pkt. 10c, 1/4 oz. 25c.
Tall French Mixed—In shades of yellow, brown and tricolors. Height, 2 ft. Pkt. 10c, 1/4 oz. 25c.
Dwarf French Mixed—Like the above but only 10 inches high. Pkt. 10c.
Dwarf French Legion of Honor—The flowers are single and a dark, velvety brown, gracefully surrounded by a distinct gold ring. The compact, bushy plant flowers abundantly and is more lasting than any other annual. Pkt. 10c, 1/4 oz. 25c.

A & M DWARF FRENCH GOLDEN **BALL MARIGOLD**

plants. Habit of growth is compact and it blooms well over a long season. In climates similar to Southern California, planted in the early fall, it blooms all winter or if planted in early spring will bloom throughout the summer. The round golden vellow flowers are very attractive and pleasing. (Pkt. 10c) (1/4 oz. 40c).

This is one of

the finest border

MIMULUS

Lewisii—A beautiful pink mimulus, native of California. The plants form strong clumps which flower freely every spring. The seed is exceptionally fine but germinates easily if planted in seed boxes. May be planted either in fall or spring. Grows about 3 feet high and may be used for perennial borders or specimen plants, preferring a moist and martially shaded situation. Makes a good

or specimen plants, preferring a moist and partially shaded situation. Makes a good cut flower. Pkt. 10c.

Tigrinus Queen's Prize Mixed — Commonly called Monkey Flower. A dwarf, bushy growing annual blooming freely throughout the summer. Gloxinia-like flowers, yellow to crimson. Does best in a moist, shady sitwation. Height 1 foot. Pkt. 10c. moist, s. Pkt. 10c.

Moschatus (Musk Plant)—Well known, old fashioned plant with scented leaves and small yellow flowers. Pkt. 10c.

A & M MORNING GLORY (Convolvulus)

Free flowering, beautiful climbers with rich and varied colored flowers; very useful for covering lattice work, verandas, etc., where they are exceedingly effective. Soak the seed for several hours in warm water before planting.

Major Tall Mixed—Attains a height of 15 feet or more, and comes in shades of Rose, Crimson, Blue and White. Pkt.

Minor Dwarf Mixed—A beautiful hardy bedding and border plant, attaining a height of about 1 foot. Pkt. 10c, oz. 25c.

Imperial Japanese Morning Glory-The best Morning Glory for strong growth and varying colors. Height 15 to 20 feet. Pkt. 10c, oz. 25c.

OENOTHERA

Evening Scented Primrose—A tall growing plant bearing an abundance of large yellow flowers which expand in the evening. Height 2 to 3 feet. May be planted in part shade.

They are very sweet scented are a valuable addition to any garden. Easily grown. Pkt. 10c, 1/4 oz. 25c.

Oenothera NIGELLA (Love-in-a-Mist)

A hardy annual, one foot high, with finely cut foliage. Oddly shaped blossoms

in blue and white, and curious seed pods.
Of easy culture.
Miss Jekyll—Long stemmed flowers which are of a clear corn-flower blue; elegant foliage; height, 18 inches. Pkt.

Mixed Colors-Blue and White. Pkt. 10c.

NEMESIA

Hardy annual. This flower is obtainable in numerous shades of beautiful colors, and when grown in mass form, gives a fine effect. Sow in a seed bed early in the spring and transplant.

Strumosa Suttoni—Mixed colors, height inches. Pkt. 25c.

Nana Compacta, Triumph Mixed—A brilliant mixture of colors making a fine low border or bed. Height 6 in. Pkt. 25c.

A & M NASTURTIUMS

These favorite and well known flowers are popular because of the great variety of colors which may be obtained with very little labor. They are not particular as to soil, fertility or cultivation and may be seen at the beach resorts growing in banks of pure sand where they get little or no attention. If you have an unsightly spot, plant A & M Nasturtiums and convert it into a beauty spot. The Dwarf varieties may be used for bedding and borders while the tall climbing varieties may be used for covering unsightly fences and fence corners. The nasturtium is known to most every one but few people appreciate its real value for the uses we have described. They will bloom in a few weeks after planting and will continue until cut down by the frost. A & M Nasturtiums are blended in pleasing mixtures and carry a great variety of color.

NEMOPHILA

California annual growing ches high. The blossoms are hardy A hardy California annual growing about six inches high. The blossoms are cup-shaped and the colors are blue, white, lavender and spotted. The seed may be sown from October to March and is very valuable for carpet bedding.

Insignis (Baby Blue Eyes)—Sky blue, with white eyes. Pkt. 10c, 1/4 oz. 25c.

Choice Mixture—Pkt. 10c, oz. 50c.

NICOTIANA, OR FLOWERING TOBACCO

A hardy annual growing 3 to 4 feet high and of branching habit. The plants are covered with the slender tubular flowers all summer. They may be used as a back ground or as single specimens. Popular for its evening fragrance. Affinis-White, and very fragrant. Pkt.

Sanderae Mixed—A new, large, flowering type, with various bright-colored blossoms. Pkt. 10c.

PASSION FLOWER

A hardy perennial climber, very satisfactory for immense growth, as it will cover a porch or small cottage in one season.

Coerulea Grandiflora-Sky-blue. Pkt. 10c.

Scarlet (Tacsonia)-A beautiful red. Pkt. 10c.

Edulis (Passiflora)—A rampant grower, ossoming freely. The pulp of the fruit blossoming freely. This delicious. Pkt. 10c.

PENTSTEMON

Gloxinioides "Sensation"-The large Gloxinia shaped blossoms vary from pure white, pink, rose and crimson to mauve and purple, including many which are beautifully edged. Hardy perennials. Height, 2 feet. Pkt. 15c.

Hybrids Mixed—A free flowering mix-ure containing many colors. Pkt. 10c.

PHYSALIS FRANCHETII (Chinese Lantern Plant)

This hardy biennial plant grows to a height of about 2 ft and is a profuse bloomer, producing many large striking flowers of a beautiful brilliant orange red color, resembling Chinese lanterns in shape. Pkt. 15c.

PORTULACA (Moss Rose)

Beautiful race of dwarf plants for rock work or dry sunny locations, bearing glossy cup-shaped blossoms in brilliant colors. Annual.

Double Mixed—Saved from the finest flowers only, and will produce a large percentage of doubles. Pkt. 15c.

Single Mixed-Large flowers. Pkt. 10c.

PAINTED DAISIES (Carinatum)

These hardy annuals are very showy and effective garden favorites. They grow to a height of about 2½ feet, producing a profusion of very lovely daisy-like flowers. In some of the varieties, as may be noted below, contrasting colors are produced in zones, these zones being well defined and of bright colors. They are easily grown, excellent for cutting purposes and are used freely in California as a florist cut flower. They do not require much water.

Painted Daisies

A & M POPPIES

The different varieties of poppies are always favorites for outdoor display and the cultivation of them being so extremely simple entitles them to a place in every garden. Seed should be sown where the plants are intended to flower, because it is difficult to transplant them with any measure of success.

In California, October to March is the best planting season. Poppies cut in the bud will open and make beautiful

boauets.

American Legion Poppy

Double Flowered Poppies

(In Separate Colors)

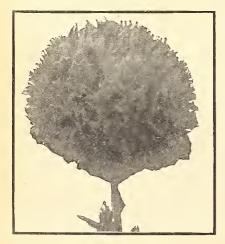

These flowers are large and double. A very beautiful bed or border may be had by growing any of these separate colors.

Double Rose—Bright rose pink. Pkt. Double Rose—Bright rose pink. Pkt. 10c, oz. 35c.
Double Vermillion Red—Pkt. 10c, oz.

Double Shrimp Pink—Pkt. 10c, oz. 35c. Carnation Flowered Double Mixed—Choice assortment of brilliant colors. Flowers very double and well fringed. The plants grow to a height of four feet and bear immense carnation-like blooms 6 to 8 inches across. Annual. Pkt. 10c,

oz. 35c.
Peony Flowered Double Mixed—Annual.
Immense double globular flowers. Splendid for bedding and massing. Choice mixture. Pkt. 10c, oz. 35c.
Collection No. 41F—One packet each of the above named five varieties of double

poppies, 35c.

Paeony Flowered Poppy

Poppy Shirley

Perennial Poppies

Oriental Hybrids Mixed-These tall stately Poppies have immense flowers in the most gorgeous colors. Height 21/2 ft. Our seed has been saved from the choicest new hybrids. Pkt. 10c.

Nudicaule, Iceland Poppy—A beautiful class of perennial poppies. Sow in March and they will flower the same year. The beautiful large blossoms are borne on wire-like stems above the fern-like foliage, with a great variety of colors. The Iceland Poppy has more lasting qualities as a cut flower, than any other poppy. poppy.

Single Mixed-Pkt, 10c. Double Mixed-Pkt, 25c.

American Legion—A grand new poppy. The color is brilliant orange scarlet with yellow anthers. The flowers are three times the size of the ordinary Shirley Poppy. They grow about 2 to 3 feet high and should be planted where they are to flower. They give the best effect when grown in masses or beds. Pkt. 10c, 1/4 oz. 25c.

Double Annual

Eldorado Double Shirley—A new and lovely variety of Shirley poppies in a variety of wonderful colors. Each flower has many full petals giving the double appearance. A bed of these poppies would be a delight to any lover of flowers. Pkt. 10c, 1/4 oz. 25c.

Ranunculus Flowered—This variety of double Shirley was so named because of its resemblance to Ranunculus. It is a lovely flower and keeps well in water if cut before buds are fully opened. Pkt. 10c, 1/4 oz. 30c.

Single Annual Shirley

The most charming poppy in cultivation. The blossoms are bright and snowy and include an almost endless variety of colors, from pure white, pink, terra cotta, salmon, chamois and rosy carmine, to brilliant crimson, many of the flowers being beautifully flaked or edged with white.

Rose Pink-A fine large flower. Pkt. 10c.

Hose Pink—A line large flower. Pkt. 10c.

Picotee—White cup, scarlet edged. Pkt. 10c.

A & M Shirley—Fine mixed. Pkt. 10c, oz. 30c.

Flanders Poppy—The famous poppy of Flanders Field. A single annual of blood red color. Abundant in the fields of Europe. Pkt. 10c, 1/4 oz. 25c.

Tulip Poppy (Glaucum)—Resembles the tulip in form. Color a dazzling scarlet and very effective for beds or masses. Pkt. 10c, 1/4 oz. 25c.

PYRETHRUM

Hardy perennials which are egrown and make handsome plants. easily

Hybridum Roseum—This variety is a tall vigorous grower and flowers freely. The flowers are daisy-like and the colors tall vary from rose, pink and cream to white; all have yellow centers. They make very desirable cut flowers, keeping well in water.

Single Mixed-Pkt. 10c.

Double Mixed—Produces a fair percentage of doubles. Pkt. 25c.

Golden Feather—Fine compact habit of growth, with bright yellow foliage, largely used for edgings and ribbon borders. Height, 9 inches. Pkt. 10c.

Pyrethrum

A & M PANSIES

Pansies thrive best in a moist, sunny location and in rich, loamy soil. Seed should be sown in the autumn for early spring blossoms, or can be sown early in the year for good flowers later in the spring. The plants must be transplanted twice in order to get the largest flowers; once from the seed box to a chosen bed, and again to the open garden. This is important for large size pansies; use manure liberally. The blossoms are usually larger in the spring and again in the fall, and while they bloom freely all summer, the blossoms are small during the hot months.

It is much more interesting, satisfactory and inexpensive to grow your own pansies from seed. By so doing you may select and carry out your individual color scheme; you may also select your own types and take advantage of some of the finest varieties the plants of which are not offered for sale.

MASTODON PANSIES

A very popular beautiful strain of pansies. They bloom two to four weeks earlier than most strains, produce very large showy flowers and are exceptionally fine for beds, borders and window or porch boxes.

Adonis-Lovely Sky-blue. Pkt. 25c.

Bronze Mastodon-Very large, with all the different shades from burnished brass to gold, with no two flowers exactly alike. Pkt. 25c.

Madame Steele—Elks Purple, of fine form and enormous size. Pkt. 25c.

Panama Pacific—A huge deep yellow, some have the dark center, some without. A beautiful bedding color. Pkt. 25c.

White Mastodon—Snow white with a large center, very large and beautiful. Pkt. 25c.
Mastodon Mixed—A wonderful collec-

tion of rich velvety shades, in great variety, with fine long stems. Pkt. 25c.

A & M MAMMOTH WONDER PANSY

Not quite so large as our Super Maximum or Empress, but much larger than the ordinary pansy and a selection of many exquisite colors. Excellent results may be obtained by planting pansies thickly and not practicing cultivation. Tests we have made indicate that the size of the flower or the number of flowers is not reduced. Use plenty of fertilizer and keep well watered. Pkt. 35c, 1/8 oz. \$1,25.

FLORISTS' SPECIAL VARIETIES

Miracle Mixed—A splendid mixture containing the finest types of the different strains, latest novelties, ruffled flowers, and many of the new Sunburst Pansies, all with fine long stems. Excellent for forcing or outside growing. Pkt. 75c.

Greenhouse Special—This mixture of fine Pansies, highly recommended for greenhouse or garden, needs no introduction to the florists of Los Angeles, where it has given unbounded satisfaction for several years. Large flowers in the most desirable colors, on long stems. Pkt. 50c.

A & M EMPRESS PANSIES

We believe these to be the finest pansies in existence and they are due for a world wide reputation for size, length of stem, gorgeous colorings and everything else that goes to make extraordinary plants and flowers. Our grower of this strain is conceded to be the world's best authority on the production of fancy pansy seed and the A & M Empress strain is his greatest achievement. The many delightful variations in color call forth the admiration of all who see them and there are many surprises in store for those who plant them. Packets containing about 300 seeds, \$1.00.

A & M SUPER MAXIMUM PANSY

A lovely and distinct strain bearing extra large flowers with long stems that hold them well above the foliage. We introduced this pansy particularly for those who want an extraordinary strain and we are pleased to recommend them highly. Letters from many friends indicate they are very satisfactory, and our own trials are greatly admired by all who see them. Pkt. 50c, 3 pkts. \$1.25.

SEE ILLUSTRATION AND COLLECTION ON FRONT COVER

A & M GIANT PANSIES

Glant Aurora—Probably the best pure white of the Giant strain. Pkt. 15c.

Glant Azure Blue—Gigantic blooms of a delicate pale shade, freely produced on compact plants. Pkt. 15c.

Glant Bridesmald—Shades of shining rose, blotched. Pkt. 15c.

Glant Eros—This grand novelty produces very large flowers of a deep velvety brown color, with a broad golden yellow margin. The back of each bloom has the same broad margin as the front side, while the dark velvety center is shining through. Pkt. 15c.

Glant Golden Queen—A very pleasing shade of golden colored flowers, carried on good length stems. Pkt. 15c.

Glant Madam Perret—A variety of unusually compact habit. The lower petals are pale with rich rose color markings. Pkt. 15c.

Glant Yellow (Black Eye)—Large hand-some flowers of a rich yellow with black eye. Pkt. 15c.

Giant Psyche-Not many of the pansy varieties have such a winning arrange ance as Psyche. The characteristic five velvety, violet blotches are surrounded by a broad white edge. It is an ideal exmarket pansy. Pkt. 15c.

by a proad white edge. It is an ideal exhibition or market pansy. Pkt. 15c.

New Glant Orchid Flowering—A beautiful strain in rare shades. A quick bloomer and very fine. Pkt. 15c.

Glant Trimardeau or French Mixed— A very showy class of vigorous compact growth, flowers of an enormous size; finest strain. Pkt. 15c.

Glant Prince Henry—Darkest blue, very large beautiful flower. Pkt. 15c.
Glant Ruby Red—Very large blooms in striking red shades. Pkt. 15c.
Glant White (Purple Eye)—Large well formed flowers with black center. Pkt.

Masterplece ("Ruffled Pansy")-

did new class. The petals have the appearance of fluted velvet. The colors are rich and varied, and the plants hardy and vigorous growers. Pkt. 25c.

BEDDING VARIETIES A & M LOS ANGELES

Cardinal-Rich shade of red. Pkt. 10c. Golden Gem-Large pure yellow. Pkt.

Faust (King of Blacks)—Large, well formed, glossy black flowers. The plants are compact and bloom for a long time.

Peacock—Handsome flowers of a rich purple. Pkt. 10c.

White (Black Eye)—Large, well formed flowers with black center. Pkt. 10c.

Fine Mixed—A splendid mixture for bedding. Pkt. 10c.

A & M Mastodon Pansy

A & M PETUNIA

A splendid race of plants, rich and varied colors, and profuse flowering with their charming and tender looking flowers, they are very beautiful for groups in the open. Sow seed early in spring, scatter thinly on an even surface and barely cover the seed with sand. If intended for the open ground, plant out into a frame to be kept until plantingout time. If for pots, pot singly into small pots in strong rich soil mixed with sand and shift as the plants grow larger.

In starting Petunia seed it is well to remember the rule that small flower seeds should be planted to a depth of about twice the breadth of the seed itself, which means that these should be merely pressed into the soil and receive a very light covering of light material. A burlap bag placed on top the seed bed will assist in germination. Remove the bag when sprouts appear and keep thoroughly moist. When planting out double or ruffled varieties it is advisable to use the smaller plants in preference to the strong ones.

A & M Ruffled Giant Petunias Ruffled Giants

A beautiful, deep throated new strain with flowers that are ruffled, fluted and fringed. Solid intense colors. Pkt. 25c.

Giants of California

A California introduction. An extremely fine type of this well known flower. A mixture which will be appreciated by all growers of Petunias. Pkt. 35c.

Grandiflora Single Mixed

Exceedingly handsome and free flowering, containing the greatest variety of colors, yellow throated, veined and blotched. Very large flowers. Pkt. 15c.

Hybrida Fine Mixed

A good Petunia for massing in beds and borders, yielding a profusion of brilliantly marked flowers. Pkt. 10c.

General Dodds

A rich, blood red; this is a fine color. The flowers are large and erect and the plants large and free blooming. Pkt. 10c.

Lord Courtenay

A fine brilliant rose color with yellow throat. One of the finest varieties we offer. The flowers are large and showy and produced abundantly on large sturdy plants. Pkt. 15c.

Nana Erecta Snowball

The plants are erect and compact and are especially adapted for borders. The flowers are large and in constant bloom. Pkt. 15c.

Nana Erecta Rosy Morn

Of the same compact growth as Nana Erecta Snowball, but of lovely pink color with contrasting white throat. An im-proved strain. Pkt. 20c.

Nana Erecta Violacea

A new strain. This is a fine deep vio-let, the texture of the flower is like vel-vet and the plant growth erect and com-pact, like all of this class. Pkt. 20c.

Superb Double Fringed Mixed

One of the finest strains of Petunias in existence. The double flowers are very large, full and symmetrically formed, having the edges of the petals beautifully fringed. Pkt. 50c.

PETUNIA COLLECTION No. 1—75c

One each of Lord Courtenay, Giants of California, and Superb Double Fringed Mixed.

PETUNIA COLLECTION No. 2-40c

Bed and Border Combination One each of Nana Erecta Snowball, Nana Erecta Rosy Morn and Nana Erecta Violacea.

Howard's Star

Howard's Star Improved

Large velvety purple with a white star. Makes a very striking and attractive bed or border. Pkt. 15c.

BALCONY PETUNIAS

Used extensively in California for training up on lattice-work, fences, etc. In the Los Angeles City parks they have been used very effectively as pillars, standing 5 to 7 feet high. Balcony Petunias are a large free flowering type and they make a gorgeous display over a long season. May be used also for window boxes and large vases. Balcony Blue—Deep velvety... Pkt. 20c Balcony Rose—Deep rose... Pkt. 20c Balcony Crimson... Pkt. 20c Collection No. 30F—One packet each of the above four named varieties, 65c.

PHLOX DRUMMONDII

One of the most beautiful and easiest grown of our hardy garden annuals. The flowers are produced in large trusses and may be had in many lovely colors. The seed may be sown in boxes and transplanted when danger of frost is over or may later be sown in the open. They make a very effective show when grown in masses or borders.

Large Flowering Grandiflora—A fine type having large heads of bloom and growing 15 inches in height. This variety may be used for cutting.

Collection No. 29F—One packet each of the above six named varieties, 50c. Drummondii Mixed10c 75c Large Flowering Dwarf—This type has the large individual blooms of the Grandifora but the growth of the plant is compact and dwarf attaining a height of 8 inches. Effective for parkings and low borders. Mixed. Pkt, 10c, 1/4 oz. 75c. Star Phlox—A dwarf variety bearing star shaped blossoms in great abundance. Pkt, 10c, 1/2 oz. 50c.

Pkt. 10c, 1/8 oz. 50c.

Phlox Drummondii

Perennial Mixed—The bright colored flowers make a pleasing border. Seed is slow in germinating and from fall sowings seedlings will often not show until following spring. Pkt. 25c.

PRIMULA (Primrose)

Primroses are charming plants which blossom freely during the spring and winter. They are of easy culture and should be sown from March to May and again in July to August for a succession of bloom. All make splendid pot plants and some blossom freely out of doors even during the winter.

Glant Flowered-The beautiful Fringed Chinese and Obconica Grandiflora are large flowered, bloom freely for several months and are one of the very best house plants. We offer only the best seed.

Chinese Fringed Mixed-Pkt. 35c. Obconica Grandiflora-Pkt. 35c.

Malacoides—A free flowering improved variety of Baby Primrose. They may be planted out of doors or used as pot plants. If planted in August in partial shade they will flower freely during the winter. Flowers a delicate lilac. Pkt.

RHODANTHE

Maculata Rosea-One of the most attractive everlasting flowers. The flowers hang like little bells on the stems and make a pleasing and dainty cut flower either fresh or dried. Pkt. 10c.

Scabiosa

RICINUS (Castor Oil Plant)

Effective for semi-tropical garden. Easily raised from seed, and should be grown in deep rich soil.

Sanguineus—Blood red stalks and red fruit. Height 8 feet. Pkt. 10c, oz. 25c.

Zanzibariensis—The giant type of the Castor Bean. Foliage varies in shades of color during the different stages of growth. Being a strong grower very suitable as a windbreak. Pkt. 10c, oz. 25c.

Mixed Varietles-Pkt. 10c, or 25c oz.

ROMNEYA COULTERII (California Tree Poppy)

Also well known as the Matilija Poppy; perennial. It is of value as a cut flower, lasting well in the water, and its delicate primrose like perfume is most acceptable. They never lose the crumbled folds that in the case of most poppies betoken newly opened state. Flowers are four to five inches across, pure white, with a fine bunch of yellow stamens, resembling white, single Paeonies. Pkt. 10c.

RANUNCULUS

Giant French Mixed—This very popular flower may be grown readily from seed though home gardeners have usually grown them from bulbs. The seed should be sown in good sandy loam, covered lightly with sand and kept moist. May be planted from early fall to January and will flower the first season from seed. Our mixture is a very fine semi-double strain and contains a splendid range of colors. Pkt. 25c, 1/4 oz. 75c.

Giant French Ranunculus

A & M SCABIOSA

Mourning Bride, Pin Cushion—An annual which is an old garden favorite and which has been much improved recently.

Which has been much improved recently. The flowers are large and vary from a lovely light blue to deepest red. They are borne on long graceful stems and produce abundantly from spring until autumn. They are especially recommended for cutting. Sow seed in boxes and transplant or sow in open ground after frost is over, and thin to 15 inches apart. Height 3 to 4 feet.

Wisetonensis Excelsion — Exceptionally large flowered mixture. Pkt. 25c.
Retussus—Another type of Schlzanthus which has a branching habit, grows 18 inches high and makes a very fine cut flower.

MixedPkt. 10, 1/4 oz. 25c

Schizanthus

CALIFORNIA GROWN SWEET PEAS

Ask for Sweet Pea Culture, Bulletin No. 11

Experienced growers and home gardeners are demanding California grown Sweet Peas because they have found them superior to all others. Grown under California climatic conditions, they have become famous for their high percentage of germination and their extraordinary vitality. Large flowers and long stems predominate in the best varieties introduced from California and without exception they please the most discriminating growers and sweet pea enthusiasts. As California Seedsmen we have the opportunity of being in close touch with the growing of all varieties and frequent crop inspections enable us to select only those that we know to have special merit. It would be an easy matter for us to list hundreds of sweet peas, but in this catalog we confine ourselves to a complete range of colors, including only varieties that we know will please the most particular trade. Our files contain a wealth of information on Sweet Peas and very often we are called upon by Sweet Pea Societies, Florists, and home gardeners for special information that they may desire. We are always glad to be of assistance and would be pleased to go into further detail than space permits in this catalog.

A & M Early or Winter Flowering Spencer Sweet Peas

These are sometimes called Winter Flowering and also Christmas Flowering. The growers class them as early flowering because when planted at the same time as the lates (standards) they will flower at least a month earlier. Because of this early tendency, if planted in August or September they may be brought into bloom in the late Fall and early winter, and for this reason they have been called Christmas Sweet Peas. The planting season in California is from the first of August until the middle of January. The varieties selected have long stems with three and four blooms to a stem.

These Sweet Peas are used extensively by commercial growers throughout the East for growing under glass. Commercial growers in California grow them in the open without any shelter and have them in bloom throughout the winter.

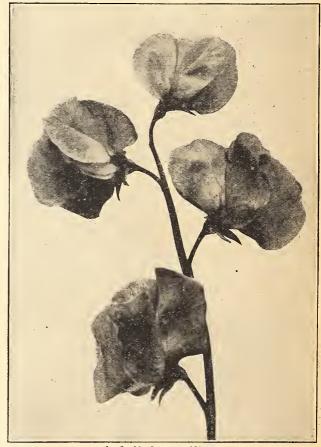

INOCULATE SWEET PEA SEEDS WITH MULFORD CULTURE TO IMPROVE THEIR GROWTH-35c

EARLY FLOWERING SPENCER SWEET PEAS

A & M EARLY MAMMOTH ROSE-Remarkable new rose pink variety. The stems are extremely long and vigorous, surpassing all others in this class. At the Los Angeles Giadiolus Show in 1927 the giant blooms, of this sweet pea, four and five on a stem, won the admiration of all visitors to our stand. Pkt. 50c.

A & M California Grown Sweet Peas

STANDARD GIANT SPENCERS

For Spring and Summer Blooming

Hundreds of acres of Standard Giant Spencer Sweet Peas may be seen in solid fields in the sweet pea producing sections of the Golden State, and it is a most beautiful sight to behold. The Giant Spencers listed below are particularly recommended for spring and summer blooming and will thrive in any climate where other sweet peas will grow.

This strain of Sweet Peas bears three and four very large flowers on long, stiff stems. Many of the flowers are ruffled and wavy and the great assortment of shades makes them a remarkable strain for all purposes.

"RAINBOW COLLECTION"

Of Spencer Sweet Peas, put up in seven separate packets. All colors of the rainbow, making a perfect blend. Red, Pink, Orange, Yellow, Lavender, Blue and Maroon. The Collection 75c.

INOCULATE SWEET PEA SEEDS WITH MULFORD CULTURE TO IMPROVE THEIR GROWTH-35¢

AUSTIN FREDERICK—Lavender, a wonderful
exhibition variety
BARBARA SALMON—One of the most satisfactory in this color
BLANCHE FERRY—Red and White. Always a popular sort
CHARMING—Rose Cerise. Refined shade and splendid form
COMMANDER GODSALL—Blue. The nearest violet blue we know. A very fine onePkt. 10c, Oz. 40c
CONSTANCE HINTON—White, a black seeded white. Easy to grow
CRIMSON KING—Crimson. Deep rich color and very large
DEFIANCE—Orange. Glowing orange scarlet. Does not sunburn easily
DORIS—Cerise. Orange cerise pink on cream ground. Very beautiful
FIERY CROSS—Orange Cerise. A bright color which does not sunburn easilyPkt. 10c, Oz. 40c
GEORGE SHAWYER—Salmon Rose. Very large flower. Excellent
HAWLMARK PINK—Beautifully frilled, large, rose pink flower
HEAVENLY BLUE—New. Delphinium blue, very large and good stem
ILLUMINATOR—Salmon orange. One of the very popular varieties
KING WHITE—Large wavy whitePkt. 10c, Oz. 40c
MARY PICKFORD—New pink. Dainty cream pink suffused salmon
MATCHLESS—Best cream
MISS CALIFORNIA—Orange salmon. Petals are ruffled and the flower is exceedingly attractive

Giant Spencer Sweet Peas

CUPID SWEET PEAS

These Sweet Peas make the most brilliant and showy parkings, beds and low borders imaginable. They make a uniform growth about 8 inches high and each plant is about 1 foot in diameter. They will bloom freely for several months. The culture is the same as for the climbing variety but for a solid mass plant the rows 15 inches apart.

Mixed-Pkt. 10c each, oz. 30c.

COLLECTION NO. 35F—One packet each Standard Giant Spencers, viz: Robert Sydenham. Youth, Rosabelle, King White, Powerscourt and Crimson King, 50c.

COLLECTION NO. 36F—One packet each Standard Giant Spencers, viz: Barbara, Blanche Ferry, Commander Godsall, Constance Hinton, Fiery Cross, Hawlmark Pink, Illuminator. Matchless Royal Scot, Warrior, The Cardinal and Austin Frederick, \$1.00.

A & M Improved Strains of Double Flowering Stocks

The Stock is one of the many popular plants used for bedding. For brilliancy and diversity of color, fragrance and duration of bloom it is unsurpassed. Sow the seed in pans or boxes and transplant when large enough to an open, sunny location. Be careful to save the weak and delicate plants as these usually throw the best doubles. It is also a good idea to plant rather thickly so that the single can be weeded out as they appear. Stocks are one of our best winter blooming plants. May be planted from August to March for a succession of winter and summer bloom.

A & M BISMARCK STOCKS

This wonderful new strain of Stocks is of branching habit, making it possible to break long branches of flowers from the main stalk without injuring or destroying the beauty of the plant. The flowers are large and many of them on a stem. The sweet perfume of the Stocks make them most desirable for garden or for vases and the A & M Bismarck is the very latest improvement.

Superbissima Mixed—Containing many lovely color combinations. Pkt. 10c, 1/8 oz. 40c.

SENSITIVE PLANT

An interesting plant, the leaves of which close when touched; elegant foliage; flowers pink. Pkt. 10c.

SUNFLOWER (Helianthus)

Stately, hardy, annuals of easy culture. Useful for background or as a fence and often grown for the seed. Height, 6 to 8 feet.

California Double — Large, massive, bright yellow flowers, height 6 feet. Pkt. 10c.

New Red Sunflower—Is a very apt description of this new variety. The plant is of a freely-branching habit, with well-shaped dark-centered flowers of bright chestnut red, merging to a yellow at the tips of the petals. Height 6 feet. Pkt. 10c.

Mammoth Russian-Is planted largely for seed. It also makes a good windbreak and a very ornamental background. Re-quires little attention. Pkt. 10c, lb. 25c.

quires little attention. Pkt. 10c, lb. 25c.

Autumn Glory—A recently introduced perennial belonging to the sunflower family. The flowers are about 2 inches in diameter with bright yellow petals and a dark center. The plant grows about six feet tall and branches like a giant cosmos. During September and October each plant is a gorgeous mass of bloom. When the plant has finished blooming cut away the old stalks and in the winter the new growth will start from the old roots again. The seed may be planted in the fall or spring. Pkt. 10c.

Collection No. 38F—One packet each of the above four varieties sunflower, 25c.

Statice Sinuata

SHASTA DAISY

See Daisy.

SMILAX

A perennial vine which thrives best in a shady location. Very useful for decorative purposes. Pkt. 10c.

SNAPDRAGON

See Antirrhinum.

SILENE (Catchfly)

Pendula Compacta-Bright double rose colored flowers produced in great abundance on dwarf compact plants. Very excellent for borders, masses and recommended for carpet bedding on bulb beds.

SWEET WILLIAM (Dianthus Barbatus)

A hardy perennial blooming the second A hardy perennial blooming the second year from seed. Grows one to two feet high and bears its flowers in clusters at the end of a stiff stem. The individual flowerets are handsomely colored and marked. It makes a beautiful bedding plant, and is of easy culture.

Single Mixed—Very attractive. Pkt. 10c.
Double Mixed—Pkt. 10c.
Annual Single Mixed—A fine mixture blooming the first year from seed. Pkt. 10c.

STATICE

Sinuata—An everlasting flower which is increasing in popularity. The plants throw large sprays of flowers which may be dried and make fine winter bouquets. It may be planted both in the spring and late summer. The seed should be kept quite moist until germinated.

THALICTRUM

Dipterocarpum—A recent introduction from China. The foliage somewhat resembles that of the Columbine and the large feathery heads of rose colored flowers are borne on long stems above the foliage. They bloom through the summer and attain a height of about 4 feet. An excellent perennial. Pkt. 25c.

THUMBERGIA (Black Eyed Susan)

A free blooming annual climber with attractive green foliage. It is also used extensively in hanging baskets, window boxes, etc. The flowers are small in varied colors of yellow, orange and white with black eyes. Finest mixed. white wi

Tritoma

TRITOMA

A & M Luminous Hybrids—Sometimes called Red Hot Poker. Flowers range in color from deep Yellow to Coral, Orange and Scarlet with some very striking combinations. Easily grown from seed by planting in flats and keeping thoroughly moist until germinated. Transplant when three or four leaves are formed. Pkt. 35c.

A & M Mammoth Verbenas

A hardy perennial of trailing habit and one of the finest and best known for beds, parkings, etc. The colors are brilliant and varied and the new large flowered strains are handsome as cut flowers. The flowers are fragrant and produced freely throughout most of the year. They will stand much neglect after established, requiring but little water. Plant in seed boxes and transplant to a sunny situation, or may be sown in open ground during warm weather.

A & M DAHLIA FLOWERED ZINNIAS CALIFORNIA GROWN

Indicating the excellence of this Improved Strain of Zinnias they were granted an Award of Merit by the Royal Horticultural Society of England, 1924. This wonderful flower creates a sensation wherever it is grown and it has probably gained popularity more quickly than any other improved garden flower offered in recent years. The large size, fullness of petals, extraordinary color range, and good keeping qualities have all contributed to its popularity. The flowers resemble in appearance the Decorative Dahlia and is called the Dahlia Flowered Zinnia for this reason. When in full bloom they often measure five to six inches in diameter and many of our friends who have grown them take the trouble to write to us and even send us pictures of the wonderful flowers they have produced. The A & M Dahlia Flowered Zinnia is strictly a California introduction and since it is so easily grown and is immune from disease at this time we cannot recommend it too highly to our friends. The colors do not always come entirely true but the variations are desirable colors.

Exquisite—One of the most pleasing shades. Color a light rose with deeper rose center. Pkt. 25c.

Golden State—Yellow in bud, turning to a rich orange when in full bloom. Pkt. 25c.

Crimson Monarch—Bright crimson. The largest of the dahlia-flowered type. Pkt. 25c.

Oriole—Immense flowers of orange and gold. Very fine. Pkt. 25c.

Buttercup—Flower large size, deep creamy yellow. Pkt. 25c.

Canary Bird—A delicate shade of primrose. Does not burn in the sun. Pkt. 25c.

Dream—Deep lavender purple, a very beautiful shade. Pkt. 25c.

Illumination-A deep rose, soft color. Pkt. 25c.

Old Rose—A very fine flower, of a beautiful rose shade. Ranks among the very best. Pkt. 25c.

Polar Bear—A beautiful pure white flower of the form of a Dahlia. Pkt. 25c.

Collection No. 39F—One packet each of the above named varieties of Dahlia Flowered Zinnias, for a most gorgeous display, \$2.00.

Special Dahlia Flowered Mixture—This mixture contains all of the Zinnia novelties and is a most wonderful collection. It will make an excellent garden show and produce fine flowers for cutting. Pkt. 25c.

Dahlia Flowered Mixed—While this mixture does not contain all of the novelties, its color range is very good and will please you. Pkt. 15c.

GIANT DOUBLE STRAIN

This strain is offered in several colors. The individual blooms do not grow so large as the dahlia flowered type, but they make a very attractive display and the plants are in continuous flower from late spring until well into the fall.

GIANT PICOTEE ZINNIA

This very attractive novelty has taken well among the flower fanciers. The bronze, yellow, pink and crimson shades are well marked with Gold Picotee on the edge of petals. Pkt. 25c.

Picotee Golden Pheasant—A new variety. A golden color with edges marked in an attractive shade of bronze; 2 to 3 feet high. Pkt. 25c.

Giant Dahlia Flowered Zinnia

VICTORY-QUILLED

The petals of this type are peculiarly quilled. Various shades of Rose and Lilac, which when the petals twist, reflect pleasing autumn colors. Pkt. 25c.

CURLED AND CRESTED

The flowers of this variety are medium sized and the petals are curled, crested and twisted. A novelty worth growing. The mixture of colors is especially pleasing. Pkt. 10c.

Medium Flowered Zinnia ELEGANS BEDDING ZINNIA

This variety is the most uniform in size of flower and plant. The flowers measure about 2 inches across, have long stems and for bouquets and vase work are both graceful and attractive.

RED RIDINGHOOD

A very pretty compact variety of Zinnia. The small double heads of scarlet shade make a brilliant border and they will be found very useful for cut flowers. Height 1½ to 2 feet. Pkt. 15c.

VALERIANA (Garden Heliotrope)

Rubra Mixed—A much prized showy hardy perennial. It bears lense clusters of small heliotrope scented flowers of red or white. Blooms continuously and is easily raised from seed. Pkt. 10c.

VINCA

Rosea (Madagascar Periwinkle)—An attractive and ornamental plant. Very good for bedding and borders. It is free blooming and makes a fine cut flower, all the buds opening in water. It also makes a fine pot plant. Seed may be sown early in spring in seed boxes or in the open ground after danger of frost is over. Flowers are rose, pink and white. Pkt.

VIOLET

Dark blue. Very sweet smelling and probably the most popular of the Violet odorato strain. Pkt. 10c.

VIOLA CORNUTA

"Tufted Pansies"—The flowers are not so large as regular pansies but bloom so freely that for bedding effect they are unsurpassed. The colors are distinct and they also bloom for long time.
Blue Perfection—Deep bright blue. Pkt. 15c.
Papilio—Light blue. Pkt. 15c.

Mixed-Pkt. 10c.

WALLFLOWER

Delightfully fragrant flowers growing in splkes similar to

Annual Single Mixed—A beautiful single variety which flowers during the summer from seed sown in the spring. Pkt. 10c.
Perennial Double Mixed—Handsome double flowers. Should be planted in the fall for spring blooming or early in spring for late summer flowers. A fine mixture of colors. Pkt. 15c.

Pom Pom Zinnias

WILD CUCUMBER VINE

One of the most rapid and vigorous climbers we have. is invaluable for covering unsightly places and fences. Pkt, 10c.

WISTERIA

An extremely graceful climber. For trellis and arbor work no other vine can surpass it. Grows readily from seed but plants do not make rapid growth or bloom until well established. Blue or White. Pkt. 10c each.

XERANTHEMUM

Double Mixed—One of the most attractive and satisfactory everlasting flowers. The flowers are white, purple, yellow and rose and are pretty in the garden or dried. Plant in the open ground in a sunny situation after frost is over. Pkt. 10c.

A & M CALIFORNIA WILD FLOWER MIXTURE

A splendid mixture of true California annual wild flowers so blended as to give a succession of bloom from early spring to mid-summer. All colors may be found in this mixture. For best results the seed should be sown in a prepared seed bed. They may be planted from fall to early spring—a longer bloom resulting from the fall planting.

If you have a piece of ground you cannot irrigate, or have not time to give particular attention, yet you want to have something beautiful instead of unsightly weeds, we advise you to plant our California Wild Flower Mixture. One pound of seed is sufficient to plant an acre. Pkt. 10c, oz. 50c, 1/2 lb. \$2.50.

Appreciation from Carpinteria, Calif.

I raised these Asters (American Beauty Late) last year and everyone said they had never seen anything like them and several people are intending to try them. But you say "Often measuring 4 inches across." I had many 4½ inches and a number 4½ inches.

Appreciation from Kansas

The seeds I have ordered from you in other years have been a good "ad" for you, as they produced more beautiful flowers than any in our town.

Appreciation from Argentine, S. A.

The Zinnia seeds I bought in Los Angeles in September, 1926, have been splendid, also the African Marigolds. Please keep me on your catalogue malling list.

Appreciation from Michigan

My flowers have been admired so much by neighbors that they would like a catalogue. I planted your California Wild-flowers and they are beautiful under cultivation,

Appreciation from Santa Ana, Calif.

I have been sending to you for several years for garden and flower seeds and find them all lovely.

A & M Gladioli

Gladioli well deserve their unrivaled popularity. They may be planted from November to June for a succession of blooms. It is well in cutting to separate the leaves from the flower stems, allowing the leaves to remain. When completely dried this top growth should be cut off and the bulbs stored. These bulbs multiply and the bulblets will bloom the second year. The bulbs should be planted about 3 inches deep in any good garden soil, preferring an open sunny situation.

American Beauty-The color of an American Beauty rose. Large flowers set strong close together on a strong streach, \$2.50 doz., \$18.00 per 100. stalk.

Anthony B. Kunderd—Delicate, deep cream color, overspread blush pink. Tall and large flowers, beautifully ruffled. Awarded many prizes. 25c each, \$2.50 per doz. Anthony B. Kunderd-Delicate,

Apple Blossom—A dainty frilled, pure white, edged a beautiful soft pink, shading to sulphur on lower petals, throat slightly streaked purple Has a very good form. 50c each.

Apricot Yellow—New color. The nearest to apricot yellow we have seen. Very fine variety. 50c each.

Byron L. Smith—Light lavender with cream coloring in throat. Resembles a cattleya orchid. 15c each, \$1.50 per doz., \$10.00 per 100.

E. J. Shaylor—Deep rose pink. each, 75c per doz., \$5.50 per 100.

Evelyn Kirtland—Coral pink. 10c each, \$1.00 per doz., \$7.00 per 100, \$50.00 per 1,000.

Frilled Felicity — Exceptionally long blooming spike, flowers being of excellent form and distinctly frilled. The color is a pleasing shrimp pink. 50c each.

Golden Measure—A large, clear, deep yellow. 15c each, \$1.50 per doz., \$10.00 per 100.

Gretchen Zang—A soft pink blended with scarlet in throat. 10c each, 75c per doz., \$5.50 per 100, \$40.00 per 1,000.

Halley-Salmon pink. 10c each, 75c per doz., \$5.50 per 100.

Herada—Mauve. 10c each, \$1.00 per doz., \$7.00 per 100.

Improved Violet-This Gladiolus rives its name from its violet color and is an improvement over any violet we have seen. The flowers are mammoth and very symmetrical. 75c each.

Jack London—Light salmon with vermillion stripes. Canary yellow throat with ruby stripes. A most beautiful color combination, good substance, tall, erect spike, 15c each, \$1.50 per doz., \$10.00 per 100.

Jewell—A wonderful pink salmon with clear, golden yellow throat marking. Vigorous plant and extremely graceful. 15c each, \$1.50 per doz.

Le Marechal Foch — Light pink. 10c each, 75c per doz., \$5.50 per 100, \$40.00 per 1,000.

Llebesfeur-Dazzling scarlet with perfeetly placed flowers on a strong stem. This is a favorite on the Los Angeles flower market. 15c each, \$1.25 per doz., \$8.50 per 100.

Llly White—Pure white and an early variety. 10c each, 75c per doz., \$5.50 per 100.

Mahogany Sunrise—Mahogany red, very large flowers. 30c each, 3 for 75c.

Mary Pickford—Flower and spike delicate creamy white, throat soft sulphur yellow. A wonderful flower. 10c each, \$1.00 per doz., \$7.00 per 100, \$50.00 per 1,000.

Mrs. s. Dr. Norton—Delicate pink. 10c \$1.00 per doz., \$7.00 per 100, \$50.00 each, \$1.00 per 1,000.

Mrs. Frank Pendleton-Rose pink, carmine blotch on lower petals. 10c each, 75c per doz., \$5.50 per 100, \$40.00 per 1,000.

Mrs. H. E. Bothin—Lovely light geranium pink with scarlet center. Flowers ruffled with a strong spike. First class ruffled with a strong spike. First exhibition and cut flower variety. each, \$1.50 per doz.

A & M Gladiolus

Los Angeles—One of the leading varieties on the Los Angeles flower market the past year. Color described by the originator as being grenadine, a pink containing considerable orange. The feather in the throat deepens to pomegranite purple, the flowers being delicately ruffled. Los Angeles is often referred to as the "Cut and Come Again" Gladiolus, because it produces many branches on one stalk, For commercial growers or for the home gardener we cannot recommend it too Los Angeles-One of the leading vagardener we cannot recommend it too highly. 25c each, \$2.50 per doz., \$18.00 per 100, \$150.00 per 1,000. Mrs. Leon Douglas—Immense begonia rose flower striped with flame and bril-liant scarlet. Lip pale lemon, slightly speckled with ruby. A giant among Gladioli. 25c each, \$2.50 per dozen.

1910 Rose—Pure deep rose pink with white center lines on lower petals. Strong grower, early and a good cut flower. 10c each, \$1.00 per doz.

Pasadena—Large flowers slightly ruffled. White with blood red edging, long straight spike. An extraordinary flower. 15c each, \$1.50 per doz., \$10.00 per 100.

Prince of Wales—A clear delicate sal-

Prince of Wales—A clear, delicate salmon pink. The finest of this color and one that we highly recommend. An early variety and very popular for cutting. 10c each, 75c per doz., \$5.50 per 100, \$40.00 per 1,000.

Purple Glory—Large ruffled flowers of velvety maroon. Very tall and showy. 25c each, \$2.50 per doz.

Romance-Beautiful oriental combination of colors. Salmon, red and yellow throat with bluish border. 20c each, \$2.00

per doz.

Rose Ash—Old rose overlaid and blended with pink and red. A striking combination difficult to describe. 15c each, \$1.25 per doz., \$8.50 per 100.

Ruby—Large bright red ruby flowers with lower petals a velvety, crimson maroon. Throat lighter. This is an unusual color, one that is not found in ordinary standard varieties. Well placed bell shaped flowers. A wonderful keeper when cut. 75c each.

Virginia—Brilliant scarlet. The most

Virginia-Brilliant scarlet. The most popular red variety. A vigorous grower with erect stalks. Exceedingly attractive for cutting or will give a grand mass of color when grown in beds. 10c each, \$1.00 per doz., \$7.00 per 100, \$50.00 per 1,000.

A & M Fine Mixed-Grown from the best mixture of bulblets. A first class mixture that will produce an array of color and fine flowers for cutting. 60c per doz., \$4.50 per 100, \$35.00 per 1,000.

A & M Trial Ground Mixture—Includes many of the finest varieties listed above, and will furnish an attractive array in the most critical gardens. 85c per doz., \$6.25 per 100, \$50.00 per 1,000.

Primulinus

Butterfly-Ruffled salmon yellow flowers. Vigorous growers. 10c each, 75c per doz., \$5.50 per 100.

Alice Tiplady—Large flowers of a beautiful orange saffron color. 10c each, \$1.00 per doz., \$7.00 per 100.

Maiden Blush—An exquisite pink. 10c each, \$1.00 per doz., \$7.00 per 100.

Souvenir—The finest clear bright yellow in existence. We predict a good future for this one. 10c each, \$1.00 per doz., \$7.00 per 100.

A & M Primulinus Mixed—75c doz., \$5.50 per 100.

A & M Dahlias -- Selected Varieties

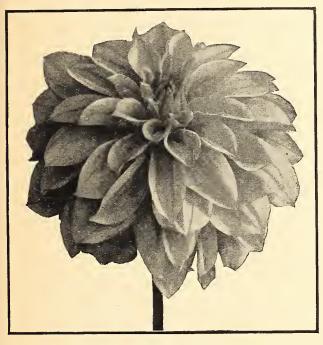

ORDER EARLY

Dahlia bulbs are ready for shipment about March 1st. You may include them in your order for seeds and they will be sent when ready. We do not advise ordering these

Our offerings of Dahlias are only those varieties which we have found to be entirely satisfactory to planters in general. There are hundreds of worthless varieties with which the amateur is not familiar, and would consequently have more difficulty in choosing properly if they were included among the listings.

DAHLIA CULTURE

A bulletin on Dahlia Culture will be mailed free upon request and will be included with each order of Dahlias. Packing and postage 10c each, 25c per doz.

Jersey's Beauty

A & M DECORATIVE DAHLIAS

Collection D-5

One each of the above six Paoeny varieties, regular price \$10.50, for \$7.75. Packing and postage 15c extra.

A & M POMPON DAHLIAS

These are the babies in the Dahlia world. Pretty, compact flowers of the show type are borne on long, stiff stems holding the blossom upright and making a most wonderful display of color in garden. They are very fine for house decoration and the flowers will hold up a long time in water without boiling or burning the stems. No garden in California should be without Pompons. They are so different and so dainty.

A & M Pompon Dahlias

Collection D-6

One each of six excellent varieties of Pompon Dahlias—our selection—a fine range of colors, each bulb labeled, for \$2.50. Packing and postage 15c

General Collection of Dahlias D-7

One each—Flaming Meteor, Jersey's Beauty, Rosa Nell, Mrs. C. Salbach, Polar Bear, Pink Madonna, Rebecca Atkinson, Regent, Jean Chazot, Daddy Butler, Golden West, Chanson.

Twelve beautiful varieties, including Decorative, Cactus, Hybrid Cactus, and Paeony types, regular price \$13.70, for \$10.75. Packing and postage 25c extra.

NEW A & M MONTBRETIAS

These fine varieties of Montbretias are so easily grown and the results ordinarily obtained so gratifying that we take great pleasure in recommending them to our customers.

Plant during December, January, February and March, they will produce flowers during July and August. They are nearly evergreen and make wonderful cut flowers. Each bulb produces several fine spikes of flowers 20 to 36 inches in height. Use the same culture as for Gladioli.

Rosea—(New) Rose Pink. 15c each, \$1.50 doz.

King Edmund-A beautiful golden yellow. 15c each, \$1.50 per doz.

Improved Aurantica-A large flower of magnificent orange yellow. Grows tall. One of the very finest. 15c each, \$1.25 per doz.

Fire King-Like its name, fiery scarlet red. 15c each, \$1.25 per doz.

Mixed-This mixture contains the finest colors. \$1.00 per doz., 25 for \$1.75.

A & M California Grown Roses

Culture

Plant bare root roses during January, February and March. They prefer full sun and should be planted in a garden by themselves where they may be given or shrubbery. When bushes are received be careful not to expose them to the sun or drying wind. If the roots appear to be dry soak them in water a few hours before planting, and if the tops appear to be shrivelled bury tops and all for a few days. This will plump the wood and put the plant in first class condition. The tops should be pruned back at least two thirds at the time of planting. Cut the roots back to 6 or 8 inches and remove all bruised roots. Dipping the roots in thin mud before planting will encourage the starting of fine roots more quickly.

roots more quickly.

For the control of Mildew spray thoroughly during the dormant season January and August with Dry Lime Sulphur and dust frequently thereafter with Anchor Brand Sulphur. Spray-

ing with Destruxol will control Aphids and Scale. Roses should have a rest period from July 1st to August 15th or September 1st, in climate similar to Southern California. Water thoroughly at the beginning of this rest period, cultivate the surface and apply no more water for six weeks or two months. Not only has California become headquarters for the production of all kinds of seed for distribution throughout the country, but it has in a measure also become headquarters for the growing of rose bushes for shipment to all parts of the United States. During the past year approximately 40 carloads of rose bushes were shipped from Southern California and this should indicate to the home gardener that soil and climatic conditions in California are ideal for roses.

Our offerings are roses of strictly No. 1 Grade. You will find our prices more than reasonable and if others are offered for less money a comparison of quality should be made.

PACKING AND POSTAGE ON ROSES-

Owing to special care necessary in packing roses for parcel post an additional charge as noted above is made, but if customers wish the shipment made by express this additional charge need not be added to remittance, and transportation can be paid for at destination.

Lady Alice Stanley

AMERICAN BEAUTY—Deep pink to soft carmine, with delicate veining to dark red on the broad petal. This is the original American beauty which is still popular in many districts. Each

ANGELE PERNET—A grand new rose of vivid orange yellow, shaded fiery deep reddish apricot. This is a combination of colors very difficult to describe, but it is a most beautiful rose. A moderately strong grower, buds long, opening into a full, sweet scented flower. This is a Gold Madal rose Each \$150. This is a Gold Medal rose. Each \$1.50.

BETTY—A California favorite garden varitey, bearing beautiful coppery buds and large attractive salmon pink flowers, with a golden sheen and a deeper yellow center. A very hardy and satisfactory rose and a Gold Medal variety. Each 40c.

CECILE BRUNNER (Bush)—Bright rose shaded salmon pink. One of the best of the miniature roses and planted ex-tensively throughout Southern Califor-nia. Each 40c.

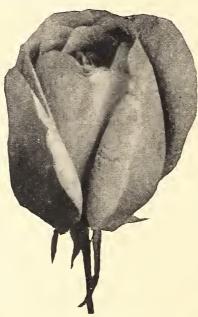

CLAUDIUS PERNET—One of the finest deep yellow roses introduced in recent years. It holds its color well in bud and open blossom, and does not fade as do so many yellow varieties. The plants are of branching habit with a very pretty foliage. The buds are long and are produced on good stiff stems. Each 60c. Each 60c.

CONSTANCE—Pure golden yellow flowers of medium size and good form. This is a Gold Medal variety and is classed among the best yellows. Each

CRIMSON QUEEN-Large, bright velvety crimson, of strong, upright growth. This is a grand rose for the garden, for it blooms almost continuously. Each

DUCHESS OF WELLINGTON—A most popular yellow garden rose. Intense saffron yellow stained with deep crimsanton yellow standed with deep compers saffron yellow as the flowers develop. The flowers are full with large petals, good substance, delightfully fragrant and very Free flowering. Each 40c.

EDEL—White flowers that open ivory-white. Strong grower and free flower-ing. Each 85c.

Claudius Pernet

EDWARD MAWLEY-Brilliant fiery red. color particularly bright in the Fall. The opening buds are shaded velvety crimson inside, double and fragrant. Each 40c.

ELDORADO—A golden yellow rose with the peculiar tint of the Marechael Neil rose. The base of the petals are slightly rose. The base of the petate at the first red; the flowers are very large and of distinct formation, free flowering and fragrant. Each 60c.

ETOILE de FEU—A rich flaming orange-pink. Bears profusely. Very vigorous plant with beautiful foliage and al-together a very distinguished rose. Each \$1.50.

ETOILE de FRANCE—Velvety crimson with bright cerise center. Buds are long and usually borne singly on long stiff stems. Flowers are large and full. Each 40c.

FRAU KARL DRUSCHKI—Snow white. Flowers are extremely large yet beautifully formed. The growth is strong and vigorous with abundant foliage. Sometimes called the White American Beauty. Each 50c.

GEORGES PERNET—Exquisite blooms of orient red, shaded carmine and yellow. This rose is in a class with the Claudius Pernet and is perhaps a little more vigorous in growth. It is a free bloomer the foliage is a pretty bronze green and there are few thorns. We consider it one of our finest roses. Each 85c.

GENERAL McARTHUR—A well known and popular rose of bright crimson scarlet and delightfully scented. This is one of our best blooming varieties and it is well liked by all who know it. Each 40c.

GOLDEN EMBLEM—A most beautiful deep golden yellow, occasionally flaked with crimson on the outer petals. Large well shaped buds and flowers on long stiff stems. Foliage is a rich glossy green. Each 85c.

rose is distinctly different in coloring, being a glowing crimson with darker shadings. The buds are large, long and pointed. Blooms are very full when open. Hoosier Beauty is a favorite wherever it is grown and we cannot recommend it too highly. Each 60c. HOOSIER

HADLEY—Deep velvety crimson, retaining its color at all seasons. The buds are well formed, large, full and long. It is a free bloomer and fragrant. Each 60c.

General McArthur

Mrs. Aaron Ward

A. VERSCHUREN-Large two-toned yellow rose, with long pointed bud. It is fragrant and very fine as a cut flower. The petals are slightly reflexed, the foliage is good and it is a fairly strong grower. Each 85c.

IMPERIAL POTENTATE — Magnificent rose of recent introduction. The color is a deep shining rose-pink, shaded lighter on reverse of petals. Very fragrant. Each \$1.50.

INDEPENDENCE DAY—Rich orangeapricot suffused with yellow. Very
pleasing rose, with long bud exceptionally fragrant. Each 85c.
IRISH ELEGANCE—Bronzy orange scarlet flowers. A profuse and constant
bloomer. Beautiful in bud if cut when
they first show color. When fully open
it contains few petals and is very handsome. Each 40c.
IRISH FIREFLAME—A glorious singleflowering variety, bearing flowers in
clusters of five or more, and splendid
for cutting in sprays in bud form. The
buds are wonderfully rich in coloring,
being a deep orange splashed with
crimson, opening to a satiny old rose
Each 40c.
ISOBEL—Crimson flushed orange scarlet,

ISOBEL—Crimson flushed orange scarlet, with a faint copper shading and a yellow center. The flowers are very large, fragrant, and are produced in great numbers. Each 85c.

JULIET — Exceptional coloring, petals outside being old gold and inside range from rose to crimson. Blooms vigorously throughout the summer. Fragrant Each 40c.

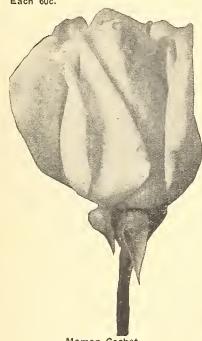

grant. Each 40c.

KAISERIN AUGUSTA VICTORIA—
Probably the best creamy white rose
grown for garden purposes in Southern California. The buds are large, of
good form, the plant is a vigorous
grower and the stems are good. Every
rose garden should have a cream or
white rose and this is the one. Each 40c.

KILLARNEY—Flesh, suffused pink. Semi-double. The buds are long and pointed, fragrant and free blooming.

LADY ALICE STANLEY—Large, pale, flesh petals with the reverse side of the petal a deep coral rose. Large, very double fragrant flowers on long stems. A continuous bloomer. Each 60c.

LOS ANGELES—Frequently spoken of in Southern California as the Queen of Roses and probably one of the most satisfactory varieties for garden purposes. It possesses a color absolutely new in roses, being a luminous flame pink toned with coral and shading to gold at the base of the petals. The buds are long and pointed and expand to a very large flower. It is beautiful from the opening of the bud until the last petal drops, and if properly pruned and cared for will produce wonderful stems. No California rose garden should be without the Los Angeles. Each 60c. Each 60c.

Maman Cochet

LADY HILLINGTON—A most popular rose wherever it is grown, the color being a deep orange yellow, buds long and pointed, very sweetly scented and holding its color well. The habit of growth is erect and strong. A free bloomer. Each 50c.

LOUISE CATHERINE BRESLAU— Coral-red, shaded chrome yellow. Long oval buds developing into fragrant globular flowers. Robust grower. Each 85c.

LULU—A recent introduction, bearing splendid long buds of brilliant orange pink shaded copper. This is a fine free flowering rose which is highly resistant to disease. Pick the buds when they first show color. Each 85c.

MAD. EDOURD HERRIOT—A handsome rose of coral-red, shaded with yellow and bright rosy scarlet. Is sometimes called "Daily Mail" because of the Daily Mail gold cup it won in London in 1912. It is beautiful in bud or open flower and should be in every rose garden. Each 60c.

MAMAN COCHET—Deep rose pink on outer petals, but very much lighter in the center. Buds are extremely large and beautifully formed, with outer petals well reflexed. One of the most popular varieties and generally known as Pink Cochet. Each 40c.

ME. BUTTERFLY—Bright pink suf-fused apricot and gold. Free growth with beautiful buds and flowers. Each 60c.

MME. ABEL CHATENAY—Rosy carmine tinted salmon. The flowers are large, exquisitely formed and the bush is of vigorous growth. Each 40c.

MME. CAROLINE TESTOUT-Large full, globular flowers of bright satiny pink with a brighter center. This is the rose that is grown so freely in Portland and it is one of our good varieties. Each 40c.

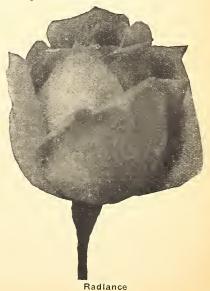

MRS, AARON WARD—A very fine rich yellow, Medium size in bud and excel-lent for cutting, Each 40c.

RS. A. R. WADDELL—Orange pink or reddish salmon, with the outer petals flesh color. The flowers are medium size and semi-double. Highly colored and very free blooming. Each 40c.

MRS. HENRY MORSE—Lovely pink, shaded salmon, deeper at base, High pointed blooms, free flowering with distinct tea scent. Each 85c.

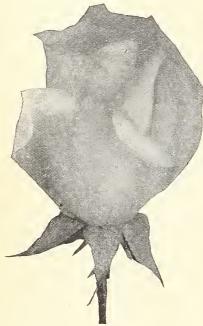

IRS. H. R. DARLINGTON—A deep cream yellow, producing many flowers of perfect form. This is a Gold Medal rose, a vigorous grower and quite frag-rant. Each 85c.

OPHELIA—This rose has had a host of admirers for years and is still considered one of the very attractive varieties. The color is a salmon flesh shaded rose, with a chamois center. A rose that is lovely at every stage, in bud or open. Each 40c.

PADRE—A recent introduction that is admired by all who see it. Beautiful and novel coloring, entirely different from any other rose, this being a brilliant coppery red, flushed with yellow at the base. The habit of growth is vigorous, the flowers are large and the buds long and pointed. Each 60c.

QUEEN ALEXANDRIA—A most attractive color combination of vermillion, with a deep orange base. The petals are reflexed and the reverses are shaded deep old gold. Free blooming and fragrant. Each 85c.

Constance

RADIANCE—Large cup shaped flowers of soft carmine pink and one of the very best garden varieties. The growth is vigorous and erect, with large spreading branches and flowers are produced on good long stems. Radiance is sure to please. Each 50c.

RED RADIANCE—A vevlety glowing crimson with all of the magnificent qualities of the Radiant Pink. The flowers are full and extremely double. RED RADIANCE-Each 50c.

ROSE MARIE—A pleasing clear rose-pink and one of the very popular roses for the California garden. Remark-ably free flowering, producing large, long, pointed buds which develop into full flowers of beautiful form. Each 40c.

SHOT SILK — Color orange-rose, overshot with golden-yellow and flushed soft rose. Handsome shaped bud. Vigorous growth with very attractive foliage. Introduced 1924 and a gold medal variety. Each \$1.50.

SUNBURST—Yellow shaded coppery orange, with the outer petals lighter. Both bud and flower are of good shape and it is one of our best blooming varieties. Each 40c.

UNA WALLACE-A beautifully formed rose of luminous old rose color, without markings of any kind. Slightly frag-rant, a profuse bloomer and a color that is quite different from any other variety. Each 85c.

WHITE COCHET-- Beautiful white with edges flushed rose. In other respects it is the same as the Maman Cochet. Each 40c. creamy

WM. F. DREER—In general form this rose is very similar to Los Angeles and it has much the same habit of growth. but it differs entirely in color, being deep golden yellow, heavily flushed and shaded deep peach and old rose. A grand rose for cutting purposes. Each 60c.

CLIMBING ROSES

L. LOS ANGELES—Rose enthusiasts who know the Los Angeles will be delighted to learn that at last a climber has been developed in this world famous rose. It has all the excellent qualities of the original bush variety, makes a heavy growth and produces lovely flowers of luminous flame-pink, toned with coral at the base of the petal. For further description see the bush varieties. Each 85c.

MARECHAL NIEL—Deep yellow climber. Probably one of the best known roses in existence. Very large and wonderfully fragrant. Each 85c.

CL. HADLEY—Same as the well known bush variety. Each 60c.

L. HOOSIER BEAUTY—Deep crimson with darker shadings. Just like the bush variety. Strong and vigorous.

BELLE OF PORTUGAL—A very fine climbing rose which has come into popular favor within the past few years. The flowers are very large, of a soft salmon pink in color and are produced on long stems. It is a free bloomer, particularly in the Spring time. Each

CL. GEN McARTHUR—Possesses all of the good qualities of the bush variety and is very beautiful as a climber. Each 40c.

L. AMERICAN BEAUTY—Rich car-mine flowers, 3 to 4 inches in diameter and produced in great abundance. Each

AMERICAN PILLAR—Large single flowers, 3 to 4 inches across, of a lovely shade of rosy carmine with white eye and yellow stamens. The flowers are borne in large clusters and when in full bloom the plant presents a gorgeous display. Each 40c.

CL. BANKSIA WHITE—Small white flowers in great profusion, making one of our most popular climbers. Each

CL. BANKSIA YELLOW-Same as White, xcepting the color is a clear yellow. Each 40c.

CL. CAROLINE TESTOUT—Another strong grower, with foliage and flowers, same as bush from which it is a sport. Each 40c.

CHEROKEE PINK-Produces great clusters of flowers, the color being a soft shade of silvery carmine pink. Each 40c. CL. CECILE BRUNNER—One of the strongest growing roses and very free bloomer. Baby size flowers, a clear pink. Each 40c.

CL. DOROTHY PERKINS—Beautiful deep pink, and a variety that is well known for its graceful clusters of flowers and heavy foliage. Each 40c.

R. VAN FLEET—Dainty color of rich flesh pink hue. The long pointed buds are borne on very long stems, making it an excellent variety for cutting. Each 85c.

L. FRAU KARL DRUSCHKI—Pure snow white and strong grower. Each 50c.

L. GOLD OF OPHIR—A most beautiful color combination of copper, carmine and salmon. One of the popular climbers of Southern California. Each 40c.

L. KILLARNEY—Deep shell pink and long pointed buds opening into very large flowers. Each 40c.

CL. LADY HILLINGDON—In every way as desirable as the bush. A vigorous grower. Each 50c.

DUCHESS D'AUERSTADT-Color vivid Nankeen yellow. A very large, full and strong growing sort. Sometimes considered superior to Marechal Niel. Each 85c.

CL. LOUISE C. BRESLAU—Coral-red shaded chrome yellow, similar to bush variety and a wonderful rose. Each 85c.

L. MAMAN COCHET—A true sport of the bush variety so well known. Strong grower and excellent for foliage or flower. Each 40c.

L. MRS. AARON WARD—Rich yellow, similar to the bush variety. Each 60c.

PAUL'S SCARLET—Perhaps most brilliant rose grown in Southern California, Color is a vivid shining scarlet, in large semi-double flowers which remain unusually long and in good condition on the plant. Each 50c.

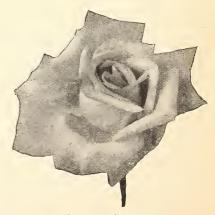

REINE MARIE HENRIETTE — Rich glowing crimson. Very desirable climber. Each 40c.

CL. SILVER MOON—Foliage a rich dark green providing a fitting background for the vey large semi-double cream and white flowers. Each 40c.

CL. SUNBURST—Same as the well known bush variety. As a climber for flower and foliage we recommend the Sun-burst highly. Each 60c.

CL. TAUSENDSCHOEN—Soft pink, flow-ering freely and large clusters. Vigor-ous and almost free from thorns. Each

L. WHITE COCHET—Large flowers of white, tinted pink. Should be used where heavy foliage is desired. Each

Climbing Sunburst

CHRYSANTHEMUM PLANTS

No garden should be without a bountiful supply of this universal favorite, furnishing as it does a profuse array of color when other flowers are scarce. It is not satisfactory to leave old plants of Chrysanthemums year after year, and it is advisable to introduce fresh stocks propagated from the new growth from old clumps left over from the year before. Young plants should be set out any time from April 15th to the middle of June, in a sunny open place well fertilized. Plant about 15 inches apart in the row and 2½ feet between the rows. When the plants are 4 to 6 inches high pinch out the tops. Later select the best and strongest shoots, perhaps two of them,

removing all others. These will supply two good flowers to cach plant; however, you may leave more shoots for more flowers, but they will be smaller. Water about once each week, following each irrigation with thorough cultivation. Sprinkling occasionally will help prevent Red Spider and stimulate growth. If the leaves curl or become discolored, or any kind of Middew makes its appearance, spray immediately with a solution of 2 teaspoonfuls of Destruxol to one gallon of water, and a few days later spray with Bordeaux Mixture. Spray as often as it is necessary to keep the plants clean. The varieties we offer are all strong, well rooted plants, propagated from cuttings.

NOVELTIES

Price 30c each, \$3.00 per dozen of one variety. Packing and postage 25c dozen extra.

Cream Spider—A very fine spider-like flower. Cream colored tinted with pink. Easily grown and large flowered without disbudding.

Appreciation from San Diego

I am sure proud of my rose bushes I got from you last spring and intend to double my order this spring.

MADEIRA VINE (Also Called Mignonette Vine)

A popular vine with round, glossy leaves growing from a tuber. Is much used for covering fences, porches, etc. A heavy frost will kill the foliage, but new growth will start again readily from the roots. Has small white fragrant flowers. Should be planted during the winter months. 10c each, \$1.00 per doz.

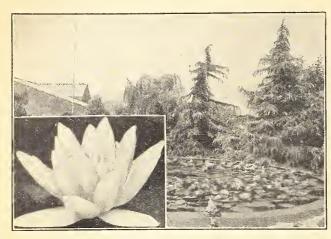

TUBEROSES

Mexican Everblooming

The most fragrant of all tuberoses and a wonderful bloomer. Flowers are pure white and clustered from six to a dozen on stiff stems, making them excellent for cut flowers. The bulbs of these multiply from year to year, producing great masses which should be separated and transplanted every three years. They are very hardy and will grow and bloom in the warm inland valleys equally as well as on the coast. A dozen bulbs will plant a row six feet long. 10c each, 75c doz. Large size 15c each, \$1.25 doz. The most fragrant of all tuberoses and

Excelsior Double Pearl—This variety is grown largely for its individual flowers which are large and double. The spikes are dwarf and full flowered. The culture is the same as for the Mexican variety. 10c each, \$1.00 per doz.

WATER LILIES

Much charm is added to a garden in the acquisition of a water-lily pond, whatever size it may be. It is a simple matter to construct a pool which, once established, needs little attention beyond the ordinary care given a garden. We will gladly furnish gratis, upon request, a leaflet giving instructions how to build a pond and how to grow water-lilies.

Hardy Water Lilies

Packing and Postage 10c Extra for Each Lily; or may be sent by Express, transportation charges beind paid at destination.

Alba Candidissima Early and free bloomer with large pure white flower. Each \$1.50.

Flowers rosy-yellow on first day, changing to deep Aurora red on third day; stamens orange. Useful for tubs. Each \$2.00.

Comanche Wonderful combination of orange and amber red. Largest and finest of all apricot tinted vableomer. Each \$3.50.

Early bloomer producing large, cup-shaped, fragrant flowers of violet rose shaded with Conqueror white. Each \$5.00.

Escarboucle Very striking color of vermillion-red. ceptional attractive and free blo bloomer. Each \$6.00.

Gladstoniana
being very massive Each \$1.50.

Flowers pure dazzling white and cupshaped. One of the best for large pools, and requiring plenty of space to develop.

Gloriosa Superb variety. Flowers of perfect form; petals concave; deep carmine rose becoming dark red late in season. Continuous bloomer. Each \$5.00.

Called Queen's Wreath and Rosa de Montana. A rapid growing and lovely vine with heart-shaped leaves and bearing quantities of rose pink flowers in wreaths. Blooms in the summer and fall. A vine which will thrive in hot, sunny situations and if cut down by frost will come up again in the spring. Strong, 3-year-old roots. Each \$1.00.

BEGONIA

(Tuberous Rooted)

(Tuberous Rooted)
Ready about January 1st
These are very satisfactory as summer bloomers. For outside beds, plant in a shaded location, covering the bulbs about one-half inch deep. Water lightly until growth starts. After the foliage has died down in the fall, lift them and store in dry sand. Tuberous Begonias make very good pot plants. Use a five-inch pot for each bulb filled with rich sandy loam and give the plants light but not direct sun. No bulb is more satisfactory for pot culture. for pot culture.

Single Scarlet, Yellow, Salmon, Rose.

25c each, \$2.50 per doz.

Double Scarlet, Yellow, Salmon, Rose.
35c each, \$3.50 per doz.

HARDY IRIS

Caterina—A lovely light blue Hardy Iris and one of the heaviest bloomers. We feel that our catalogue would not be complete without this wonderful Iris, particularly since it is one of the medium priced varieties. Long borders of them or individual plants are very satisfactory and the long blooming season makes it one of the leading varieties. We grow them in large quantities and offer them 15c each, 4 for 50c, \$1.25 doz., 50 for \$4.50.

Aurea-Rich chrome yellow.

Isoline-Lilac-pink and brown-orange beard.

Lorelei-Standards yellow and falls purple edged yellow.

Pallida Dalmatica-Extra tall lavender blue.

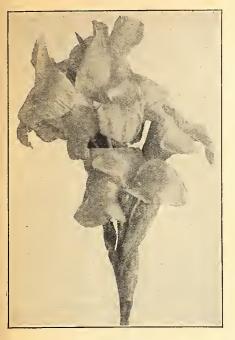

Queen of May—Soft rose, flushed lilac. Price—35c each, \$3.50 per dozen.

A & M Purple—This is a large flowering Hardy Iris that may be used to good advantage in long borders or large beds. We grow these in large quantities and can supply most any size order. 75c doz., 50 for \$2.75, 100 for \$5.00, 1,000 for \$45.00.

A & M Light Blue-10c each, 75c dozen. A & M White-10c each, 75c dozen.

Iris Caterina

Orange

Indiana—A bright, vivid orange. Fine shaped flowers in large trusses. Green foliage. Five to six feet high. 10c each, \$1.00 per doz., \$6.00 per 100.

Wyoming—A large, orchid flower of pure, rich orange. Handsome bronze leaves. Four feet high. 15c each, \$1.50 per doz., \$7.00 per 100.

White

Eureka—Full trusses of large flowers, an almost pure white. Very fine grower: green leaves; four to five feet high. 25c each, \$2.50 per doz., \$9.50 per 100.

CANNAS

Cannas have always been in demand and now with the wonderful new colorings and the improved size of flowers, they are even more popular. The large, handsome, ornamental foliage and beautiful spikes of bright flowers make the cannas ideal for mass plantings, backgrounds, borders or hedges. They may now be obtained in heights varying from 3 to 6 feet, and in colors of rose, red, orange, to pure white. Also some foliage 3 to 6 feet, and in colors of rose, red, orange, to pure white. Also some foliage is bright green and some a rich bronze. These new orchid flowering and large truss varieties bloom freely for six to eight months. In mild climates they are evergreen, but we recommend cutting away the old stalks in the winter to make room for the new growth. They should be separated every three years. Set the roots 12 to 15 inches apart. They flower more freely in sunny situations but grow well in partial shade, requiring at all times plenty of moisture.

Yellow

Gold Bird—In color a clear lemon yellow. The flowers are often 5 inches across, the petals being broad and rounded. Excellent green foliage. Three to four feet high. 15c each, \$1.50 per doz., \$7.00 per 100.

Austria—Pure yellow with crimson markings in throat. Beautiful shade. Foliage green. 4 to 5 fet high. 15s each, \$1.50 per doz., \$7.00 per 100.
Gladiator—Yellow spotted red resembling a tiger lily. Splendid bloom. The foliage is green with silver edge. 4 to 5 feet high. 15c each, \$1.50 per doz., \$7.00 per 100.

Orange and Scarlet

Panama -- Large flowers rounded petals of strong terra cotta red color. The throat and edges of the petals are spotted with golden yellow. Leaves green. The most unique and brilliant canna listed. 10c each, \$1.00 per doz., \$6.00 per 100.

Red Varieties

The President—Glowing scarlet flowers of immense size and altogether a beautiful variety. Green foliage. 4 feet high. 25c each, \$2.50 per doz., \$9.50 per 100.

Colossal — Luxuriant foliage of rich green. Height six feet. The flowers are a bright, rich red and the largest of all. Very striking for a background or center of a group. 15c each, \$1.50 per doz., \$7.00 per 100. per 100.

King Humbert—One of the most popular Cannas. Immense orchid flowers of brilliant orange red often streaked with gold. Sturdy bronze foliage. Four to five feet high. 20c each, \$2.00 per doz., \$8.25 per 100.

Uncle Sam—Deep vivid crimson. One of the largest orchid reds. Green foliage. Five to six feet high. 10c each, \$1.00 per doz., \$6.00 per 100.

Pink Varieties

Hungaria—A fine, clear pink. Flowers large with rounded petals. Dwarf, luxuriant, green foliage. Two to three feet high. 20c each, \$2.00 per doz., \$8.25 per

Wabash — Large fine flowers, borne many in a truss, in color salmon-pink. Rich bronze foliage. Height four feet. 20c each, \$2.00 per doz., \$8.25 per 100.

Morning Glow—Large shell-pink blooms. Light green foliage. 4 feet high. 20c each, \$2.00 per doz., \$8.25 per 100.

Scarlet and Gold

Duca De Otranto—A very lovely lily-shaped variety of golden orange, which changes to a glowing carmine. An interesting and wonderfully effective cannato grow. Green leaves. Four to five ft. high. 15c each, \$1.50 per doz., \$7.00 per

Collection-1 bulb each Uncle Sam, Gold Bird, Panama, Wabash, Wyoming and Duca De Otranto—six varied colors—for 70c postpaid. Two collections for \$1.30 postpaid.

LILIES

Lilies deserve a place in every garden. They are beautiful, fragrant, and require little care except in planting. They should be planted eight to ten inches deep in soil which has been mixed with well rotted manure and sand. Lilies should not be disturbed. If planted in pots, observe same conditions, only covering to a depth of one inch. The pots should be plunged in soil and not watered until growth appears. growth appears.

LILIUM AURATUM

January 1st to March 1st

Gold Banded Lily of Japan, Flowers white, spotted crimson, with pure gold band running through center of each petal. Very fragrant and the most beautiful of all Japanese lilies. 35c each, 3 for \$1.00, \$3.50 doz.

LILIUM TIGRINIUM **SPLENDENS**

This is the lovely Tiger Lily bearing handsome orange salmon flowers spotted black. It is a good pot or garden variety, a free bloomer, and grows very tall. 35c each, 3 for \$1.00, \$3.50 doz.

LILIUM RUBRUM

January 1st to March 1st

"Red Japan Lily" - Flowers white, shaded and spotted with crimson, very fragrant. One of the best for cut flowers as the flowers do not all open at once. 35c each, 3 for \$1.00, \$3.50 doz.

ZEPHYRANTHES

Fairy Lilies

Wonderful little edging plants, with decorative grass-like leaves; growing about a foot high and bearing a lovely flower about two inches across. The bulbs multiply rapidly and bloom pro-fusely. White 10c each, 60c doz.

CALLA ELLIOTIANA (Yellow Calla)

December 1st to April 1st

One of the most attractive flowers grown, suitable for outdoor bedding or for pot culture. The blossom is large and a deep golden yellow. The leaves are spotted white.

Medium size-25c each, \$2.50 per doz. Large size-35c each, \$3.50 per doz.

Pink Baby Calla—(New). Grows to a height of about 18 inches. The flowers are miniature Callas being 1½ to 2 inches across and of a pretty rose shade. They grow nicely out of doors in Southern California or they may be used as a pot plant. 75c each, 5 for \$3.00.

Calla Elliotiana

TREE AND SHRUB SEEDS

Most tree seeds should be planted during the winter and early spring months. Pine and Conifer seeds in March and April. Sow in boxes of well drained soil and keep in a protected place. A lath house is the best. Water in the morning to prevent seedlings from "damping off." When about two inches high, pot up and grow in pots until large enough to set out.

ACACIA—Soak seed in hot water 12 hours before planting.
A. Baileyana—30 ft. The most popular. A fast grower with glaucous green foliage. Pkt. 10c, oz. 45c.

A. Cultiformis—"Knife-leaved" Acacia. A fine shrub with glaucous green leaves. Height 15 ft. Pkt. 15c, oz. 50c. A. Dealbata—10 ft. "Silver Wattle" finely cut foliage. Good for street planting. Pkt. 10c, oz. 45c.

A. Decurrens—50 ft., "Green Wattle." A rapid grower. Can be used as windbreak and is valuable for turner's work. Is rich in tannin. Pkt. 10c, oz. 45c.

A. Floribunda—30 ft. A pretty tree of pendulous habit, quick growth and constantly in bloom. Pkt. 15c, oz. 50c.

A. Latifolia—30 ft. "Golden Wattle."
Ornamental; leaves long and rather
broad, Does
10c, oz. 45c.

A. Lopantha—30 ft., "Crested Wattle." Rapid grower and useful for temporary shelter. Grows in poor soil. Pkt. 10c, oz. 15c.

A. Melanoxylon—75 ft. A compact tree useful for street planting. Wood used in cabinet work. Pkt. 10c, oz. 45c.

CER MACROPHILLUM — "California Maple," 75 ft. A native deciduous tree. Leaves large. Beautiful in autumn. Pkt. 10c, oz. 25c.

CALLISTEMON RIGIDUS ("Bottle Brush") — A graceful tree or large shrub with drooping branchlets. The leaves are narrow, pointed and rigid. Flowers in bottle brush like spikes of deep red. Succeeds with little care Pkt. 15c, 1/4 oz. 50c.

AMPHORA OFFICINALIS—"Camphor Tree," 30 ft. An ornamental and at-tractive tree with shiny green foliage. Pkt. 10c, oz. 25c. CAMPHORA

CASSIA ARTEMISIODES—Shrub. Soft, gray-green, finely - cut foliage. Deep yellow, sweet scented flowers. Stands drought. May be used for hedges. Pkt. 15c.

CEDRUS DEODARA—A beautiful ever-green of silvery green foliage, pyramidal form and drooping branches. Pkt. 15c,

CERATONIA SILIQUA — "St. John's Bread" or "Carob Tree." A very orna-mental compact growing tree. Thrives in any soil and will withstand drouth. The leaves are a dark, glossy green. Pkt. 10c, oz. 25c.

COTONEASTER PANNOSA—Shrub of upright growth, small branches drooping. Leaves green above, silvery beneath, White flowers followed by red berries in the fall. Pkt. 10c.

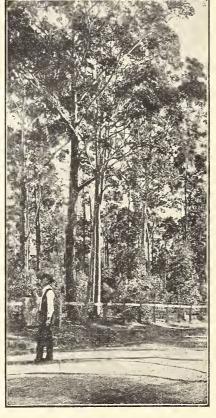

CALIFORNIA CHERRY (Cerasus Ilicifolia)—A bush or small evergreen tree, very ornamental with shiny, green holly-like foliage. The flowers grow in racemes and are followed by large, red cherries. A handsome shrub and extensively used for hedges. A native of California. Pkt. 10c, oz. 15c, lb. \$1.50.

CATALINA CHERRY (Cerasus Integrifolia)—A native of Catalina Islands. Similar to the preceeding but the leaves are larger and less spiny and the fruit larger. Pkt. 10c, oz. 15c, lb. \$1.50.

COPROSMA BAUERI—A very popular, low-growing shrub with round, glossy, bright green leaves used a great deal in mass against porches and walls. Pkt. 15c, oz. \$1.00.

CRATAEGUS PYRACANTHA (Coccinea) —A thorny, thick-growing shrub with small leaves. The white flowers are followed by orange scarlet berries, making the plant beautiful during the winter. Pkt. 10c.

CRATAEGUS CRENULATA—Similar to the preceding but has smaller, rounder leaves and the berries are red. Pkt. 10c.

Eucalyptus

CRATAEGUS YUNNANENSIS — A low-growing, squatty variety coming from Japan. The berries are very bright red and borne in great abundance. A handsome, rare variety. Pkt. 10c.

CRYPTOMERIA ELEGANS—"Fine leaved Japan Cedar." Fine foliage which turns red in the winter. A beautiful tree for the lawn. Pkt. 15c, oz. 50c.

cupressus Macrocarpa — "Monte-rey Cypress," 75 ft. Native of Califor-nia. Extensively used for hedges and windbreaks, Pkt. 10c, oz. 30c.

SEMPERVIRENS-"Italian Cypress." A long-lived narrow tapering tree. Used in landscape gardening. Pkt. 10c, oz. 60c.

C. ARIZONICA ("Arizona Cypress")—One of the best cypresses, with a bluish cast to the foliage. Has a slender, upright growth and will thrive in almost any soil, standing both heat and cold. Pkt. 10c, oz. 50c.

DRACAENA AUSTRALIS—Cultivated for the ornamental foliage. Planted in the open in California. Pkt. 15c, oz. 75c.

DRACAENA INDIVISA—Similar to above but grows more rapidly. Pkt. 15c, oz. but grows mo 50c, lb. \$3.50.

ESCALLONIA MONTEVIDIENSIS tractive, evergreen, erect shrubs growing in almost any ordinary soil. Of very free flowering habit. White flowers in loose terminal clusters. Pkt. 15c, 1/8 oz. 50c.

ENGLISH LAUREL (Prunus Laurocerasus)—One of our handsomest evergreen shrubs. Is effective where ever planted. Broad leaves, leathery and glossy. Small white flowers in clusters. Seed very slcw in germination. Pkt. 10c.

FEIJOA SELLOWIANA or PINEAPPLE

GUAVA—An attractive evergreen shrub with glaucous foliage and purplish red waxy flowers. The fruit is delicious and may be eaten raw or cooked. A new and unusual plant well deserving a place in our gardens. Pkt. 15c.

EUCALYPTUS

EUCALYPTUS

Should be sown in June or July in thoroughly prepared seed boxes. The beds should be kept moist at all times and watered only with a very fine spray. When seedlings appear water only in the morning to prevent damping off. The seedlings should be transplanted when 2 or 3 inches high, to other boxes or small pots, and should be ready to set out in February and March. One pound produces about 22,000 seedlings.

E. Corynocalyx—"Sugar Gum," 100 ft. This variety is the most drouth re-sistant of all, but will not stand much frost. Wood hard. Pkt. 15c, oz. 75c.

E. Ficifolia-"Scarlet Flowering Gum." The best of the red flowering varieties. 25 seeds 25c.

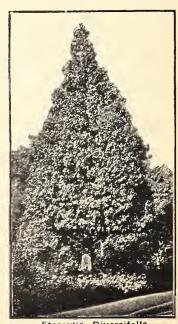

E. Globulus—"Blue Gum." Most rapid grower and best known species. Grows well along coast. Wood is durable and also good fuel. A profitable tree to grow. Pkt. 15c. oz. 75c.

E. Rostrata—"Red Gum." A very tall variety. Withstands extremes of heat and cold. Grows most quickly in the hot sections. Is durable and useful for railway ties, etc., and also for cabinet work. Pkt. 15c, oz. 50c.

E. Rudis—"Desert Gum." Very valuable for hot arid sections. Wood durable. Good for street planting. Pkt. 15c, oz. \$1.00.

E. Tereticornis—"Forest Red Gum."
Considered the best for general timber purposes. Grows well in hot and cold sections. The wood is unsurpassed for durability. Pkt. 15c, oz. 75c.

E. Viminalis—"Manna Gum." A hardy rapid growing variety well suited to exposed situations. The wood is softer than some, but is easier to work and takes a fine polish. Useful also for windbreaks. Pkt. 15c, oz. 75c.

Sterculia Diversifolla

TREE AND SHRUB SEEDS—Continued.

- GENISTA FRAGRANS—A pretty shrub, compact in growth, covered in the spring with bright yellow flowers. Pkt.
- GREVILLEA ROBUSTA—"Silky Oak." A pretty tree with fern-like foliage. Orange colored flowers. Rapid grower and withstands drouth. Pkt. 15c, oz. 75c.
- JACARANDA MIMOSAEFOLIA—30 feet. A fine tree with fernlike foliage, bearing clusters of light blue flowers. Pod contains 30 or 40 seeds. 5c. a pod.
- JUNIPERUS CALIFORNICA—"California Juniper." A small tree with dark green foliage. Pkt. 10c, oz. 25c.
 J. Virginiana—Red Cedar, 60 ft. A handsome well known tree. Pkt. 10c, oz. 35c.
- KENNEDYA OVATA ALBA—Low-growing, spreading shrub. Leaves oval. Flowers very attractive, forming a terminal short raceme of pea shaped flower. Pkt. 10c.
- KENNEDYA OVATA ROSEA—Similar to the above with rose colored flowers. Pkt, 10c.
- KENNEDYA OVATA LILACINA—Similar to other Kennedyas only with lilac colored flowers. Pkt. 10c.
- LEPTOSPERMUN LAEVIGATUM A rapid growing shrub of drooping, graceful habit, succeeding well in California. Is not praticular as to location, growing well in the interior and on the coast. Foliage grayish green and white flowers borne in great profusion. An evergreen. Pkt. 25c.
- LIBEOCEDRUS DECURRENS—100 feet.
 "Incense Cedar." A fine native tree of compact growth green foliage and red bark. Pkt. 15c, oz. 75c.
- LIGUSTRUM NEPALENSE—''S mall Leaved Privet.'' An evergreen shrub much used for hedges. Makes a thick, dense hedge, easily trimmed. Pkt. 10c. oz. 25c, lb. \$2.50.
- Privet." A large shrub with thick, dark green leaves. Like the above, is much used for hedges. Pkt. 10c, oz. 25c, lb. \$2.50.
- MELIA UMBRACULTIFORMIS—" Texas Umbrella Tree." Deciduous. A well known shade tree. Withstands heat. Pkt. 10c, oz. 20c.
- MELALEUCA ARMILLARIS "Bottle Brush." A large-growing shrub of graceful drooping habit. Leaves are dense and needle like. Flower clusters white, cylindric in form and about 2 inches long. Is hardy and is generally planted in shrubbery borders. Pkt. 15c.
- MELALEUCA HYPERICIFOLIA—"Bottle Brush." A tall-growing shrub. bright Brush." A tall-growing shrub, bright green opposite leaves. Flower clusters a rich red. Very showy and one of the best. Pkt. 15c.
- MELALEUCA NESOPHYLLA— "Bottle Brush." Similar to the above but more rapid growing. Flowers soft lavender pink. Pkt. 15c.
- ARBUTIFOLIA PHOTINIA HOTINIA ARBUTIFOLIA ("California Holly")—A native shrub of California, growing well along the coast or in the hot interior. A decorative plant, especially during the winter when covered with the deep red clusters of berries. Pkt. 10c, oz. 25c, lb. \$2.50.
- MYRTUS COMMUNIS—Handsome green shrub growing to a height of 3 to 10 feet or more. Strongly scented.

 Bears a blue black berry. Pkt. 15c, oz.

- PINUS CANARIENSIS—"Canary Island Pine." A fast growing, robust tree, standing drought well. The foliage is a beautiful glaucous blue color. Pkt. 15c. oz. 50c.
- PINUS HALEPENSIS—"Aleppo Pine." Recommended for seaside planting. Trunk slender and destitute of branches for a considerable height when full grown. Grows to a height of about 60 ft. Pkt. 25c, oz. 75c.
- PINUS INUS INSIGNIS—"Monterey Pine." Native of California, growing well near the coast. Pkt. 10c, oz. 40c.
- PITTOSPORUM CRASSIFOLIUM-A tall growing shrub. Gray-green foliage and red flowers. Pkt. 15c.
- PITTOSPORUM EUGENOIDES—A large shrub or small tree. Handsome light green leaves and dark stems. Used for specimen plants or hedges. Pkt. 15c.
- PITTOSPORUM RHOMBIFOLIUM -20 feet. A handsome ornamental tree much used for street planting. Flowers white and followed by orange yellow berries lasting during the winter. Pkt.
- PITTOSPORUM TOBIRA—A low-grow-ing shrub with dark green leaves and fragrant pure white flowers. Pkt, 15c.
- leaved.) Height 10 feet. A shrub or small tree which may also be used for hedges. Deep green, glossy leaves. Flowers fragrant at night. Pkt. 15c.
- VIVIDIFLORUM A shrub with shiny green leaves and green flowers followed by yellow berries during the fall. Very fast growing and especially recommended. Pkt. 25c.
- PLUMBAGO CAPENSIS—A spreading or climing shrub with clean, smooth, light green foliage. Flowers pale blue, phlox-like in shape. Very free flowering. Pkt. 10c.
- SCHINUS MOLLE—"Pepper Tree." A graceful well known tree with fine foliage and red berries. Pkt. 10c, oz. 25c.
- . SEMPERVIRENS—"California Red-wood." A fast growing native tree with reddish colored wood. Ornamen-tal. Pkt. 15c, oz. 50c.
- SOLLYA HETERAPHYLLA—"Australia.
 Blue Bell." A hardy evergreen climber or may be used as a spreading shrub producing many brilliant blue bell shaped flowers. Will grow in partial shade. Pkt. 10c.
- STERCULIA DIVERSIFOLIA—"Victorian Bottle Tree." A fine tree for street planting. Glossy green foliage which varies in shape. Pkt. 15c, oz. 50c.
- THUYA OCCIDENTALIS—"American Arborvitae." A good tree for planting in Lawns. Bright green foliage, turns bronze in winter. Pkt. 10c, oz. 40c.
 T. Orientalis—"Chinese Arbor Vitae."
 A small growing tree. Bright green flattened foliage. Pkt. 10c, oz. 25c.
- THUYA ORIENTALIS AUREA—"Golden Arborvitae." Similar to the above. The foliage beautifully tinged with gold in the spring. Pkt. 10c.

USE SEMESAN FOR "DAMPING OFF"

"The seed we treated with Semesan all showed a marked resistance to 'damping-off.' The most pronounced results were obtained with California Redwood and two varieties of Eucalyptus (Globulus, Viminalis). These seeds were treated with Semesan dust and the young plants watered with liquid Semesan."—San Jose, California California.

Phoenix Canariensis Palm

PALM

All varieties may be sown in the open ground in mild climates except Cocos Palms. These-latter require artificial heat. Some germinate quickly, others take as long as six weeks. Palms grow best in a well drained sandy loam.

- HAMAEROPS EXCELSA—"Windmill Palm." Leaves fan shaped, and deeply cut. The hardiest palm we have, a fine CHAMAEROPS lawn palm. Oz. 15c, lb. \$1.50.
- COCOS AUSTRALIS—"Pindo Palm." A very ornamental palm with glaucous green paves. Quite hardy. 10 seeds 15c. 100 for 75c.
- COCOS PLUMOSA—A tall graceful palm, a rapid grower and a splendid variety for street planting. 10 seeds 20c, 100 seeds \$1.25.
- ERYTHEA EDULIS-"Guadalupe Palm." 30 ft. A rapid growing variety. Fan shaped leaves of dark green. 10 seeds 15c, 100 seeds \$1.00.
- ERYTHEA ARMATA—"Blue Fan Palm." A slow growing hardy palm, fine for lawns. Leaves a glaucous blue. 10 seeds 20c, 100 seeds \$1.50.
- PHOENIX RECLINATA—A graceful palm large and withstands cold. 10 seeds 15c, 100 seeds \$1.00.
- Palm." The most graceful and the handsomest of our hardy palms. Leaves pinnate and a green color. One of the most effective for lawn planting. 18 seeds 10c, 100 seeds 35c.
- SEAFORTHIA ELEGANS—One of the most beautiful for conservatory or pro-tected gardens. Quite hardy. 10 seeds 15c, 100 seeds \$1.00.
- ASHINGTON FILIFERA—The well known California Fan Palm. Grows 60 to 80 feet. Always a bunch of leaves hanging close to trunk. Oz. 10c, lb. \$1.00.
- WASHINGTON ROBUSTA A hardy Fan Palm. Leaves dark green without any threads. Pkt. 10c, oz. 25c.

FRUIT AND NUT TREES

BITTER ALMOND MYROBOLAN PLUM CALIFORNIA BLACK WALNUT APRICOT PEACH WILD SOUR ORANGE-Write for price.

Delivery January to April.

GRASSES

Australian Rye Grass Used extensively for lawns, particularly in the Imperial Valley, Salt River Valley, Arizona, and similar climates. It grows faster than Blue Grass, is coarser and will stand considerable abuse or neglect. For back yards, where it might be walked over frequently or where children play, it is a very good grass. Lb. 35c, 10 lbs. \$3.20 postpaid. Ask for quantity good grass.

ITALIAN RYE

(Lollum Italicum)

Arrives earlier at maturity than Perennial and produces a large amount of nutritious herbage. Its duration being but two or three years, it is not adapted for permanent pastures, yet highly valuable for rotation of crops. It is specially adapted for sowing in autumn with oats, barley, rye or clover, as a catch-crop for fattening stock. Sow 30 pounds per acre. (Per lb. 35c) (10 lbs. \$3.00) postpald. Write for quantity price.

ORCHARD

COCKSFOOT

(Dactylis glomerata)

This grass does well sown either with or without other grasses. It is frequently sown in such pasture mixtures as white clover, red clover and rye grass. If sown alone, 25 or 30 pounds of the Cocksfoot seed will insure a good stand of

(Per lb. 35c) (10 lbs. \$3.00) postpaid. Write for quantity price.

RED TOP

(Agrostis vulgaris)

Red Top is a perennial grass which grows from a few inches to five feet in height under varying conditions of soil and climate. But the average height is probably 18 to 20 inches. It is now more highly esteemed as a pasture grass than for a hay,

No other useful grass would seem so well adapted for growing in wet situations, even in places so moist as to be saturated with water for a considerable portion of the late autumn and the early spring.

The soil should be carefully prepared. Thoroughly pulver-ized and clean of weeds. Sow broadcast 14 lbs. of seed per acre. Also planted with other grasses for lawns. (Per lb. 45c) (10 lbs. \$4.00) postpaid. Write for quantity price.

RUSSIAN BROME

(Bromus inermis)

Bromus Inermis is one of our hardiest perennial grasses; no amount of cold will kill it. It withstands the severest drought, and water may stand on it for weeks. It will grow on any rich soil.

It requires twenty pounds of seed per acre.

Russian Brome Grass is essentially a winter pasture grass, but it also makes good hay. All kinds of stock are fond of it, and no other grass, unless it be orchard grass, will furnish grazing for so large a portion of the year. Its producing and feeding value for hay is about equal to that of timothy.

It keeps alive under conditions that would destroy many other grasses and it will then grow vigorously when moisture is brought to it. It can be made to render excellent service in states where rainfall is not more than 12 to 15 inches.

(Per Ib. 50c) (10 Ibs.) \$4.50) postpaid. Write for quantity price.

ALFILARIA

(Erodlum cicutarium)

Aifilaria or "filaree" grows wild without any attention in all classes and conditions of soil except swamps and excessive alkall. Soon after the first heavy fall rains have saturated the ground the "filaree" begins to make its appearance. It is good pasturage at all stages of its growth, even when mature and dried up. In nutritive qualities it compares favorably with alfalfa and live stock of all kinds fatten on it readily. It is hardy even where the winter temperature reaches zero or below. Little or no preparation of the soil is required. It attains perfectlon where introduced in Texas.

Sow 10 lbs. of seed per acre. Sow just before the rainy season.

season.

(Per lb. \$1.10) (10 lbs. \$10.00) postpald. Write for quantity

PACEY'S RYE

An excellent hardy grass for the coast range, on hillsides and meadows. It resists drouth wonderfully and is quick to recover after a slight rainfall. Sow 30 lbs, per acre. (Per lb. 40c) (10 lbs. \$3.00) postpaid. Write for quantity price.

Sudan Grass Has made good and has become more popular each year. It is not particular as to soil—
endures much alkali—an annual—planted during April, first
cutting in sixty days may yield four tons of dry hay per acre
and three to four tons may be cut each thirty days until October.

Twelve pounds of seed is required to plant an acre in order

Twelve pounds of seed is required to plant an acre in order to produce hay of fine quality.

The seed may be planted with a Superior beet drill or other drill with extra plate or sow broadcast.

Sudan Grass thrives with excessive moisture and endures extreme drouth. The foregoing points are not all the best features of this grass. In the months of August and September, when all other grasses are dry, then is the time that Sudan is most valuable for fall pasture for cattle and hogs.

Sudan Grass is ideal for growing with the Whip-Poor-Will Cow Peas. The stem is stiff enough to support the vines, and the mixture makes a better balanced ration for the stock. It is a good silage. It is a good thing to plant in old alfalfa fields. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

HARDING GRASS

THE GREATEST PASTURE GRASS

This grass is a true perennial, one seeding being good for years. It cannot become a pest because all spread is from the crown. It never bloats. Will stand heavy tramping of sheep or cattle. Under good conditions it should carry one cow per acre 10 months of the year, after the second season.

Old pastures or burned over land should be sown after the heavy winter rains have set in.

(Per oz. 35c) (lb. \$3.50) postpaid.

RHODES

(CHLORIS CAYANA)

(Write Department of Agriculture, Washington, D. C.)
Ask for Farmers Bulletin No. 1648
Mr. Dairyman, there is no longer any excuse to permit any alkali lands to be wasted with tar weed. Your alkali lands are now a valuable asset. Rhodes grass will increase the value of these acres several fold.
Rhodes grass does not grow underground sprouts like Johnson or Bermids grass, but sends runners over the surface like

Rhodes grass does not grow underground sprouts like Johnson or Bermuda grass, but sends runners over the surface like the strawberry plant. It is easily eradicated.

Rhodes Grass will smother Bermuda and other weeds because of its dense growth. It is easily eradicated by being plowed once and let stand for sixty or ninety days. It adds

plowed once and let stand for sixty or ninety days. It addenums to the soil.

The best time to plant Rhodes Grass is from March 1st to August 1st. Broadcast twelve pounds of seed per acre, going over the field twice, once north and south and east and west, sowing six pounds each way. Keep the soil continually moistened until the grass is established. Do not pasture until after the second cutting.

(Per ib. 85c) (10 lbs. \$7.50) postpald. Write for quantity price

BERMUDA

(Cynodon dactylon)

Bermuda Grass is unquestionably the best pasture grass in the south, viewed from the standpoint of palatability, pro-ductiveness and endurance. There are reasons for believing ductiveness and endurance. There are reasons for believing that in its proper sphere it will produce more grazing and more meat than blue grass under the most favored conditions. Sheep can graze upon it from 7 to 9 months in the year according to locality. Sow seed during May and June, five pounds per acre. (Per lb. 60c) (10 lbs. \$5.50) postpaid. Write for quantity price.

CHEWINGS FESCUE

One of the best grasses to sow in a meadow. Mixed with Red Top and White Clover it is a valuable pasture grass. It is also suitable for lawns and putting greens. Sow 20 lbs. per acre. (Per lb. 75c) (10 lbs. \$6.00). Write for quantity price.

DALLAS

(Paspalum dilatatum)

(Paspalum dilatatum)

This grass should be established on pastures.
Grows on any kind of soil—endures some alkali—excellent for permanent pasture on marsh or mesa—grows winter and summer with moisture—excellent for hay—may be cut every six weeks—becomes dormant with drouth but revives with less moisture than any other grass, yet will survive if submerged for several weeks—stools and seeds freely. It has been tried and proven in this section to be one of the best of grasses for permanent pasture in meadows, in swamp lands,
The seed takes root among the weeds and devil grass, choking out everything in its way. The dense matting roots make a thick sod capable of supporting the cattle on marshy land. The stock relish it fully as well as alfalfa. It is as easy to cradicate as Timothy or as any other bunch grass. Ten pounds is sufficient to sow one acre broadcast. It thrives in high altitude.

The second year's growth of Dallas Grass on our trial ground excels all the low bent grasses for quick recovery after drouth. (Per lb. \$1.00) (10 lbs. \$9.00) gostpaid. Write for quantity

A & M Field Corn

Mexican June The corn for the arid southwest. When the white man was a pioneer in Arizona and New Mexico, he tried to grow corn but failed. The country and climate were condemned; corn could not be grown, but thanks to the good work of the various state and federal experiment stations, we have the Mexican June. This has been bred up by years of selection from seed which has existed among the Indians from time antedating the Aztecs. Imperial Valley growers realized its merits some years ago. In Arizona, New Mexico and Texas, it is now grown where no other variety will thrive. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

ORANGE COUNTY PROLIFIC

THE MOST SATISFACTORY SILAGE CORN

Orange County Prolific was introduced by us in 1911. At that time we had stalks on exhibition with nine ears of commercial size and others that were smaller.

The season just past indicates, by numerous testimonials, that Orange County Prolific corn leads all other varieties both for corner siles.

for corn or silage.

We have a report that the Orange County Prolific planted July 25th produced 28 tons per acre. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity prices.

Appreciation from Anderson, Calif.

Would like to say that my corn raised from this seed (Orange County Prolific) last year took first prize at the State Fair at Sacramento.

A & M Ensilage Corn This has long been a favorite other corn we know that will take its place. It is very stalky, stands up well and yields a heavy tonnage per acre. Under irrigation and on good soil it has produced more ensilage than any other corn. If you want ensilage and plenty of it plant A & M Ensilage Corn. (Lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

Hickory King An early white corn which is planted prolific and is one of the main varieties planted in California for this purpose. Matures in 110 days. (Lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

Big Jim

Very fine variety of yellow dent corn. The large ears averaging 12 inches in length are very properly desirable for ensilage, as the stalks attain a great height with a big leaf growth. (Lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

King Philip A yellow dent 90-day corn planted quite extensively in California for grain. (Lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

A & M Ensilage Corn

Grain and Field Crops

BARLEY

Sow 60 to 80 Pounds per Acre.

We alm always to have the best it is possible to procure. We cannot fix a price because of the fluctuations of the market. Bearded Barley and Beardless Barley. Write for prices.

TRY THIS

One rancher whose name we cannot recall, told us that he sows his barley early and cuts it three times for hay; each time before the heads appear, and then allows it to head out for grain. Try it.

Barley as a Winter Pasture

Several other plants furnish good winter pasture, but none are so valuable as Barley. It affords grazing earlier, and more abundantly. It recovers more rapidly after being grazed down. It is more relished by stock and more wholesome. It stands up so that stock can eat it with less dirt or other objectionable matter, and it is never affected by rust.

Sown in September it affords good grazing until May, but if the stock are taken off in March, a good crop of grain can be harvested.

For this purpose sow 100 pounds per acre and irrigate if needed.

Barley sown in an alfalfa field during October will make good pasture during the winter when alfalfa is dormant, or it may be grown for hay without injury to the alfalfa.

BROOM CORN

Dwarf Evergreen This is the standard because it is easily harvested and in quality there is none better. It is the best to plant throughout the Southwest. (Per lb. 25c) (10 lbs. \$2.50) postpaid. Write for quantity price.

RYE

Sow 60 Pounds per Acre.

Although Rye is sown largely for early winter pastures, green manuring and a limited acreage for the straw, it should be grown more largely for the grain, which is now in great demand. Write for prices.

Winter Rye Write for prices.

DWARF ESSEX RAPE

Pasture for Hogs, Sheep and Poultry

There is a need and a place for an extra quick growing green forage crop for use any time during fall, winter and spring, and our Dwarf Essex Rape fills that need exactly.

Rape can never become a pest as it belongs to the same general family as the turnip and rutabaga, and when planted under favorable conditions of soil and season, it makes an immense crop of green forage, juicy and succulent, and often at a time of year when little green feed is available.

(Per Ib. 30c) (10 lbs. \$2.50) postpaid. Write for quantity price.

OATS

Sow 70 to 100 Pounds per Acre

Kanota This is a selected strain of the best Southern Red Oats, which should in time replace, to a large extent, the California Red and Texas Red Oats for local planting. The variety matures 10 to 14 days earlier than the Red Oats planted under similar conditions, produces finer and taller hay—also heavier heads. Tests conducted throughout the State of California during the past 5 years under direction of the University of California, College of Agriculture, and the local Farm Bureau, show this variety to be more Rust resistant, practically immune to Smut, and from one-third to one-half greater in yield than the California and Texas Red Oats. The yield has always compared most favorably even in dry years, when good crops have been harvested when other varieties have failed, and good hay crops cut when other varieties have sometimes not even made pasturage. 10 lbs. \$1.00 postpaid. Write for quantity price. tity price.

Texas Red (Rust Proof)—This is one of the few varieties profitable to plant here. We have this on hand during the planting season.

Texas Red Oats-Grown in Texas.

Texas Red Oats-Grown in California. Write for prices.

WHEAT

Sow 60 Pounds per acre.

Defiance
One big drawback against growing wheat in California has been rust, but this has been largely weather conditions prevail. This variety where cool, moist weather conditions prevail. This variety is practically rust-proof. Defiance is a late wheat and should be planted early and seeded thin. It is non-shattering and classed as a hard white wheat, and number one for milling. Write for prices.

This variety is recommended because of its large Sonora

This variety is recommended because of its large yield, earliness and drouth resistance. It is susceptible to rust and inclined to shatter, but it has long been a standard variety in Southern California back from the coast. It is classed as a soft white wheat. Write for prices.

Early Baart Early Baart Wheat is the right variety for the interior valleys. Favorable reports have come from San Joaquin and Imperial indicating that this variety will yield 20 sacks per acre under dry conditions that would impair other crops.

More acreage will be planted to this variety because it is no longer an experiment; it has demonstrated that it will outyield other varieties for dry farming. Write for prices.

BUCKWHEAT

Common The soil is always moist where shaded with buckwheat. Sow the seed any time after April 1st, about 45 pounds per acre. Within ten weeks it will have matured. It will not survive the winter; therefore it is necessary to sow once a year.

We highly recommend the growing of Buckwheat for reclaiming desert land, as it will start a growth and produce a crop under more adverse conditions than any other crop we know of.

(Per lb. 25c) (10 lbs. \$2.00) postpaid. Quantity price on application.

Plant Sunflower for Windbreak

SUNFLOWER

Sunflower stalks are rich in potash, plow them under, do not waste them.

Mammoth Russian

Should be planted largely for seed or silage. It makes a good wind-break around your garden. It is a valuable plant that grows anywhere with little attention.

(Per Ib, 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

Commercial Beans

Reading from left to right:—Broad Windsor, Lewis Lima, Red Kidney, Pinto, Pink, Garvanza, Blackeye, Mexican Red, Lady Washington, Navy, Tepary, Lentil.

If only one pound is desired, send 25c to cover packing and postage. For larger quantities, ask for the prevailing prices.

Red Kidney Like the Pink and Navy beans it is sold because of its better flavor. It is grown largely for canning. Plant 40 to 50 lbs. to acre.

Mexican Red There is a ready market for it at our wholesale grocers, who supply the great southwest territory with groceries. Plant 30 to 40 lbs. to acre.

The Blackeye This bean is always profitable to the pounds per acre without irrigation, and on almost any kind of soil. It is a good cover crop and soil renovator. The beans find ready market at a fair price. Rabbits will not eat the Blackeye.

The Blackeye is in a class by itself, and the price is not governed by the market for other beans. Indeed the price has proven to be the reverse. When commercial beans are low the Blackeye commands a higher price. It is safe to plant Blackeyes because you always get a crop, and you never fail to sell at a fair price.

If your soil needs humus, plant Blackeye.

Plant 30 to 40 lbs. to acre.

very popu Garvanza—(Chick Pea) This is very popular farther south where it grows to perfection and where the demand for it is very great. Plant 40 to 50 lbs. to acre.

Pink An old time favorite because it is very prolific, has a good flavor and is one of the best sellers. It is always listed in the market quotations. Plant 30 to 45 lbs. to acre.

The Lewis Lima This common lima is grown so large-strains of the common limas, but the Lewis is conceded to be the best. Plant 50 to 60 lbs. to acre.

Lady Washington and Navy These two varieties Both are small white beans, but the Navy is slightly smaller and is often distinguished by being called the Small White, while the Lady Washington is called the Large White. The Navy is more resistant to mildew. Plant 25 to 30 lbs. to acre.

An application of two sacks of Toro Sulphūr and 1,000 pounds of lime per acre will greatly reduce your losses from mildew, nematode, and wire worm and will greatly increase your yield. Give it a fair trial.

A&M Alfalfa INOCULATE WITH MULFORD CULTURE

Chilean or Common This variety has proven so entirely satisfactory to everyone Chilean or Common

for more than forty years that nothing better was looked for, and is indeed now so thoroughly satisfactory that many will hesitate to believe that any variety of alfalfa can be better. Write to the University Farm, Davis, Cal., and ask for their latest reports concerning Hairy Peruvian alfalfa as compared with the Chilean or Common Alfalfa, or write us for our

Alfalfa bulletin.

Alfalfa bulletin.

We have often been asked where the seed which we sell was grown, some being under the impression that Alfalfa seed produced in particular sections is preferable, but we have found, through careful investigation, that such is not the case and no certain section is favored in producing superior seed.

If the stock is of high germination, free from noxlous weed seeds, and true to name, that is the great consideration.

Broadcast 20 lbs. per acre.

(Lb. 40c) (10 lbs. \$3.50). Write for quantity price.

Hairy Peruvian

We first offered this variety in 1918. It is hardier and it does produce more hay the first year than common alfalfa, but it does not endure as well. Many large growers now prefer the common alfalfa. With these comments we offer the Hairy Peruvian Alfalfa to those who may have had better results and yet pre-

Altalia to those who may have the fer it.

A Virginia Bulletin, No. 207, page 10, says: "Many fallures in growing alfalfa may be attributed to lack of inoculation."

Wherever we find successful old fields of alfalfa, if the roots are carefully dug up and examined the supply of bacteria nodules will be found to correspond to the vigor and quality of the plant." (Lb. 40c) (10 lbs. \$3.50). Write for quantity price.

Nurse Crop with Alfalfa

As a rule on Sandy lands that are subject to drifting, or on As a rule on Sandy lands that are subject to dritting, or oh heavy lands which have a tendency to bake, a nurse crop may be of benefit as it reduces drifting or baking. Unless the soil is subject to drifting or baking it is not advisable as a general rule to use a nurse crop. Under dry land conditions a nurse crop should never be used, as the moisture supply is too limited. JAMES MARSHALL, Colorado Agricultural College. We suggest barley or oats as a nurse crop.

Mammoth Red Clover In England and in English Colonies this clover is called "Cow Grass." The name recommends it to dairymen. The same instructions for common Red Clover apply also to Mammoth Red Clover. (Per lb. 60c) (10 lbs. \$5.00) postpaid. Write for quantity price.

CLOVER FOR FORAGE

Melilotus alba This is a valuable addition to the farm as a forage crop. When quite young, it may be pastured or cut and cured for hay. This should be done just before the bloom appears. It is hardier than alfalfa, more drouth-resistant, and better for renovating the soil. It may be cut twice the first season and three or four times the second season, yielding 2500 to 3000 pounds of hay each cutting. It is as easy as alfalfa to eradicate, is biennial. On account of its hardiness to resist extreme cold, heat and drouth it is grown largely for pasture. It is highly recommended by the Department of Agriculture. (Per lb. 35c) (10 lbs. \$3.00) postpaid. Write for quality price. Write for quality price.

Red Clover (Common)

This clover is quite famillar to the rancher from the eastern states where it is to the dairyman what our alfalfa is

It is hardier than alfalfa, therefore we recommend it for higher altitudes or farther north than the San Joaquin Valley where it will not be subject to the hot dry atmosphere of the interior valleys nor to the climate of Southern California.

There is a place for Red Clover, but not where alfalfa thrives. (Per lb. 60c) (10 lbs. \$5.00) postpaid. Write for quantity price.

Alsike or Swedish Clover This is one of the hardispersion perennial and does not winter kill. It will do better on moist land than any other variety of clover, and is suitable for either hay or pasture. When sown with other grasses it forms a thick undergrowth and greatly increases the yield. (Per lb. 60c) (10 lbs. \$5.00) postpaid. Write for quantity price.

California Experiment Station (Bulletin 292) reports elght years' results where legumes were grown annually and turned under. The legume plots were checked against plots that were green manured with non-legume crops. In these experiments there was an annual average increase in corn amounting to 14 bushels, which amount contains 12.93 pounds of nitrogen. There was also an annual average increase of 62 bushels of potatoes which contain 12 pounds of nitrogen.

New Jersey Experiment Station (Bulletin 289) records the results of four years of wheat after soy beans, obtaining an average annual recovery of 54 pounds increase in nitrogen in the crops. In the same bulletin it is stated that the legume green manure furnished at least as much nitrogen as 15 tons of

THE WONDER FORAGE

Wonder Forage-Our Seed Field

THE WONDER FORAGE PLANT

It stools from ten to forty full sized stems the thickness of a thumb and smaller. When the main stems mature, separate branches grow from each joint bearing other seed-heads.

The stems are succulent and sweet, as saccharine cane, not dry as non-saccharine cane, therefore it is as good as sorghum for dairy cows. Stock will eat every particle of it.

Our demonstration clearly indicates the Wonder Forage Plant will yield double the tonnage of any other sorghum. Five pounds of seed is sufficient to plant an acre.

Dairymen, each year that you delay planting this Wonder Forage Plant (Sudan Sorghum) you are missing something worth while for green forage. One acre of Wonder Forage is more valuable than three acres of Sudan Grass, both in quantity and quality. One acre is equal to two acres of sweet sorghum. The latter can be cut but once, the former twice with equal tonnage. (To do this will require good soil and ample irrigation, but it will do it). It has less sugar content than sweet sorghum, but must be classed as a saccharine. Do not waste another season by holding off. It is so much better than Sudan that there can be no comparison.

Stockmen, if you want a rich, green feed, sow the Wonder Forage.

(Per Ib. 40c) (10 Ibs. \$3.50) postpald. Write for quantity price.

MILLET

Golden or German

ly prolific of seed. The heads are covered with small bristles. Where birds can be controlled this is probably the best variety to grow for seed. Where moisture is scarce this is a very good variety to grow for pasture. (Per Ib. 25c) (10 lbs. \$2.00) postpaid.

Russian, or Hog If moisture is lacking and you need pasture in the shortest space of time, plant Red Russian or Hog Millet; there is a very slight difference, and both may be pastured within six weeks; both mature seed within sixty days. It grows three to four feet tall. This seed may be harvested by heading and a second crop will mature within another thirty days. We recommend it for a quick temporary pasture. (Per lb. 25c) (10 lbs. \$2.00)

Canary

This can he grown quite successfully here. It is just as easily grown as barley, and requires the same cultural treatment. Several carloads are imported each year into Los Angeles. The consumption throughout the United States is enormous. All of this could be grown in California. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price,

Hemp What has been said here of Canary is applicable also to Hemp. It is easily grown and requires about 100 days to mature a crop. It requires sixty pounds of seed to plant an acre, and should be sown in February. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

Soil Renovators for Winter Crop

Inoculate with Mulford Culture

Melilotus alba I have come to the conclusion that, except on sandy soils, it is better to broadcast the seed than to drill it. This is especially true where there is alkali. Sweet-clover seed should be very close to the surface. A light harrowing or dragging with a light brush drag, will mix the seed with the soil sufficiently for germination. It is better, too, to sow the seed in the fall and let the rains bring it up. It gets a better start that way.

Melilotus alba is being recognized more and more each sea-

Melilotus alba is being recognized more and more each season as a valuable soil renovator. Because of its large and extensive root system penetrating deep into hard subsoil, there extensive root system penetrating deep into hard subsoil, there decaying, permits moisture to enter and break up the hardpan that plowing may become deeper and more thorough. These roots have gathered nitrogen and add much humus, all of which is essential to building up new or run-down soil.

Melilotus has other uses in soil renovating; it will grow in alkali soil and reclaim it. Therefore if you have any land that will be benefited by Melilotus alba by all means plant it. (Per lb. 35c) (10 lbs. \$3.00) postpaid. Write for quantity price.

Burr Clover A native clover and one of the best nitrogathering crops. Needs but little moisture and will thrive on very poor soil. If your grazing lacks native grasses, plant Burr Clover. (Lb. 30c) (10 lbs. \$2.50) postpaid.

Canadian Field Pea When it is too late to plant Vetch or Melilotus plant Canad-

They may be planted as late as January and yet be plowed under in time for planting a summer crop. If your summer crop, like melons and potatoes are not harvested until Novemplant Canadian Peas.

Neither is the Canadian Pea inferior to other cover crops when planted at the right time. The right time is from September until February and on any kind of soil.

Notice—Do not plant just before a rain nor irrigate before they are well above the ground and established. If the soil is too wet after planting the seed will rot. (Per lb. 25c) (10 lbs. \$2.00) postpald. Write for quantity price.

Hubam Clover Hubam is an annual sweet clover planted in citrus groves during February or March; it forms a perfect cover of green clover that will greatly reduce the fall of oranges known as the "June drop." It is at its best stage for green manuring to be plowed under during July and August.

Stock relish it therefore it is good for pasture. The flowers are rich with honey and on that account it should be sown largely by bee men. It requires about 10 lbs. of seed to plant an acre. (Per lb. 60c) (10 lbs. \$5.00) prepald.

Melilotus indica Was introduced by us in 1909, has now become recognized as the legume best adapted for green manuring in the orchards of California, because it may be planted late in the fall after all crops have been harvested, will grow all winter with only the season's

It prevents erosion during the rainy season, is easily plowed under, is richer as a fertilizer and if allowed to stand until July will prevent much of the June drop.

Melilotus indica is the best legume with which to build up your soil during the rainy season for the summer crop to follow, particularly potatoes and melons. (Per lb. 20c) (10 lbs. \$1.50) postpaid. Ask for quantity price.

OREGON WINTER VETCH

Vetch For many years was considered the best legume for planting in orchards during the rainy season. It is only because Melilotus indica is a little hardier that vetch now holds second place for that purpose; but science has discovered a new use for vetch. It is true that oats have long been planted together with vetch for the purpose of supporting the vetch that it may be easy to harvest. Now the new discovery is that vetch may be planted with oats, wheat, rye and barley in order that the grain will be fertilized by the nitrogen gathered at the roots of the vetch, thus greatly increasing your crop of grain, or if grown for hay it nearly doubles the yield. Twenty to thirty pounds of grain sown with twenty pounds of vetch per acre, will yield more and better hay than sixty pounds of grain per acre if sown by itself. (Per lb. 25c) (10 lbs. \$2.00) postpald. Write for quantity price.

Purple Vetch The chief value of Purple Vetch as compared with the common is in the rapid growth making it desirable both for fall and spring planting. The spring planting in citrus orchards prevents the June drop and is in prime for July plowing. It is a legume and therefore it is good fertilizer for the orchard. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Ask for quantity price.

Broad Windsor Bean Sometimes called Horse Beans, grows upright on a single stem bearing a profusion of large well-filled pods. The roots are enormously productive of nitrogen. It will withstand 28° temperature; therefore, may be planted as late as September for best results as a winter cover crop. (ib. 25c) (10 lbs. \$2.00) postpald. Write for quantity price.

Small Windsor (Small Horse Bean) This is identical with the Large Horse Bean except that it will not grow as large, but is preferred by many for green manuring because of the smallness of the seed it requires fewer pounds to plant an acre and it is argued that more plants per acre will produce more nitrogen.

Its popularity has greatly increased during the year just passed and this is evidence that it has some advantages over the large Horse Bean. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

Soil Renovators For Summer Growing

Whip-poor-Will Cow Pea For more than twenty-five years the Whlp-Poor-Will has been the standard summer crop for uring not only here but throughout the South. Why? (See picture.)

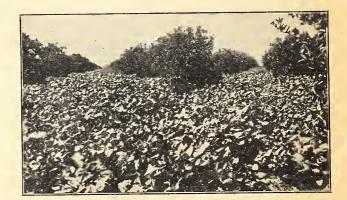

- (1) It will grow on practically all kinds of solls, whether sandy or clay, poor or fertile.
 - (2) It is of the easiest culture.
- (3) It has a big, strong, deep-root system, well supplied with large nitrogen gathering nodules.
- (4) It revels in summer heat, and is extremely droughtresistant.
- (5) It grows very rapidly, shading the soil from excessive heat, and leaving no room for noxious weeds.
- (6) It greatly benefits the succeeding crop by accumulation of nitrogen in the soil.
- (7) It leaves the soil in fine physical condition for the fall planting of grain or other winter crop.
- (8) It produces an abundance of highly nutritious pods and leaves in a few months.

(9) It may be made into hay or ensilage, or pastured, the seeds may be used for stock feed or human consumption.

Plant 40 lbs. per acre any time from April 1st until Sept. 1st. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity

Brabham Cow Pea It has only recently been determined definitely that the Brabham foremost as a desirable summer crop for green manuring. Few districts are free from nematode and while other crops nursed it thus spreading it over wider territory, the Brabham will discourage its development and if repeatedly planted may eradicate it from the field in which the Brabham is grown.

Under the light of the discovery that the Brabham pea is resistant to the nematode, to plant it would seem the wiser thing to do. (Per lb. 25c) (10 lbs. \$2.00) prepaid. Write for quantity price.

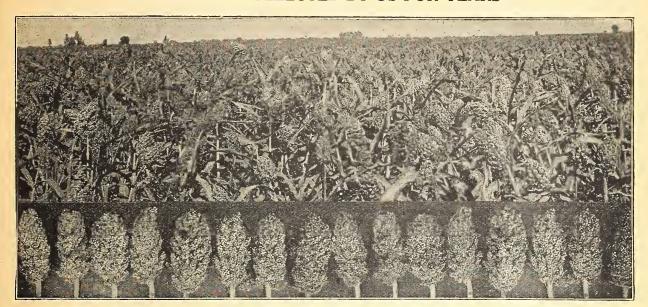

Cow Peas in Orchard

Soy Bean The Soy Bean is being more generally used as its merits become known. The importation for commercial beans or for seed but for early spring planting, for June cover crop and for green manuring it is very valuable and under certain conditions of soil may be preferred to clover or vetch. It is hardier than the cow pea and on that account may be planted earlier. It is valuable to grow in young vineyards either to be plowed under or for green feed for dairy cows. (Per lb. 25c) (10 lbs. \$2.00) prepaid. Write for quantity price.

A & M SELECTED DWARF MILO MAIZE

THE HEAVIEST YIELDING MAIZE GROWN SPECIALLY SELECTED BY US FOR YEARS

Since the cost per acre of Milo Maize Seed is very small it certainly pays to secure the best seed obtainable Where the soil is properly prepared it requires but 3 to 4 lbs. per acre, therefore, the cost of seed would be but a few cents, hence Milo Maize Seed should be considered entirely from the quality standpoint. Yield of grain per acre is what you want and you cannot afford to experiment on strains that are being grown by inexperienced growers.

A & M Selected Dwarf Milo Maize passed the experimental stage years ago and has been used in the milo maize producing sections of the western states so long that it is thoroughly established as a heavy yielding variety of uniform height. It was originally selected for the purpose of grain yield and by constant rogueing the size of the heads

and the compactness of them have been steadily improved until today it stands in a class by itself.

Being of uniform height it may be harvested by machinery but, if harvested by hand, the large heads reduce the cost of harvesting. It grows to a height of about 4 feet, is of stooling habit, and individual hills of 5 to 7 stalks in a stool each producing a large compact head are not uncommon throughout the field. We have had reported yields of two tons of threshed maize per acre and where the soil and climatic conditions are favorable we feel that this is a very conservative estimated yield. Very often there is a temptation among farmers and others to save their own seed of Milo Maize or to plant seed that has been produced in their own district, but since it is very easily crossed with other sorghums this is a bad practice and we advise against it. We produce our seed maize in isolated districts where <mark>there are no other sorghum crops grown near and by</mark> hill and head selection each year, the strain is kept uniform a<mark>nd</mark> true. Considering again that it requires but a few cents per acre to plant the very best milo maize seed there appears to be no good reason why the planter should experiment with untried strains. If you are going to plant Maize, let us send you a sample of our seed and quote prices on quantity.
(Lb. 25c) (10 ibs. \$2.00) (25 lbs. \$3.00) postpaid. Write for quantity price.

DOUBLE DWARF MILO MAIZE

This variety of red milo maize is very dwarf, growing only 2 to 21/2 feet high and has been developed especially for convenience and economy in harvesting. It can be cut and harvested by machinery in the same manner as heading grain. Very profitable crop to grow, the average yield being two tons per acre. Sow at the rate of 4 to 5 lbs. per acre from April until middle of June. (Lb. 25c) (10 lbs. \$2.00) (25 lbs. \$3.00) postpaid. Write for quantity price.

SACCHARINE SORGHUM

CULTURE: All surghums, saccharine or non-saccharine, should be sown in rows 30 or 36 inches apart, using five or six pounds of seed per acre. If irrigated it is necessary to cultivate it after each irrigation. It is advisable to give a shallow cultivation every two or three weeks until it becomes too large. The sorghum is ready to cut for the silo when the seed has

Honey This variety proved to be very desirable because of the large yield of grain, as well as enormous It is given special recommendation in the Farm Bureau Monthly, and has proven highly satisfactory to all who grow it. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

Early Amber The Early Amber has been grown in California for more than thirty years and has always proven entirely satisfactory. It grows twelve feet tall when allowed to mature, but it stools to a wonderful extent when cut about every four weeks.

(Per lb. 25c) (10 lbs. \$2.00) postpald. Write for quantity price.

READ

If you need forage for your horses, cattle or hogs, Sorghum planted about April 1st will furnish you the best feed in the shortest space of time. One-half acre will feed four head of stock all summer if only enough is cut each day for one day's need. In this way one can cut continuously all summer. As much as 40 tons may be cut from one acre.

NON-SACCHARINE SORGHUM

Egyptian Corn

Like the preceding fodder crops, it is grown chiefly for the foliage to pasture when young, but yields largely of grain. The chief merit of these fodder crops is in their hardiness to produce fodder and grain with almost no rainfall or irrigation. Sow eight pounds per acre drilled. (Per Ib. 25c) (10 lbs. \$2.00) postpald. Write for quantity price.

Feterita Of the many non-saccharine sorghums offered in this book—none have proven more popular from the start than Feterita, on account of its astonishing growth after it becomes well rooted. Every testimonial received expresses astonishment at its rapid growth.

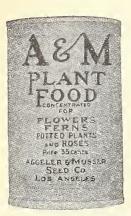

Sow 12 pounds of seed per acre drilled two feet apart; by so doing it yields 5000 to 6000 pounds of grain per acre. The grain has about the same feeding value as Egyptian Corn or Milo Maize; yields from two to three tons of grain per acre. The seed is more susceptible to cold than other sorghums, therefore should not be planted so early, nor should it be planted in cold soil.

The second growth stools wonderfully, producing several tons of excellent forage for pasture or for ensilage after the seed has been harvested. It thrives luxuriantly on soil so alkaline that field corn will not thrive. The heads are upright. (Per lb. 25c) (10 lbs. \$2.00) postpaid. Write for quantity price.

Napier Joints We offer for introductory purposes. (10 Napier Joints \$5.00) Postpaid.

FERTILIZERS

WRITE FOR QUANTITY PRICE

A & M PLANT FOOD

For Flowers, Ferns, Potted Plants and Roses

This concentrated plant food should be used by all who grow plants of any kind in pots, such as Ferns, hanging baskets, also for roses and in window boxes.

You have, no doubt, often noticed pale and sickly looking foliage on your plants. A & M Plant Food will restore the color and promote the growth.

the growth.

It is packed in a convenient, sealed 2-pound package. Will not deteriorate after being opened and, very important, it can be kept in the house without discomfort. If covered, there will be no disagreeable odor. Per package, 35 cents., f. o. b. Los Angeles.

ABM

VELVET

FERTILIZER

LAWN & GARDEN 100 LBS. AGGELER & MUSSER

SEED CO. LOS ANGELES

A & M HYDRATED LIME

The constant watering of lawns tends to sour the soil and eventually the lawn becomes foul with sorrel, Creeping Charlie, and other weeds which thrive in an acid soil.

This condition may be improved by applying A & M Hydrated Lime. 100 to 200 pounds applied to the average lawn on a 50 ft. lot will correct acidity and greatly improve the condition of the lawn. On very heavy soils it should be applied sparingly at first and should be applied more frequently. Heavy soils sometimes are slow to absorb the first application, but improvement may be noted by the time a second application is made.

is made.

The more foul the lawn is with those plants thriving on acid soil, the more lime should be applied, as it will tend to kill off the weeds and with the acid condition corrected in the soil the Blue Grass and Clover will begin to grow more luxuriously. A & M Hydrated Lime goes about twice as far as the ordinary air slacked lime. Price 80 lb. sack \$1.50; 4 lb. carton 26.

carton 25c.

A & M VELVET **FERTILIZER**

Quick and Lasting Results
A & M Velvet Fertilizer is a scientifically prepared chemical compound carrying the necessary elements for the promotion of plant growth.

It not only chances the beauty of the blossom and the color of the lawn, but it is a wonderful stimulant to vegetable life, and, in addition to its many uses in the garden, it can be applied with wonderful results in the field for vegetables and other crops.

This fertilizer is easy to apply and it is in powder form and quickly available.

For the convenience of our customers we have it packed in 25-pound, 50 pound and 100-pound bags, priced as follows:

SHEEP MANURE

With barnyard fertilizer becoming more and more scarce we offer, as perhaps the best substitute, our Groz-It brand sheep manure. It may be used for mulching lawns or as a fertilizer and the results are usually very satisfactory. For mulching the lawn it requires about one sack to 500 square feet. In comparison with barnyard fertilizer this may be slightly higher in price, but a saving will be made in the time spent pulling weeds for sheep manure carries very few weed seeds, if any. Price per sack \$2.00, \$35.00 per ton, f. o. b. Los Angeles.

LEAF MOLD

We exercise the greatest care in the selection of our Leaf Mold. For home gardeners who are growing their own plants Leaf Mold will be a great assistance for mixing in with the soil and for using as a covering for the seed. A mixture of about one-fourth or one-third Leaf Mold with good loamy soil makes a very nice combination for the growing of young plants in flats. Where seeds are sown in the open a light covering of Leaf Mold on the row or the seed bed will assist in holding the moisture and secure a hetter germination. Per sack \$1.25; 5 sack lots \$1.10 per sack, f. o. b. Los Angeles.

TORO BRAND SULPHUR

The application of sulphur to the soil to increase crop production is now a proven and accepted fact. In addition to its fertilizing qualities it is giving excellent results in the control of potato scab. It loosens hard cement like soil, is active in controlling fungus, produces a better quality of fruit and is generally beneficial to all crops. all crops.

PEAT HUMUS

Peat Humus is the ideal substance for maintaining soil in first class condition, thus giving plant life every assistance for vigorous growth. It contains no weed seeds, conserves moisture, and keeps the soil porous and aerated. Peat Humus should be mixed well with soil before planting seed and it will prevent baking when used as a top dressing. Our supply is fresh from the peat beds and is not dried out. Per sack \$1.25; 5 sack lots \$1.20 per sack, F. O. B. Los Angeles.

GYPSUM

Gypsum brings about a mechanical change in the soil by making it more pervious to water and air. Very heavy adobe soils are much improved with an application of Gypsum which loosens it and this condition tends to prevent packing and

Gypsum is also used in the treatment of soil containing black alkali. The quantities to be used in the control of black alkali depending upon the amount of its presence in the soil. For the home garden one lb. to the sq. ft. on extremely heavy soil will provide a favorable condition for beneficial action of soil bacteria, will assist in the retention of moisture and make for a better circulation of air and water. Gypsum, however, will not correct acidity—that is it will not make sour soil sweet. Lime must be used for that purpose. Gypsum 100 lb. sack \$1.25, 5 sacks \$1.10 per sack, ton lots 95c per 100 lbs, f. o. b. Los Angeles.

AMMONIUM SULPHATE A Nitrogen Fertilizer

Ammonium Sulphate is a natural by-product of Coke Ovens. It has been known as a high grade carrier of Nitrogen for about fifty years.

Some idea as to the value of Ammonium Sulphate as a nitrogen carrier may be obtained by the fact that to equal 100% of Ammonium Sulphate in nitrogen content, it would take: 100 pounds Nitrate of Soda or 290 pounds Cotton Seed Meal or 1,650 pounds of ordinary fertilizer or 4,000 pounds of good stable manure.

For Garden use rake the soil 1 pound to every 150 square feet. One pound is sufficient for any 1 year old tree or 1½ pound for a 2 year old tree. For field crops apply 100 pounds per acre. (25 lbs. \$1.75) (50 lbs. \$3.00) (100 lbs. \$5.75).

Fertilizers in Small Gardens

Amateur garden makers are often puzzled as to the amount of fertilizer needed for their small plots, because the usual directions give only the amount per acre. The following table shows (approximately) the proper proportions:

100 lbs. per acre equals 1 lb. for a plot 10x43 feet.
200 lbs. per acre equals 1 lb. for a plot 10x21 feet.
300 lbs. per acre equals 1 lb. for a plot 10x14 feet.
400 lbs. per acre equals 1 lb. for a plot 10x14 feet,
500 lbs. per acre equals 1 lb. for a plot 10x11 feet,

DUSTER BROWN No. 2

A very practical duster of new design. It is especially adapted for use in applying insect powders. It is simply constructed and works

extension is of sufficient length to enable the operator to spray ordinary crops without bending over. Very useful for dusting rose bushes, and garden plots generally.

Duster Brown No. 2-C, quart

Spraying and Dusting

To successfully grow roots, vegetables and flowers, it is necessary to be prepared at all times to combat and control the destructive insects which infest the garden. Insects are leaf-eating, or what may be termed as "chewing insects," and then there are the sucking insects. Different control measures are required for each. Aphis or Plant Lice are an example of the sucking insect and they are so classified because they suck the plant juices from beneath the surface of the leaf. Destruxol or Black Leaf 40 will destroy these, and Arsenate of Lead should be used entirely for all leaf-eating or chewing insects. These materials should be sprayed on the plants when it is necessary, and for the Aphis in particularly it is necessary to spray frequently. to spray frequently

FUNGUS—Please read carefully the insecticide page where you will find under each article listed, instructions for using and what to use. Every home gardener should have a good spray pump with which to apply these materials.

INSECTICIDES and SPRAY MATERIALS

Acme Dry Lime Sulphur

An invaluable spray for the control of fung u s diseases such as peach leaf curl, mildew, peach twig borer. pear scab, and many other ailments common to decidu-ous fruit trees.

mon to deciduous fruit trees. For the above spray with a mixture of 10 to 12 tablespoonfuls of Dry Lime Sulphur to one gallon of water sometime during the month of December and again in the spring when the buds begin to swell or show color.

Peach Leaf Curl is one of the very common fungus diseases and sapozing from the branches is an indication of this fungus. One spraying will not control it. You must spray twice, as outlined above. Dry Lime Sulphur is also used as a control of Red Spider and it may be used effectively on roses during midwinter or about January first. This for the prevention of Mildew in spraying Citrus trees: use about 3 tablespoonfuls to one gallon of water. In spraying large trees we call particular attention to the Compressed Air Sprayer listed in this catalogue. Acme Dry Lime Sulphur (1 lb. cans 35c) (5 lb. cans \$1.50). Write for quantity prices. May be mailed.

Acme 2-Way Spray

This very effective and approved and a p p r o v e d formula. containing 14% Arsenate of Lead and 83% Bordeaux Mixture, enables you to kill two birds with one stone. It will control all leaf-eating or chewing insects and at the same time the Bordeaux Mixture will control and prevent many of the fungus diseases that the average amateur gardener does not know are present. Acme 2-Way Spray is a powder to be mixed with water when used as a spray material, or it may

powder to be mixed with water when used as a spray material, or it may be used as a dust. Bordeaux Mixture stimulates plant growth and it is, therefore, an important addition to the 2-Way Spray. (1/2 lb. carton 25c) (1 lb. carton 45c) (4 lb. paper bag \$1.25) f. o. b. Los Angeles. Cannot be mailed.

Acme London Purple

As a spray or as a dust Acme London Purple is one
of the most effective insecticides and its general use is becoming more and more apparent.
The economy of using Acme London Purple lies in its superior stick its superior stick-

its superior sticking quality, in addition to being reasonable in price and quick in action. We recommend any other chewing insects. as a spray. (1/4 lb., paper bag \$1.25) f. o. b. Los quantity prices. distribution of the control of the control of the carton 45c) (4 lb., paper bag \$1.25) f. o. b. Los quantity prices. Cannot be mailed.

Acme Arsenate of Lead

For the control of codling moth, ca b b ag e
worms, caterpillars,
beetles and all other
ieaf-eating or chewing
in sects. In mixing
spray material use 3 to
4 heaping tablespoonsful of Arsenate of Lead
to one gallon of water.
Sprayed on the most
tender plants it will not
burn the foliage. For
dusting mix thoroughly
one part Arsenate of
Lead to 5 or 6 parts Hydrated Lime. This will
be found effective for
the Diabrotica Soror, which is the
twelve spotted beetle that infests
dahlias and other flowers; also dusted
on the silk will prevent corn ear worm
and it may be used as a dust for other
leaf-eating or chewing insects. (½

leaf-eating or chewing insects. (V_2 lb. carton 25c) (1 lb. carton 45c) (4 lb. paper bag \$1.50) f. o. b. Los Angeles. Write for quantity prices. Cannot be mailed.

Acme Bordeaux Mixture

Every gardener, otherwise, should have Bordeaux Mixture for spray-ing plants of all descriptions. It not

ing plants of all descriptions. It not only stimulates plant growth but controls fung us, such as Celery Blight, Apple Black Rot. Pear Scab, Mildew, Blight, and many other fungus ailments. It is probably one of the best preventatives (if there is one) of Tomato Blight and young tomato plants should be sprayed with Bordeaux Mixture from the time they show through the ground until they are ready for transplanting and at transplanting time dip the entire plant in Bordeaux Mixture, then spray until the plants are in bearing. Sometimes Bordeaux Mixture may prevent Blight by pouring it around the stem of the plant and allowing it so soak down to the root system. This prevent Blight by pouring it around the stem of the plant and allowing it to soak down to the root system. This is true not only of tomatoes but other plants as well. Young Sweet Peas should be sprayed with Bordeaux, also Chrysanthemums, and in fact any plant, tree or shrub in the garden would be benefitted by spraying with Bordeaux Mixture, Mix 12 to 15 level tablespoonfuls of Bordeaux Mixture Powder in one gallon of water, and for field spraying about 6 lbs. to 50 gallons of water for a 3-3-50 mixture. (1 lb. carton 45c) (4 lb. paper bag \$1.25) (8 lb. bag \$2.25) f. o. b. Los Angeles. Write for quantity prices. Cannot be mailed.

Acme Calcium Arsenate

Is especially valuable for use in dusting cabbage, potatoes and other crops for the control of many insects. It is extremely light and fluffy, having not less than 100 cubic inches to the pound, insuring even 100 cubic inches to the pound, Insuring even distribution when a effective results when used as a liquid spray. (1 lb. carton 45c) (4 lb. paper bag \$1.60) f. o. b. Los Angeles. Write for quantity prices. Cannot be mailed.

Acme Garden Guard

so far as we know Garden Guard is the only garden insectlcide on the market containing Bordeaux Mixture. It is a convenient, practical and economical all around garden insecticide. ready for use as it comes in the package; in a sifter can, easily applied, and very effective in combating the majority of insect pests that pray upon your garden. Applied early in the morning evening when the dew

early in the morning or late in the evening when the dew is on, it will control many chewing insects on vegetables, shrubs and flowers. The Bordeaux Mixture contained therein serves as a fungicide and will assist in preventing Mildew and other fungus difficulties. Used extensively by market gardeners. (1 lb. package 35c) (5 lb. package \$1.50) (100 lb. drum \$15.75) (200 lbs. \$31.00) f.o.b. Los Angeles. Cannot be mailed.

Acme Paris Green

For grasshopper and cutworm bait use Acme Paris Green as follows: one pound Paris Green, 10 lbs. bran. one pound Paris
Green, 10 lbs. bran.
1 quart brown molasses, 2 lemons
chopped fine, Add
water to make a
crumbly mass and
broadcast in the
field for grasshoppers. For cutworms
place the bait
about the garden
in piles of about
one teaspoonful at
intervals of 10 to
15 feet or near the
plants that are being destroyed by
cutworm. Cutworms are most active
at night and therefore the bait should
be placed in the
Green (¼ lb. carton 25c) (1 lb. carton 50c) (5 lb. carton \$2.00).

A & M Hydrated Lime

application of Hydrated Lime on the lawn will correct acidity in the soil. Acid soils a re usually caused by constant sprin-kling and very often in shaded places of the lawn will be found a sur-face growth

face growth of green moss. A & M Hydrated Lime will correct this by simply being applied on the surface and sprinkled. It loosens up heavy soils and prevents packing, baking and cracking, thereby making cultivation easier. It promotes the normal decay of organic matter in the soil. A & M Hydrated Lime, because of its fineness, its high calcium content, is an ideal agricultural lime and the most economical to use. It retent, is an ideal agricultural lime and the most economical to use. It re-quires about one-half as much Hy-drated Lime as any other form of lime to produce the same results. In sacks weighing approximately 80 lbs. \$1.50 per sack f. o. b. Los Angeles. 4 lb. cartons 25c, by mall 35c. spray

Destruxol

spray

oz. makes

oz.

4 oz.

Destruxol

This combination spray, containing Nicotine Sulphate and Cyanide, seems to be what we have been after for some time, making it possible through the fumes given off by the cyanide to reach insect life on the under side of foliage. Our tests have shown it effective when used at proper temperatures and conditions against such common garden pests as aphidis, thrip, lice, red spider, leaf roller hoppers, mildew and mealy bug. It is most effective under temeratures of 70 degrees and above, the warmer the weather the better, as the fuming action is greater under higher temperature. Our tests of this product would indicate there is little chance of burning or checking growth even though used at double strength. Use 1 large teaspoonful of Destruxol to 1 gallon of water. For roses or any plants not classed as distinctly tender use Destruxol at double strength in order to combat mildew and blight as well as insects. gals.

Black Leaf 40

A 40 per cent Nicotine solution for the control of plant lice or aphids on roses and other garden plants. Must be applied in vapor form with a spray pump. Black Leaf 40 will kill all aphids or plant lice that are covered with the spray material but a new supply of aphids may be carried to your plants the following day by the Argentine Ant. To control aphids it is necessary also to control Argentine Ant. A one-ounce bottle of Black Leaf 40 will make 6 gallons of spray. Full directions on the package, (1 oz. bottle 35c) (½ lb. tin \$1.25) (2 lb. tin \$3.50) (10 lb. tin \$13.50.) Sent by express or freight only. A 40 per cent Nicotine

Diamond "S" Sulphur

This sulphur is This sulphur is used mostly for preparing a lime sulphur solution, for which purpose it is very satisfactory. There is also a considerable quantity of it sold for the purpose of mixing with chicken feed. We do not recommend Diamond "S" brand recommend Dia-mond "S" brand of sulphur for or sulphur for sulphuring plants to prevent Mildew or other fungus. Anchor Brand Sulphur should be used

Brand should be used entirely for that purpose. Diamond "S" Brand Sulphur is packed 110 lbs. to the sack and the price is \$3.85 per sack, f. o. b. Los Angeles.

Dusting Sulphur

Mildew is more easily prevented than cured and there is no bet-ter preventative than Anchor Brand Sulphur, Brand Sulphur, this being the highest grade sulphur manufactured.

The fine snowflake like particles of the Anchor Brand

snowflake like particles of the Anchor Brand are condensed from a vapor and are not ground. This is what gives Anchor Brand Strong fuming qualities that are so well known. This sulphur is also very fine for the control of Red Spider and when dusted on the ground beneath the plants it combines with the oxygen in the air and creates a gaseous compound. This gas or vapor rises, passes through the foliage of the plant and destroys fungus spores. Sunlight, moisture and high temperature are contributing factors in the creating of these fumes. Price, 1 lb. 10c, 3 lbs. 25c, 110 lb. sack, \$5.33, postage or freight extra.

Tree Tanglefoot

A sticky substance that may be applied to the bark of trees to protect them from all climbing insects. One application is good for three or four months and it will prevent ants from entering tree tops. (Lb. Can 60c) (5 lbs. \$2.75) (10 lbs. \$5.25) f.o.b. Los Angeles May be mailed geles. May be mailed.

Blue Stone

(Sulphate of Copper)

(Sulphate of Copper)

Used to prevent smut on barley and wheat. The seed to be planted should be soaked in a solution of 1 lb. Blue Stone to 6 gallons of water. Soak the seeds for ten or fifteen minutes then spread it to dry. Blue Stone is also used in the water for the control of some fungus diseases. (Per lb 15c) (10 lbs. \$1.25) F.O.B. Los Angeles. Small quantities may be sent by mail. Ask for prices on barrel lots and larger quantities. larger quantities.

Nico Dust

Nico Dust

Cannot Be Mailed

For the control of Melon Aphids,
Garden Slugs, other Aphids of all
kinds, Red Spider, Beetles, etc., Nico
Dust is a contact insecticide and,
therefore, must be applied carefully
and thoroughly that the material may
come in direct contact with the bodies
of the insects. The Dust is most effective when the temperature is high
and when the air is still. Experimental work indicates that the various pests require various strengths
of Nico Dust to affect the proper kill.
The use of the coarse strength Nico
Dust guarantees the best results at
the minimum cost and large operators,
such as cantaloupe growers, etc., have
found Nico Dust a most inexpensive
control. In addition to Nico Dust in
several strengths we have the Nico
Garden Dust for general use in the
garden, controlling Slugs, Aphis, and
many other garden insects.

INSECTICIDES and SPRAY MATERIALS—Continued

The National Pest Control

Kills Garden Pests

Stops Their Damage!

Snarol is a scientifically prepared meal that you simply broadcast on the ground around the flowers and under the shrubs. The pest eats it as a food and is quickly exterminated. This modern pest control, unlike many others, is afe to use around pets or fowls. Particularly effective in controlling snails, slugs, cutworms, sowbugs, earwigs and

grasshoppers.

Snarol is widely endorsed by leading nurseries, institutions and gardeners everywhere. It is easy to use and quick to effectively destroy the pest, which may be eating the tender shoots of your favorite flowers, vegetables or plants. Use Snarol in the garden and you will be free from the ravages of these pests. Write us today for a supply, or free 24-page booklet on Pest Control, written by Mr. A. D. Cardinet, famous entomologist, and discoverer of Snarol.

Against Ants The National Ant Control

They Stand on Guard Like Sentinels

Antrol containers offer you three distinct advantages over ordinary, old-time methods.

First, this modern system kills the queen ant and thus destroys the entire ant colony.

Second, Antrol is safe to use around children or pets.
And third, the Antrol method is in accordance with the methods adopted by the United States Government.

These three advantages of Antrol make it the most popular ant control on the market.

Antrol jars, therefore, protect your home from ants effectively, safely and permanently. They stand on guard like sentinels! Write today for 24-page booklet on Pest Control, written by Mr. A. D. Cardinet, famous entomologist, and inventor of the Antrol system.

Flyrol

Destroys insects such as flies, moths, mosquitoes, roaches, bed bugs, fleas, chicken mites, lice and their eggs. Applied with a fine spray gun. Flyrol may be used in the ordinary dwelling simply by spraying it in the air. spraying it in the air.

spraying it in the air.

It is not injurious to plants, dress goods or furniture; it is pleasant in smell and offers an economical and satisfactory control of flies. We sell great quantities of Flyrol to dairies, stockmen and poultry men for use in outbuildings, around stables and stockyards. (Pint 65c) (Quarts \$1.20) (Gallons \$3.25) (5 Gal. \$15.00). May be sent by mail.

Carbon Bi-Sulphide

For the control of wevil in grain, place the grain in an air-tight chamber and for every 100 cubic feet of space use ½ Pint Carbon Bi-Sulphide. Saturate it into an absorbent so that it will evaporate quickly, close the chamber tightly and leave for three or four hours. May be used also for the control of the large red ant. Is the control of the large red ant. Is used to some extent for wire worm Infested soil but must be applied when there is nothing growing in the soil. (Pt. bottle 40c) (Qt. 60c) (Gal. \$2.25) (5 Gal. \$8.50) f.o.b. Los Angeles. Sent by express or freight only.

Squirrel Poison-Moore's

(Grain). A certain and specific destruction of gophers, squirrels, crows and mice. (Small size 50c) (Medium size \$1.00) (Gallon-size \$1.90) (5 Gallon drums \$5.50). Cannot be mailed.

Pruning Compound
For covering fresh cuts or bruises on trees and is particularly valuable for figs, walnuts, etc. Will aid nature in healing wounds without retarding the growth of the tree. (1 Qt. Can 75c) (1 Gal. Can \$2.25) f.o.b. Los Angeles. May be sent by mail.

Cyanogas

For Wireworm, Red Ants, etc.

For the control of Wireworm plant a bait crop of beans, corn or peas, before the garden is planted, covering the bait crop to a depth of about 3 inches in rows about 36 inches apart. Within one week the Wireworms will be at-

Within one week the Wireworms will be attracted to the bait crop and at this time apply Cyanogas by means of a garden seeder or by similar method, directly into the balt rows and about one inch below where the bait was planted. In the small garden, where no seeder is available, open a narrow trench deeper than the bait level, close to and on each side of the balt row and apply Cyanogas at the rate of one pound to each 100 feet of row. Cover immediately with the earth dug from the trench and leave it for three to four days, after which time seeds or plants may be planted without injury to them. Remember that Cyanogas is injurious to growing plants and It must not be used except when there are no plants growing.

For field operations, where the balt rows are about 3 feet apart, it requires about 90 pounds of Cyanide per acre. For further information ask for bulletin on Wireworm Control. 1 lb. package 75c, 5 lb. package \$2.50.

SEMESAN

A seed, plant and soil disinfectant. It will sourcessfully prevent or control diseases of seeds without in the least impairing their vitality, but on the other hand generally increases germination, invigorates seedling growth, and develops sturdier plants. Semesan will also prevent or control the "Brown Patch" of lawns, the "Damping-off" of seedlings and cuttings, and certain soilborne diseases. Treatments can be made in dust or liquid form. (2 oz. tin 50c) (8 oz. tin \$1.60) (1 lb. tin \$2.75) (5 lb. tin \$13.00) f.o.b. Los Angeles. Cannot be mailed.

Semesan Jr.

A less expensive but equally effective form of Semesan for dry dust disinfection of seed corn only. Controls diseases and at the same time increases yields from 10 to 40%. (I lb. tin \$1.75) (5 lb. tin \$8.00). F. O. B. Los Angeles. Cannot be mailed.

Semesan Bel

Applied to whole or cut seed potatoes, either as a dry powder or in liquid form, Semesan Bel will prevent or control the common seedborne potato diseases. Also very effective in treatment of Gladioli and other bulbs, and produces healthier plants. (1 lb. tin \$1.75) (5 lb. tin \$8.00) f.o.b. Los Angeles. Cannot be mailed.

Free Descriptive Booklets Sent Upon Request

Hammond's Slug Shot

Destroys many insects injurious to house and garden plants, shrubs, trees, vines, potatoes, melons, cabbage, etc. Dust the powder lightly over the infected plants, covering them thoroughly. One application is generally sufficient to control the worms or insects infesting the plants at the time. (1 lb. Pkge. 25c) (5 lb. Pkge. 75c) f.o.b. Los Angeles. May be sent by mail.

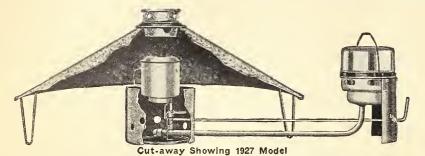

Tobacco Stems

Used extensively by nurserymen and florists for fumigating green houses. Poultrymen also use it in chicken nests. Small quantities by express 20c per lb., f.o.b. Los Angeles. (100 lbs. by freight \$7.00 per 100, f.o.b. Los Angeles.) Prices subject to change.

IMPROVED RELIABLE BROODER

RAISE YOUR CHICKS THE SCIENTIFIC WAY

Standard Blue Flame, Wickless, Oil Heated Colony Brooder

500 Chick Size: \$17.00 f. o. b. Los Angeles

1,000 Chick Size \$20.00 f. o. b. Los Angeles

IN USE BY THOUSANDS OF CALIFORNIA POULTRYMEN

We buy Reliable Brooders by the carload. They are in use by the thousands throughout the big poultry sections of California, and every user is a booster for the Reliable. The heater is positively "fool proof." Has no valves to clog up and cause trouble. The burner is operated on on oil level and is adjusted to the maximum flame at the factory so that it is impossible to overflow it. The flame can be adjusted to any height desired by a simple lever device which is easy to understand and operate. All heaters are shipped out fully assembled and tested for leaks All that is necessary is to fill the oil reservoir and touch a match to the lighting ring and you are ready for action. The cost of operating the Reliable is very low and you can fill the brooder to capacity or you can brood as few as you like, with equal success.

The Reliable is automatically ventilated without any trouble to the operator, and the chicks which are placed in its care are assured of steady, healthy growth.

It is endorsed by many agricultural experiment stations, including the College of Agriculture at Berkeley, and hundreds of our own customers.

This 1927 model blue flame, wickless oil heater colony hover will save you time, money and worry. At last we can offer to the chicken raisers a perfect heater that has an absolute flame control and is easy to regulate. It is valveless and works on a positive oil level so cannot clog and go out during the night hours and so chill your chicks. It is equipped with an indicator dial so the flame can be easily and quickly turned to any desired size. The lifting device is positive in acting and there is no danger of it being changed by the chicks. The brooder is supplied with a one gallon glass oil container and the supply will last from 24 to 36 hours.

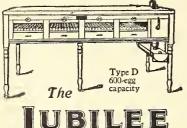

You can operate this brooder to full capacity or just as low as desired with equal success. It burns with a clear blue flame minus fumes or odor. A great advantage with the heater is that there is no packing or stuffing box arrangement to get loose or leak. Only the best grade long fiber asbestos is used in the lighting. They burn less oil than a metal vaporizer.

The capacity of these incubators may be increased by the addition of the Jubilee Turning Trays. These turning trays hold 150 eggs each, and not only increase the capacity but make turning very fast and easy, increasing the capacity 15 eggs to the compartment. meni

Jubilee Turning Trays

\$1.25 each.
Jubilee Electric Heating Unit with Thermostat \$15.00.

The Jubilee Incubator is one of the best known in the world and with the many improvements made in the latest model, it may be classed as a leader. Some of the improvements include sliding tank lamp, moisture pan gauge and linoleum top construction. The Jubilee is not only a good hatching machine but it is a neat and attractive piece of workmanship.

PRICE-600 EGG CAPACITY, \$79.75 f. o. b. Los Angeles

Rid your chicken house of lice, mites, disease germs and parasites by spraying with Destruxol. See Page 86.

ALBATROSS PURITOL

Keeps the Coops and Barns White and Sanltary.

Albatross Puritol is a white disinfectant paint in dry powdered form and is ready for use when mixed with cold water. It is one of the best forms of health insurance for stock and poultry. May be applied to any solid surface, such as wood, cement, brick, stone or iron, and when dry will be snow white.

It is economical in cost, is durable, easy to apply and is a powerful disinfectant. It kills mites, fly eggs and lice.

Price (11/2 lb. pkg. 40c) (6 lbs. for \$1.10) postpaid.

SEARCHLIGHT EGG TESTER

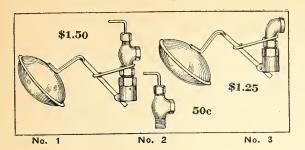

Infertile eggs in an incubator mean a loss of time and money. The testing of eggs is a very important part of incubation and a little expense at the beginning will pay well in the end. The Searchlight will do the job quickly and do it well. It should be a part of your equipment, whether you are operating one incubator or a dozen Postpaid \$5.00.

POULTRY PUNCHES

Petty's, 25c each

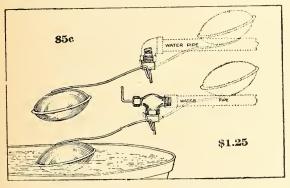

THE WATER BOY

Automatic Fountain for Poultry and Pet Stock

The No. 1 Water Bey Combination shown above includes pressure regulating shutoff, with automatic float valve. The automatic may be detached from the upper shutoff without disturbing the water line and the fowls need not be without water as the shutoff may be used alone as a drip. The Combination No. 1 with brass lever and brass float \$1.50.

No. 2—Fig. No. 2 above shows shutoff valve and this may be used alone as a drip valve or in combination with automatic valve. No. 2 drip valve price 50c.

No. 3—As shown above this is the Water Boy automatic float valve with brass lever, brass float and street ell. No 3 Combination \$1.25.

TIP TOP WATERMATIC VALVES

These valves are very popular among poultrymen. The automatic valves are attached to ¼ inch water pipe and will fill any dish, trough, tank or other container with fresh water without an attendant. The flow is regulated by a brass float, it flows a good stream of water, the valve holds tight and there is practically nothing to get out of order. In the illustration shown above one is with drip valve shutoff and the other without. Price without drip valve 85c; with drip valve \$1.25.

HUMPTY-DUMPTY EGG CARRIER

One of the handlest egg carriers on the market. This carrier will hold twelve (12) dozen eggs. Can be folded flat for shipment and is made of strong but light wooden slats fastened with strong steel wires. Very handy and something every houltryman should have. Price, \$1.10 each, f. o. b. Los Angeles. Weight 6 lbs.

A & M Egg Testers

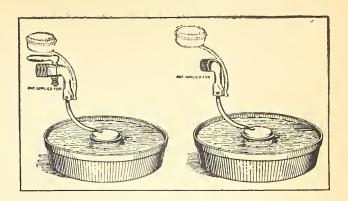

No. 2—Tin with opening on side 40c postpald.
No. 3—Tin made to fit any lamp, 50c postpald.

We handle only the best grade of glass eggr, strong and durable. 65c dozen, 75c postpald.

BUHACH POWDER

For dusting setting hens and baby chicks. No danger in using it. (Pkgs. 25c) (3 oz. 50c) (12 oz. \$1.25) (5 lbs. \$8.50) 1. o. b. Los Angeles.

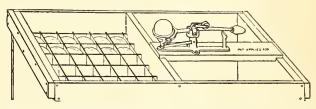

RELIABLE AUTOMATIC FOUNT

Especially designed for poultry ranches. Is made entirely of brass and copper and will last indefinitely. Capacity about one quart per minute. Easily installed and will work under any water pressure. Complete, \$1.35. Without Valve, \$1.00.

(10c additional if post paid.)

RELIABLE EGG SCALE

The RELIABLE Egg Scale is built for speed, accuracy and endurance.

With this scale you can grade your eggs quicker, easier, and get them exact with much less effort than with any other scale on the market.

The RELIABLE Egg Scale has a quick double shift, just a flip of the finger, and you can get all the weights required with the one shift, thereby taking the place of two scales.

The scale has four steel knife-edge bearings, which guarantees a correct weight and long life.

The scale is mounted upon a base which fits the egg case, making it convenient for packing, and eliminates one handling of the eggs.

Price \$2.90 each, f. o. b. Los Angeles; \$3.00 postpald.

A & M Egg Boxes

These boxes are strong and neatly made, partitions full, thus protecting the eggs.

Very convenient for marketing eggs by the dozen.

Prices: 2x6—1 doz. 30c; 100, \$2.00 } f. o. b. Los Angeles

Owing to the diversity of the soil and climatic conditions of the great Southwest, it is impractical to follow without some deviation any table that might be formulated. We believe this table is as nearly correct as any table can be made, yet the time of planting must vary with each season, and so seldom are the seasons at all similar that there is always an element of risk for the man who plants early. Each month, too, requires certain varieties best suited to the season and purpose for which it is planted.

VEGETABLE CALENDAR FOR THE HOME GARDEN

VARIETY	NO. OF PLANTS PER OUNCE OF SEED	SEED FOR 50 feet	ROWS APART	APART IN ROWS	TIME OF PLANTING	READY FOR USE
